

CLEANINGS.

Good and bad habits formed during youth, generally go with us during life.

Coal has been discovered near Louisiana in the State of Missouri.

Farms in Montgomery county, Md. are now selling at \$40 per acre, which ten years ago would not have brought \$10 an acre.

Seven thousand men, in charge of one hundred and seventy-five vessels, have recently sailed from Newfoundland for the seal fisheries.

An infidel, who had been attempting to prove that man had no soul, asked a lady, with an air of triumph, what she thought of his philosophy. "It appears to me," she replied, "that you have been employing a great deal of talent to prove yourself a beast."

As an offset to the hundreds of marriages in Hamilton County, last month, it is said that one hundred divorce cases are on the Docket in Cincinnati. Magistrates must have something to do in the Queen City.

The poorer a man becomes, the more dogs he owns. Show us an individual who lives on one meal a day, and we'll show you a person who has got a life interest in four bull pups and a pointer. Queer, isn't it?

The Wilkesbarre (Pa.) Advocate suggests Hon. Henry M. Fuller, ex-M. C., as a Whig candidate for Governor. Gen. William Lurimer Jr. and James Pollock are also spoken of in the same connection but Gen. L. declines.

A kind word or even a kind look, often affords great comfort to the afflicted.

In Cincinnati there are four German Methodist Churches.

Matrimonial Advertisements.

The New York Times says, we are decidedly advancing in this city. Once upon a time, there was a way to woo, and a way to be wooed—but that was before the days of Spirit Rappings and Women's Rights. True, our fathers and mothers adopted it, got married by it, reared children by it, and reared them successfully as we are here to testify. Nevertheless they were—not to put too fine a point upon it—old fogies, tardy knickerbockers, altogether too *adagio* in their movements. What weariness and waste of time to spend months, sometimes years, in courtship, when the advertising columns of their daily papers offered a ready and speedy transit to connubial bliss.

Matrimonial brokers are quite numerous in Paris. A letter writer from that city gives the following information respecting the tricks of this trade:

I have often wondered how matrimonial agents—those people that advertise desirable husbands and wives, comfortable settlements in life, dowries and amiable tempers—manage to make both ends meet. A commissary of police has just arrested an extensive dealer in this way, and the secret has leaked out. He advertised himself as a corn-doctor to all the crowned heads, and sold patent medicines. He was also an agent for marriages, and had upon his books the names of daughters of members of the Academy and Senate, of a marshal of France, and sundry German princes. Gentlemen that applied for wives paid entrance fee, and in the course of the negotiation, sundry other claims, in all a considerable sum. When it became necessary to bring the affair to a conclusion, a quantity of faded lozenges, with a parcel of elderly females acting as their mothers, were introduced, and the applicant was only too glad to make good his escape. He generally abstained from making the swindle public for fear of being laughed at. The investigations that have been commenced will probably lead to the breaking up of all the matrimonial offices in Paris.

Trial of James Shirley—The trial of James Shirley for the murder of his wife, Sarah Jane Shirley, commenced at Hollidaysburg on Thursday afternoon, 24th of March, and, without intermission, continued until Saturday evening last. The jury returned with a verdict of guilty of murder in the first degree. His counsel immediately asked for a new trial, on the ground that one of the jurors had expressed an opinion against the prisoner previous to being sworn. The Court after hearing the motion, argued at length by the counsel of the defendant, refused a new trial, and the unfortunate man was to be hanged by the neck until dead.

Pennsylvanians in California—In the California Legislature there are eleven natives of Pennsylvania, seven being members of the House of Representatives, in addition to which the Governor and Secretary of State are natives of Pennsylvania, and the Superintendent of Public Instruction though not born here was last a resident of this State.

Productive Farming.

