New York Quarterly.

The July No. of this Quarterly has been lying on our table for several weeks awaiting a leisure moment for its examination. But when we cut its leaves our attention was so much taken up with it, that we have read with great pleasure most of its articles. It is a very vigorous journal, fresh and fragrant as the carly spring, and we wish it the success which it so

richly merits.

A certain man hit his toe against a pebble stone and fell headlong to the ground. He was vexed, and under the influence of anger and active self-sufficiency, he kicked the old mother carth right saucily. With imperturable gravity, he looked to see the globe itself dissolved, and come to naught. But the earth remained, and only his poor toe was injured in the encounter. This is the way of man. An article in the newspaper touches him in a weak place, and straightway he sends word to step his paper. With great self-complacency he looks on to see a crash, when the object of his spleen shall cease to be. Poor fool, he has only hit his own toe against a world that does not perceptibly feel the shock, and injures to no extent any one but himself.

Caught Again.

LEVI Ocns, who succeeded in making his second escape from our Jail about two weeks since, was on Thursday last again arrested at Stroudsburg, Monroe county, and lodged in his old quarters on Saturday morning. As he has proved himself very smart at Jail breaking the Sheriff determined to put a stop to that kind of fun and now keeps him chained to the floor.-The news of his re-arrest, and the secure manner in which he is now kept, will no doubt be gratifying to the citizens of Saucon township, where he had since his last escape committed sundry depredations, and many persons were constantly on the look-out for fear of their property being fired.

Allentown Bank.

To-morrow an election for thirteen directors of the Allentown Bank will be held at the public house of Charles IHRTE. The Commissioners are making all the preliminary arrangements in their power for an early commencement of banking operations. They have rented for a Banking House the building at the corner of Seventh street and Market Square, formerly occupied by the Northampton Bank, and at present as a restaurant.

Violation of the Sunday Law.

On Saturday last, Philip Klee, the "mine host" of a Lager Beer House in the suburbs of of our town, known as the "Anchor House," was brought before John D. Lawall, Esq., on a charge of violating the Sunday Liquor Law .-Several witnesses were examined, from which it appeared that Philip was guilty, and he was fined \$50 for violating the law, and required to enter security for his appearance at the next Court for misdemeanor.

There are several stories afloat about the affair, and we have endeavored to obtain it as correctly as possible. It appears that several young men went to the "Anchor" and prevailed upon Philip to sell them some Lager, and ter considerable coaxing succeeded it. After it had been drank a spurious \$1 bill was tendered by the person who called for the beer. Afterwards a dispute arose about the bill, and the person who had passed it "got up his blood" and threatened to prosceate him for selling beer on Sunday. The party then left, and on coming out-doors met officer Hankey and told him that Philip ought to be informed upon, as they had drank Lager and paid for it. The officer then told them that he would have - to inform against him, and would require them us witnesses.

Such we believe were the facts of the case, and we think it is about the meanest transaction that has turned up in town for some time, although no blame can be attached to the officer, (as is the case,) as he is sworn to uphold the laws. These men that induced Philip to sell to them, when they knew it was in violation of the law, they are the persons that ought to have "the slowly moving finger of scorn" pointed at them. It is not likely that the law would have been violated if they had kept away from the place on the Sabbath; as all law-abiding and good citizens should. That the "Anchor" is a place of bad repute is well known, and we would not be understood that we in any way strive to uphold it by siding with Philip in the above case. Last winter he was involved in several difficulties, brought before Court, and made to suffer the penalty of the law. And why? Why, for maintaining a nuisance. And who committed the nuisance? In most instances it was done by persons who got drunk at other places about town, and then, on account of the obscure locality, went to the "Anchor" to give vent to the "wet damnation" they had previously imbibed. As regards this late prosecution, we look upon it as a small business. It is perfectly right that the law should be carried out to its fullest extent, and that all guilty violators should be punished, but then it is wrong that a man be dragged into a difficulty and afterwards betrayed, as was done in the above instance.-It is perfectly right, and we gladly see it, when man is prosecuted from a virtuous sense of justing for openly and willingly violating the law, but we do dislike to see it done to gratify spleen.

