tas who are so numerous and respectable in Virginia, to the eighth and ninth generations, in their dark complexion, deep, sunken eyes, and pecu liar carriage, beiray their Indian origin. This ethnological fact is not an unimportant part of the plaintiff's case. Had his incestors been of African origin, the marks of that race would long since have disappeared, and become merged in the pure Gaucasian features-whereas several of the family retain to a striking degree the un. mistakable peculiarities of the Indian race-the mother of the plaintiff even more strongly than lis grandmother.

There is, too, another political consideration suggested by this case. If it were true, that this expressive of the sense of the meeting. family was in ever so slight a degree tinctured with African blood, would not the Abolitionists be furnished with a powerful argument to vindicate the equality, hay, superiority of that race ? For, of the descendants born in this State from the various races of the human family we know none who can present higher titles to intelligence, knowledge, virtue and real merit, than members of this family. But we rejoice that the Abolitionist is not supplied with this weapon of attack. The origin of this family we feel satisfied, is to be found in that race, which though barbarous has never failed when intermixed with whites to produce the most marked, charàcter.

h is from that blood and intermixture sprung Re Randolphs and Floyds, the Robertsons and Bollings of Virginia. It was to none but that infermixture Louisiana is indebted for one of the ablest of her Governors. It is that cross grafted upon the pure blood of old classic Greece, which has given her a scholar, an orator, a patriot, and a gentlemen, of whom she may proudly beast as her most gifted and accomplished son, one whose genius and accomplishments have shed lustre upon her name abroad one who will live in history and liferature when the traces of the exis. tence of those who defaite and persecute him will be as invisible and undiscoverable as the footprints of the antedduvians.
