

**Singular Race of Human Beings.**

There are now in London two very singular human beings, of a race which has hitherto been very little known to the civilized world. They came from South Africa where they are called *Earthenmen*. They are totally distinct from all other known African races—as much so as if they had dropped upon this earth from another planet. They are diminutive in size—mere pigmies—and unacquainted even with the art of building huts. They shelter themselves in caves and crevices of the earth; when these are wanting they make artificial scorpions on the surface, which they line with leaves and cover with branches. The *Earthenmen* and Bushmen are the avowed enemies of the *Earthenmen*, and when they meet them will shoot them down like vermin. The poor little defenceless *Earthenmen* have no refuge but in holes, trees or thickets, and the tribe is fast verging to extinction. They are a poor weak people—one of Nature's freaks—and destined not to perpetuate their race. Few colonists have seen them; and although it is known that a few still linger in the mountains, these are rapidly dying away, and will soon become a tradition of an elvish Afric face of old.

The two individuals above mentioned, were carried to England from the Cape of Good Hope two or three years ago, and have now become domesticated in an English family. The *Morning Chronicle*, from which we take these particulars, describes these little *Earthenmen* as a boy and girl, the former fourteen and the latter sixteen years of age, and "complete little fairies" in appearance. The boy is three feet three and a half inches in height, the girl a trifle taller. Their skin is of the brightest and most transparent bronze, and as smooth and polished as marble. In form the little creatures are perfect—their delicate limbs standing out in the most graceful symmetry, and every motion instinct with the unthought ease of nature. The faces, although decidedly African in feature, are full of sweetness and good humor, with an expression of archness and intelligence.

They are named *Marjins* and *Flora*. In their savage state they fed on locusts, ant-eggs, and such small game as they could take. "When they were carried to England they had no ideas of God or any supreme power." At present they have been taught some of the customs of civilized life, and are able to speak little English words, to sing little English popular airs, and—the first of *Earthenmen*—to play little airs on a piano.

Few sights are more interesting to a thinking person than that of the last of a race of human beings on the point of being blotted out from the face of the earth. The individuals in question seem to constitute one of the most anomalous forms of our species that have ever yet been brought to the notice of the naturalists or the ethnologists. It is to be hoped that further light will be thrown on their history by scientific researches.—*Boston Courier*.

**The Gardner Case.**

After a trial which dragged through several months, the jury in the Gardner case, being unable to agree, have been finally discharged. As all of our readers may not remember the points at issue in the case, we will briefly recapitulate them. Dr. George A. Gardner, the individual on trial, procured, some time ago, from the Board of Mexican claims, an award of four hundred and twenty-eight thousand dollars; but circumstances subsequently led to the suspicion that the memorial and other papers were false on which this award was obtained. To test this question, and to punish the Doctor, if guilty, of one act, he was charged with having falsely sworn to those papers, and indicted for perjury.

We understand that the government is still so completely convinced of the guilt of Dr. Gardner, that it has determined to try him again, but this time on a charge of forgery. His brother, J. Charles Gardner, is likewise to be arraigned, his alleged offence being that of conspiring with his brother to perpetrate the fraud. Under all the circumstances, it does not become us to express an opinion on the guilt or innocence of the accused. If, however, they have defrauded the government in the way it is asserted, we trust a new jury will pronounce so unhesitatingly, and that the punishment of the prisoners will be prompt and severe.—*Philadelphia Bulletin*.

**Another new Territory.**

The Washington *Union* contains a communication from Henry S. Schoolcraft, Esq., descriptive of a section of country, which is known by the name of *Alharras*. He says it is an attractive, well timbered and fertile area of country, lying immediately west of the Rocky Mountains, in mild, temperate latitudes, to which for the purpose of distinct allusions, he applies the aboriginal term.—This area is about fifty miles broad, and lies parallel to the Rocky Mountains for a distance of several hundred miles. It gives rise to both of the main and numerous sub-affluents of the Columbia river. It is a high plain, which is cut through by these affluents, of a most fertile character, bearing trees, and in some places high grass; and while the streams create abundant water powers for lumber and grain mills and machinery, they are free, or nearly free from inundations of their banks. "This district probably comprehends twenty-five thousand square miles, and if its capacities of production have been correctly estimated, would sustain a population greater than some of the Eastern and Atlantic States. According to the recent act organizing the Territory of Washington, it lies, chiefly, if not wholly, within the boundaries of this new Government. It is altogether a genial country and seems destined to form a link of connection, by ordinary means of transit, with the Missouri Valley, through the Yellow Stone. It may be noticed that while the eastern foot of the Rocky Mountains presents vast sand deserts and burning plains, the fertile lands in this area reach to the very tops of the western eminences."

**Railroad Letting.**—Mr. Emmett, Chief Engineer of the Catawissa, Williamsport and Erie Railroad, has issued proposals for grading, masonry, &c., of that part of the road between Catawissa and Milton, a distance of about twenty-five miles. Proposals will be received at the Engineer's office, Catawissa, up to the 1st day of July, and the work will be divided off in sections of about one mile each.

**A Big Story.**—The Elk county *Advocate* says that a man over on the Simons-honing has got a tract of land containing two acres, on which there is timber enough to make 25 canoes, 49 timber rafts, 50 spars, 40,000 rattlesnakes, and 100,000 porcupines. A good timber tract! The same paper says that a party of Engineers are now in St. Mary's, Elk county, for the purpose of organizing parties to make preliminary surveys in the county for the Sunbury and Erie Road.

**ANOTHER SCIENTIFIC WONDER.**—Pepsin? an artificial Digestive Fluid Gastric Juice. A great Dyspepsia Curer, prepared from Rennet, or the fourth stomach of the Ox, after directions of Baron Liebig, the great Physiological Chemist, by J. S. Houghton, M. D., No. 11, North Eighth Street, Philadelphia, Pa. This is a truly wonderful remedy for Indigestion, Dyspepsia, Jaundice, Liver Complaint, Constipation, and Debility, curing after Nature's own method by Nature's own agent, the Gastric Juice. See advertisement in another column.