Warm Weather.

The weather during last week was very in the shade. On Thursday, however, it felt exceedingly summery, and the clerk of the article when it was up. Ladies gasped, gentlemen puffed, fat folks dripped, lean ones drew themselves out to a gaunter length. A girls were squeezed as we know of-reckon it wouldn't pay. When the heat gets up to 98 degrees, as it was, it begets a trying time among printers, taxing them to their utmost to steer elear of having their "rollers" decomposed .-Few persons are aware of the exact process of inking types, or the materials used in this oneration. Composition rollers, composed of glue and molasses, boiled until the materials assume a stiffness and elasticity, are used for this purpose. These rollers are admirably suited for distributing the ink equally over the types; but are always affected by sudden changes in the weather. In the winter when the thermometer hard as pieces of wood, and it is difficult to make them elastic; while during warm weather, when the mercury is raging about the nineties they are affected pretty much the same as a tallow candle by the heat, and are frequently converted into a liquid state.

Homilies. What is more noble and admirable than a young man rejoicing in his strength, his youth and his purity, grappling strongly with the world, to sustain a widowed mother and orphan observation in our town, and we confess we love such young men. They have a glorious future before them, for such merit never goes unrequited by the even hand of Justice.

There is another picture we have seen, here and elsewhere, though, thank Providence, more seldomly. It is a young man dressed in silks and wools, gloves and perfumery, lounging about, while a decrepid mother and father and little brothers toil night and day for his support. He shamelessly abuses a father's love and a mother's tender sympathy—he is a disgrace to his kind. How many of our readers can see just such characters as the above opposites in the area of their acquaintance. Let the one be cheered on in his noble struggles by kind words and kindlier assistance, but let the slowly moving finger of scorn" be pointed at the other till he is hissed from his home or driven to activity and usefulness.

Connecting the Schuylkill Coal Region with N. York.

Ellwood Morris, Esq., Engineer and Superintendent of the Dauphin and Susquehanna Railroad, has been reconnoitering the route for a Railroad from Auburn, Schuylkill county, to intersect the Lehigh Valley Railroad at Allenown, leading directly to New York. Mr. Morris is one of the most talented Engineers in which a road can be made from Auburn to Allentown, a distance of 38 miles, with a grade not exceeding 16 feet to the mile running East, and 32 feet running West. By this Pottsville would be brought within a distance of 140 miles of New York City-and the road can be made at a cost of about \$1,200,000, and for \$2,000,000 fully equipped from a large business. The following are the distances:

				Miles
Pottsville to Auburn,	-	· •		- 10
Auburn to Allentown, -		•		- 38
Allentown to Easton,	-	•		- 17
Easton to New York, -		•	-	- 75

Total. -140 The Miner's Journal says: By this road the whole Coal Region of Schuylkill County will have access to the New York Market by Railroad direct - and as this is the most direct route from New York to the great West, being almost an air line, as the Maps will show-we feel confident that the road will be made forthwith .--The Report of Mr. Morris will be issued in a few days. '

The Reading Gazette in speaking of this project says: This route we believe, takes in 8 miles of the Reading railroad, from Auburn to Hamburg, and thence strikes across in a straight line to Allentown. It would therefore bring New York within about the same distance from Reading, as Pottsville, if the above table of distances be correct, viz: Reading to Hamburg, 17; Hamburg to Allentown, 30 miles; Allentown to Easton, 17 miles; Easton to New York, 75 miles; total 139 miles. The construction of the link between Hamburg and Allentown, is all that is wanted, to open to Reading, as well as the whole Schuylkill coal region this short and direct route to New York. Mr. Morris, we are informed, is sanguine that the money will be raised to make it. A through train, from Reading, would run to New York, in about 5 hours-nearly as quick as the time it takes between Philadelphia and New York.

By means of the Dauphin and Susquehanna road which connects with the Pennsylvania Railroad, 5 miles above Harrisburg, this would be also the quickest and most direct route for Western travellers to New York.

