knowledge a woman's equality, for that man is a tyrant and would make a scold or a nobody of his wife.

Marry not a man who thinks himself one of the superiors of creation, for that man's brain fies much in the back of his head.

Marry not a man who thinks it a woman's privilege to learn of her husband at home, for that is not the man to teach you; your life would be one of hopeless ignorance.

Marry not a man who is fortune hunting; secondary consideration, taken because the money could not come without you.

Marry not a man who in his intercourse with men speaks sneeringly and vulgarly of woman; for that man's love would be a kind to be despised and loathed by the virtuous.

Marry not a man who seeks for amusement where his sisters are excluded, for that man's associates are low, his ideas of purity limited, and himself not worthy the companionship of a high minded woman.

The wall above and on either side is of rock. It is so formed that a furious she wolf can keep at bay as many dogs as could le sent against her.-She was crouched in the farthest end upon a little perilous .- Boston Chronicle.

TO PRESERVE IRON AND STEEL-KNIVES FROM Rtsr.-Procure some melted virgin wax-the purer the better-and rub it thoroughly over the blades of the knives, and having carefully removed the wax from the surface, rub them briskly with a dry cloth, until the original polish is fully restored. This will fill all the pores with the unctuous and minute particles of the wax, which will adhere firmly, and prevent the intrusion of water or moisture which is the cause of rust. They will retain their brilliney for weeks if used.

AN OLD TURTLE .- Mr. Jacob Leinbach found recently upon his farm in Bern township, Berks county, a land-turtle, with the initials .. II. N. (Henry Newschwender) and date "1791" cut upon its under shell, and immediately be-neath, "S. M. (Samuel Moser) 1827." This must be a veritable patriarch of turtles, and for aught we know may be one of the pair that lodged in Noah's ark. May it inhabit its ancient "snuff box" for a thousand years to come.

TREES.—The Humboldt Times mentions spruce pine log, 26 feet long, which turned out 4,000 feet clear stuff, without knots or windshakes. The tree made 13,000 feet clear lumber. We do not believe it can be beat in the country, though we have trees of other species bake with one crust, as you would bake a comare estimated to turn out upwards of 100,000 feet.—That one tree will build two houses, each two stories high and 50 feet square, furnishing all the square timber, planks, shingles, &c. would not be credited in the Atlantic States.

To CLEAN PAINT. - Smear a piece of flamel with common whiting, mixed to the consistency of common paste, in warm water. Rub the surface to be cleaned quite briskly, and wash off with clean water. Grease spots will in this way be almost instantly removed without injuring the paint.

NATIONAL KNOW-NOTHING CONVENTION.—It is reported that a National Know-Nothing Convention was held at Cincinna i on Wednesday for the purpose of nominating a candidate for the Presidency. It was thought that either Millard Fillmore, of New York, Sam Houston, of Texas, or Jacob Broom, of Pennsylvania, would be the nomince. Fillmore is said to have joined the Order in Buffalo.

A RARITY .- Mr. John G. Heinly, of Hamburg, has obtained a ripe apple two inches in circumference, from a young tree which was planted last Fall, and first blossomed about the middle of August. We often hear of trees blossoming out of their time, but very rarely of their bearing fruit.

MELANCHOLLY CASUALTY. - Messrs. Cyrus Hare, Daniel Creisher and Abraham Fichthorn, went on a gunning excursion, from Reading. Pa., on Wenesday last, and Mr. Hare, while lifting a loaded gun out of a wagon, was shot through the breast by the accidental explosion of one of the barrels and so badly injured that he died the same evening.

LARGE PRODUCE FROM BEES .- John Ross, an experienced apiarist of Warren, Mass., has a hive of bees, from which he has taken, during the past year, two hundred and forty pounds of extra honey. The bees were fed upon preparation made by himself, and by which they do far better than when left to collect their own food.

The Inauguration of Gov. Pollock will be attended with a grand military display, as volunteer companies will be in attendance from various parts of the State. There will be an American Inauguration Ball, and a display of fire works on Capitol Hill.

New Macrine. - A Yankee in New York has invented a machine for putting babies to sleep. It is supplied with fresh milk, paragoric, God-GEN. PUTNAM'S WOLF DEN .- A gentleman frey's cordial and sugar, which it dispenses acwho recently visited the den in Pomfret, down cording to the necessities of the case. Mothers have only to chuck Thomas and Mary into the machine, where they will be cared for in the being at least twenty-six feet long, and on an best manner for eight hours. To those who are average two feet square, though in some parts fond of "lightening the cares of life," going to evening shindies, fiirting and "such like," the new invention will indeed be a "blessing to mothers."

BUCKWHEAT CAKES .- The gridle on which cakes are baked should never be touched with the temper. shelving rock, and the passage being rather grease. Firstly, because it imparts a taste to crooked, the General must have pene trated at the cake. Secondly, if a cooking stove is used, least ten feet, and probail; more, unless he had it fills the whole house with the smell of burnt a gun so favorably contrived that he could grease, betraying what we are to have for breakshoot round a hay stack.' After each cake is removed, the salt rubbing must be repeated. Try it and you will ever follow the advice of an old house-

> CONVICTION OF A SLAVER. - Capt. James Smith, of the brig Julia Moulton, has been convicted in the U.S. Circuit Court, at New York, of piracy in fitting out, commanding and managing that vessel in a voyage from New York to the slave coast, where she took on board six hundred slaves, and sailed with them to Cuba, and were safely landed. The offence was clearly proven. The punishment by law is death. A motion for a new trial has been made

LARGE YIELD.—The Lancaster Whig says: We learn that D. J. Fisher, Esq , raised 1600 bushels of corn on a sixteen acre lot, near Battle Swamp, in Lancaster county, which two years ago was sold who not has had guano applied to it three times in that period: the first application was 200 lbs., the second 100, and the third 400 lbs, to the acre : making in all 700 lbs.