In a treatise on Productive Farming just issued from the press, the following observations occur:

"It is in vegetable as in animal life; a mother crams her child exclusively with arrow root—it becomes fat, it is true, but alas! it is rickety, and gets its teeth very slowly, and with difficulty. Mamma is ignorant, or never thinks that her offspring cannot make bone—or what is the same thing, phosphate of lime, the principal bulk of bone—not of starch. It does its best; and were it not for a little milk and bread perhaps now and then a little meat and soup it would have no bones and teeth at all. Farmers keep poultry; and what is true of a cabbage, a turnip, or ear of wheat. If we mix with the food of fowls a sufficient quantity of egg-shells or chalk, which they eat greedily, they will lay many more eggs than before.—A well fed fowl is disposed to lay a vast number of eggs, but cannot do so without the materials for the shells however nourishing in other respects her food may be. A fowl with the best will in the world, not finding any lime in the soil, nor mortar from walls, nor calcareous matter in her food, is incapacitated from laying any eggs at all. Let farmers lay such facts as these, which are matters of common observation, to heart and transfer the analogy, as they may justly do, to the habits of plants, which are as truly alive, and answer as closely in similar judicious treatment, as their own 'horses.'"

Farming in California.

SAN FRANCISCO, Feb. 28, 1853.

It is an established fact, I believe, that California ranks high as a field for agricultural operations. In their full development, those resources will eventually be her glory and her boast. From the character of the water abounding in many of her most fertile districts, I am inclined to the opinion that the exceeding fertility and fruitfulness of her soil is owing to the salubrity and genial temperature, the rains, and dews, and a certain slight portion of sulphur in the soil, or sulphuric gas which permeates it. In all the highly favored districts with whose characteristics I have become familiar, sulphurated hydrogen abounds. That this element is valuable is unquestionable—my own limited opportunities in practical agricultural chemistry satisfying me fully on that point. Be it so or not, let me furnish you with a direct statement by two of the California farmers, whose operations are on the large scale.

JOHN M. HORNER—Crop of 1852, underestimated.

Potatoes—560 acres; average 250 bushels per acre; the largest yield 400 bushels per acre. Prices have ranged from 5 to 10 cents per lb. Say average not less than \$4 per bushel, cargo price.

Wheat—50 acres; yield 1,000 bushels. Sowed late; one-third crop only. Average \$3 per bushel at least. It has ruled as high as 10 to 12 cents per lb. (California Wheat is good enough to be the best in the world.)

Barley—50 bushels per acre; 630 acres. Average, say 3 1/2 cents per lb.

Oats—25 bushels per acre; 40 acres.—Say 3 cents per lb. Less than half a crop.

Cabages—3,500 marketable heads to the acre; 40 acres. Average price not less than 20 cents per head, possibly more if very fair.

Onions—40,000 lbs. per acre; 4 acres. Average price per lb. say 5 cents, now 15 to 20 cents.

Pumpkins—20 tons per acre; 3 acres. Say 3 to 5 cents per lb.

Beets, Carrots, Tomatoes and other Garden Vegetables—About 10 acres.—Prices fluctuating from 3 to 9 cents per lb.

E. L. BEARD, Wheat Oats, Barley, about 640 acres, November 15. Marketed or ready for shipment, 22,000 bushels! Average, 50 bushels to the acre. Kept on hand unthreshed, for feeding, enough for winter supply for horses and cattle.

Potatoes—Over 60,000 bushels! 180 acres poor seed, yielded only bushels to the acre. 180 acres averaged over 330 bushels to the acre.

Onions—200,000 lbs gathered, from 14 acres of land.

Cabages Marketed and growing, 80,000 to 10 acres.

Beets Pumpkins Carrots, Tomatoes, 0 to 10 acres.

Hay—60 acres, (worth from \$10 to 60, or more, per ton.)

The increase—Intends to double for 1853.

These gentlemen are of San Jose, (pronounced San Hossy,) some thirty odd miles west, with the best market in the world under their very thumbs. Their transactions are heavier you perceive, than some of your banks.

FRUIT.

San Jose Mission—Orchard and Vineyard, 15 acres, 350 full grown Pear trees.—Yield from one tree 1,100, another, 1,500 lbs. The money value of the latter \$1001 for one year remember. Some Fig, Quince, Apple, Apricot, and Olive trees. Gross receipt for 1851, \$16,000.

The Potatoes grown in the San Jose Valley are of superior size and flavor. Those weighing 3 to 5 lbs. being as choice as smaller. As many as twelve persons have freely partaken (as much as they desired) from one potato. Rather tough story this.

Messrs Beard and Horner intended planting 2,500 acres in Potatoes for 1853.

