Pelton's System of Geography

Splendid Outline Maps.

This system of teaching Geography is rapidly becoming introduced in all the schools throughout the country. The series consists of seven maps, each covering about fifty square feet, boldly delineated, brilliantly colored, varnished and mounted, and forming the most magnificent, as well as the most useful part of the furniture of the school room.

Pelton's Key to Hemispheres.

This is intended for the use of pupils commencing the study, and a good knowledge of the Geography of the world may be obtained from it.

Pelton's Key to Full Series,

Containing a minute description of each state and country, the political and physical features of the earth, &c., forming a complete epitome of the whole subject. Where these keys are used in connection with the maps, no other work is necessary in the hands of the pupil, and their cost is about one third the usual price of a Geography and Atlas.

Wherever this system has been tried, it has excited the admiration of all who witnessed it, and we might fill a volume with the testimonials received in its favor. We append but one.

Reading, March 1853.

Believing the introduction of Pelton's system of teaching Geography by the use of his series of Outline Maps, into the schools of our city, would enable the pupils to acquire a better, more lasting, and more practical knowledge of that science, than is generally acquired, and in one fourth of the time usually devoted to that study, the undersigned, Teachers in Reading, most cheerfully recommend it to the Directors of the different wards, for their adoption.