TO MAKE APPLE CUSTARDS .- Select good sweet apples, such as will cook well: pare, cut and stew them; when thoroughly done, stirthem briskly, till the pieces are all broken fine. Allow the apples time to cool and thin down to the proper consistency with good milk, and mon custard, or a pumpkin pie. If a richer pie is wanted, a few eggs may be added. If the apples are totally sweet, but little sugar or Eggs per doz. other sweetening will be required. If desirable, spices may be added.

BEET VINEGAR.—Take a bushel of sugar beets, fresh from the ground, wash and grate them. Press out the juice, which will amount to about six gallons, and put it in an empty and perfectly sweet barrel. In a fortnight you will have an excellent article of vinegar, and as pleasant as that from eider or even wine.

FORTUNE'S FROLIC .- A poorshoemakernamed Henry Parker, residing in some obscure corner of Covington, was fortunate enough, yesterday. to draw \$5,000 in a lottery. Mr. P., for the last ten years, has been pounding away on the lapstone to support a wife and seven children. and has been only able to obtain a living starvation at that. He purchased the ticket out of pure desperation, and his unbounded joy when he learned the result can be better imagined than described .- Cin. Enq.

THE PRESENT YEAR .- The year 1854 began on Sunday, and will end on Sunday, thus hav ing fifty-three Sundays. January, April, July October and December have each five Sundays Such an array of Sundays, it is said, will not ecur again until 1882.

ELEPHANTS .- The Consul for the United States, at Calcutta, has shipped on board the American ship Venice, at that port, a beautiful female elephant and her calf, but a few days old, for Philadelphia. The animals were placed on board on the 31st of August.

The average cost of tuition in the N. Y. Public Schools is, for boys, \$14,33, and for girls, \$9,33 per annum. The average annual cost of titution for the children in the Primary Schools. is \$4,09. The estimate embraces the cost of ti-

intion merely, and does not include books, &c. There are no less than six thousand pianos manufactured in Boston annually, and they are sold at prices varying from \$225 to \$1500 cach.

who thinks woman's only duties is to make his on the list we published two weeks ago, the folces the Germantown 'Telegraph' with the annexed receipt for curing hams. Some of our agricaltural friends hereabouts who have the best hams in market, put them up after nearly the same method:

'To every one thousand pounds of hams, take eight ounces of saltpetre, two quarts of molasses, and two quarts of salt; mix with water. After settling for two or three hours before introducing the liams, rack off, and throw out the sediments from the bottom; cover the meat with the brine, and repack once a week, changing the position of the hams. In six weeks the hams may be taken to the smoke room. After and 15 days. smoking, they may be returned to the brine, and kept through the summer. If preferable the meat may remain in the brine and be taken out ders' Bank, Terre Haute, and Great Western and smoked as it is required for use. It will be for the subscribers to the Mammoth Pictorial o found always in a good condition, and is, when smoked, an excellent article.

IMPORTANT TO BLACKSMITHS .- It is stated that a bar of iron, of almost any size, may be instantly sundered while hot, by the simple application of a piece of common roll brimstene. A know ledge of this fact will be useful when some piece of iron work is required to be severed, but which, as is sometimes the case, is so constructed and situated that no ordinary chisel on cutting tool can be brought to apply. Holes may be instantly perforated through bars or plates of heated iron, by the application of pointed pieces of brimstone. There is also a method of sawing or cutting hardened steel, by means of a circular piece of common or thin iron plate, or sheet iron, adjusted to a lathe, or otherwise put into violent rotary motion: this will readily cut off a file, cutting tool or tempered steel spring, without drawing or reducing

To CLEAN WINDOW GLASS .- Take finely pulverised indigo, dip into a linen rag moisted with vinegar, wine, or water, and apply it briskly to to the glass. Wipe-off-and polish with a dry cloth. This method of cleansing glass, imparts a brilliant polish, and is far more expeditiously accomplished than cleaning with soap-suds or whiting.

CRANGERRY JELLY. - Make a very strong isinglass jelly : when cold, mix it with a double quantity of cranberry juice, pressed and strained; sweeten and boil it up, and make it into the desired shape, by straining in the proper vessels; use good white sugar, or the jelly will notabe clear.

CRANBERRY AND RICE JELLY .- Boil and press the fruit, strain the juice, and by degrees mix it with as much ground rice as will, when boiled thicken to a jelly, boil it gently; stirring it. and sweeten to your taste : put it into a basin or form, and serve with cream or milk.

It affords us extreme pleasure to record the mion (in the bonds of matrimony) of the above named persons, as well as all others with whom we were wont to associate. Now, since those loving hearts are joined together in the bonds of matrimony, may the love which joined them be fadeless, and may pledges of affection, as they grow in years, spring up around them, causing their pathway through life to be strewn with never-fading flowers. They have entered upon the duties of a new life, with the hope of a long and pleasant "Honeymoon."