Latest Foreign News.

The Arago, one of the Havre steamers, arrived on Monday at New York, after a passage of twelve days, with four days later news from Europe. The interest of every arrival centres in the news from the Crimea, and the progress of that eventful siege. The most important event from that quarter is the death of Lord Raglan, the Commander-in-Chief of the English army. No new movement had occurred in the Crimea. From the Baltic the news is that the friga te Amphion ran ashore near Sweaborg—a fire was commenced upon her from a Russian fort, which she returned, and caused considerable damage in the fort by an explosion. This probably accounts for the report by the last steamer that Sweaborg had deen bombarded, and all the stores destroyed, Sweaborg is one of the most formidable places of defence the Russians have in the Baltic, and is not to be attacked with impunity. From England the are news interesting. Lord Grosvenor's Sunday day, has produced a very formidable manifestation of popular indignation. The first Sunday, fifteen thousand persons assembled in Hyde Park, who compelled the nobility and gentry, by hooting and outcries, to leave their carriages, while taking an airing. The authorities made the country, and he has discovered a route by preparations for the succeeding Sunday; but, in spite of the preparations, a crowd of working men, numbering one hundred thousand persons assembled in the Park again, and the same scenes were re-enacted, with the addition of an assault upon the police. The Sunday bill had to be withdrawn by its author to quiet popular tumult, at a time when the government need all the moral force and physical aid the nation can give to enable it to conduct the war with advantage.

THREE DAYS LATER .- By the arrival at Halifax of the steamer Canada, we have later news from Europe. Lord Raglan was buried on the 3d of July, amid great poinp and military display. It was rumored in the camp and at Constantinople, that General Pellissier was about to be superseded.

The Sardinians and Turks have made an excursion into the interior of Tchernays, and captured numerous works of art. Gortschakoff has sent for 20,000 additional troops, and General Liprandi's army has been reinforced by the arrival of another division. The war has already cost the belligerent nations half a million of lives. Russian accounts from the Baltic say that the allied flotilla had, without effect, fired for eight hours against the batteries at the mouth of the Nacta, and had then withdrawn. Subsequently the prade a descent on Kotka Island, destroyed the government stores, and then attacked Fort Revel without effect. On the 5th of July the bulk of the allied squadron was off France and England, and has been discovered on board an English steamer, on his return .-The French Legislature has voted the required loan of seven hundred and fifty millions of francs, besides increasing the taxation so as to yield seventy millions more per annum.

Horse Stolen and This Captured .- A H. M. Fetter, in South Bethlehem. After diligent search the horse was discovered at Diehl's tavern in U. Saucon, Lehigh Co. A SAD CASE .- At St. Louis, Mo., the other day, a shocking murder and suicide occurred. A young man named Blessing, whose sister had recently escaped from a convent and fallen into dissolute habits, went to a house of ill repute, and finding her there, persuaded her very quietly and with much apparent good feeling, to take a ride in a carriage with him. They went out into the country, and alighting to take a walk, he drew a revolver, and shot her fatally twice through the head. Her dead body was subsequently found on the spot. Returning to the city, he spent a gay evening in drinking champagne with some of his relatives, after which he killed himself

A WIFE AS WAS A WIFE.—The New York Post tells a story of a merchant in that city who, when first married, told his wife that for every scion she produced he would place at her disposal \$3,000. After a lapse of years he failed, and upon informing his wife of his embarrassments, she quickly placed in his hands bonds to the amount of \$30,000, as the products of her industry, remarking at the same time, You see, Charles, that I have not been idle and if you had been half as industrious as your brother over the way, I should now have \$60,000."

STEAMBOAT DESTROYED BY FIRE.—The steamboat John Stevens, was burnt at White Hall Bordentown, on Monday night, 16th inst., where she lay at her wharf. She was an elegant boat, as handsome as any on the Delaware.-The origin of the fire is not known. Three colored women, sleeping in the small cabin, were burnt with the boat.