In the valleys of San Jose and Santa Clara within the circumference of a few miles, not less than 15,000 acres, will be planted in potatoes, which at a low estimate of six tons per acre, will give 90,000 tons, or nearly 2 lb per diem for 300,000 persons during one year. They can be delivered in San Francisco, at say, not to exceed 1 cent, per lb, and it is not probable they will range as low as 1 cent, perhaps not less than 2 to 3 cents per lb.

GRAPES—From San Diego, Los Angeles, and other localities in the southern portion of the State, we receive Grapes almost by the cargo. Luscious, delicious, such as you must partake of in California to properly estimate. They pay the producers say 8 to 10 cents per lb. Are related here, right and left, at 50 cents per lb, and the amount daily devoured at that price, during the season is truly astonishing.

PEACHES, APPLES, PEARS, (the latter exquisitely flavored) retail at 25 cents to 50 cents, and very few spoil at that.

Come on Pomologists, Horticulturists, Florists and Agriculturists; bring small and large capital, sobriety, industry and frugality, and no country which can favor your labors like this, will begin to pay you as well. The road to fortune is sure.

Agricultural laborers receive from \$60 to \$100 per month and found—good intelligent hand wanted right and left. More hereafter. From your obedient, M. B.

The Mormons and their Movements.—The movements of the Mormons is one of the most extraordinary of the day. They continue to increase and multiply at an amazing rate, and their missionaries in all parts of the world are reaping a rich harvest. A few days since, no less than 380 new converts arrived at St. Louis, from England, while six more ships are on their way, having from 2,500 to 3,000 on board. It is thought that 10,000 in all will cross the Atlantic during the coming year. How are we to account for this strange infatuation?

Machinery for France.—About 100 tons of castings for the India Rubber Works, about to be established in France by Mr. Hiram Hutchinson, late President of the Newark India Rubber Manufacturing Co., are now in progress of manufacture at Trenton.

Death Warrant of Jesus Christ.

Of the many interesting relics and fragments of antiquity, which have been brought to light by the persevering researches of modern philosophy, none could have been more interesting to the believer and philanthropist, than the one which we publish below. "Chance," says the Courier des Etats Unis, "has just put into our hands the most imposing and interesting judicial document to all Christians, that has ever been recorded in human annals;" that is, the identical Death Warrant of our Lord Jesus Christ. The document was faithfully transcribed by the editor, in these words:

Sentence rendered by Pontius Pilate acting Governor of Lower Galilee, stating that Jesus of Nazareth shall suffer death by the cross.

In the year seventeen of the Emperor Tiberius Cæsar, and the 27th day of March, the city of the holy Jerusalem. Anna and Caiaphas being priests, sacrificators of the people of God. Pontius Pilate, Governor of Lower Galilee, setting in the Presidential Chair, of the Pretory, condemns Jesus of Nazareth; to die on the cross between two thieves—the great and notorious evidence of the people saying—

- 1. Jesus is a seducer.
- 2. He is seditious.
- 3. He is the enemy of the law.
- 4. He calls himself falsely the son of God.
- 5. He calls himself falsely the King of Israel.
- 6. He entered into the temple, followed by a multitude bearing palm branches in their hands.

Orders the first Centurian, Quilius Cornelius, to lead him to a place of execution.

Forbids any person, whomsoever, either poor or rich, to oppose the death of Jesus.

The witnesses who signed the Condemnation of Jesus are:

- 1. Daniel Robani, a Pharisee.
- 2. Joannus Korobable.
- 3. Raphael Bobani.
- 4. Capet, a citizen.

Jesus shall go out of the city of Jerusalem by the gate of Sruenus.

The above sentence is engraved on a copper plate; on one side are written these words; "A similar plate is sent to each tribe." It was found in antique vase of white marble while excavating in the ancient city of Aquila, in the kingdom of Naples, in the year 1810, and was discovered by the Commissioners of Arts of the French armies.—At the expedition of Naples, it was enclosed in a box of ebony as the sacristy of the Charlemagne. The French translation was made by the Commissaries of Arts. The original is in the Hebrew language.—Phila. Gazette.

Balance Against Us.—Senator Broadhead of Pennsylvania, stated the other day in the Senate that the amount of stocks and bonds, both State and National held abroad, presented a balance against us of \$64,000,000 to be met by exporting \$37,000,000 of gold and silver, and by Federal and other stocks.
