# THE LEHIGH REGISTER, FEBRUARY 13, 1856.

NATURE AND ART .--- Upon examining the edge An exceedingly small needle resembles a rough the rest are volunteers. iron bar. But the sting of a bee, seen through DELook out.-For three 20 dollar notes on the same instrument, exhibits everywhere a the bank of Commerce, Baltimore, dated 2d polish most amazingly beautiful, without the April, 1855, letter A, No. 464, 280, and 274. least flaw, blemish, or inequality, and it ends These notes were stolen out of a letter by some with a point too fine to be discerned. A small mail robber from Baltimore to Williamsburg. piece of exceedingly fine lawn appears through [7] The Carbon (Pa.) Gazette says :- There hreads themselves seem coarser than yarn fass, consisting of 25 persons-father, mother with which ropes are made for anchors. But and 23 children.

a silkworm's web appears perfectly smooth and shining, and everywhere equal. The smallwhen viewed by the microscope, an irregular heretofore. spot, ragged, jagged and uneven. But the little specks on the wings or bodies of insects are

with guano, and receiving little or no manuring since. If such were to be the general result, we might bring up our farms to a wonderful degree of fertility, because a third or half of the tillage land laid to grass with guano, and producing a fair crop for several years in succession, would enable us to appropriate all the manure of the farm to the hoed crop. This would allow of very high manuring, and put the land in such a condition as to produce heavy grass crops without the further application of guano. But we need further experiments, and test the guano upon its own merits, by putting the land into grass without a particle of any other manure.-N. E. Farmer.

THE COLD TERM. - The present winter has exceeded in severity, both in duration of the cold term and the extent of territory affected. whole northern hemisphere appears to be affected. From Italy and other portions of Southern Europe, the complaint of unusual cold is heard ; and in the Southern United States, we have the same cry. At the last accounts very severe cold weather was being experienced in Texas. The Galveston News of the 12th ult., says that a very severe cold Norther had continued there uninterruptedly for twenty days. Telegraphic advices to the 19th state that the weather throughout Texas continued very cold. At Clarksville, Red River county, snow had reanained on the ground for several weeks. The Wheat, Brazos river was so frozen that teams crossed on the ice. An old Texan says to new the May, worst weather for cattle ever known in the Hay, State. Ice four inches thick was being put up at Austin.

Transposition of Figures-The Figure Nine. -The numerical nine has a certain peculiar property, a knowledge of which will be of importance to accountants and cash-keepers. It is this: When an error has arisen from any transposition of figures, the difference between such transposed number of figures is uniformly a multiple of the numeral nine. For instance suppose an error occurs in bringing out a trial balance or cash settlement of the amount in question, or that the sum short or over can be divided by nine without any remainder, there is a strong probability that the mistake has been made by transposing figures; at any rate, if such mistake takes place by reason of transpo-sition, the sum in question will divide by nine without a remainder. To illustrate this fur-ther: If 97 has been put down 79, the error will be 18, or twive 9 exactly: if 322 be set down 223, the error will be 99, or eleven times 9, and 223, the error will be 99, or eleven times 9, and 223, the error will be 99, or eleven times 9, and 223, the error will be 90, or eleven times 9, and 223, the error will be 90, or eleven times 9, and 223, the error will be 90, or eleven times 9, and 223, the error will be 90, or eleven times 9, and 223, the error will be 90, or eleven times 9, and 223, the error will be 90, or eleven times 9, and 223, the error will be 90, or eleven times 9, and 223, the error will be 90, or eleven times 9, and 223, the error will be 90, or eleven times 9, and 223, the error will be 90, or eleven times 9, and 223, the error will be 90, or eleven times 9, and 223, the error will be 90, or eleven times 9, and 223, the error will be 90, or eleven times 9, and 224, the error will be 90, or eleven times 9, and 224, the error will be 90, or eleven times 9, and 224, the error will be 90, or eleven times 9, and 224, the error will be 90, or eleven times 9, and 224, the error will be 90, or eleven times 9, and 224, the error will be 90, or eleven times 9, and 225, the error will be 90, or eleven times 9, and 226, the error will be 90, or eleven times 9, and 227, the error will be 90, or eleven times 9, and 226, the error will be 90, or eleven times 9, and 227, the error will be 90, or eleven times 9, and 226, the error will be 90, or eleven times 9, and 227, the error will be 90, or eleven times 9, and 227, the error will be 90, or eleven times 9, and 236, the values of all other kinds a strong probability that the mistake has been so on between any transposed numbers. This class of errors is very common.-Boston Courier.

The New York Fire Department is con of a very keen razor with a microscope it will posed of 2,631 men, under one chief and eleven appear as broad as the back on a thick knife ; assistant engineers. The chief receives \$3,000, rough, uneven, full of notches and furrows. and the fire marshal \$2,000 per annum. All

July 20

though losing in 1832, by fire, nearly \$300,000. this institution now possesses a capital of over three quarters of a million ; and a grand total of its sales for the past fiscal year, reached the agent for Leigh and Carbon counties, who is preof its saids for the past isen year, redence the agent for lenge and chron connect, and is re-sum of \$631,169. It has now been in existence pared to exceede all orders at short notice. sixty-six years. The tract and periodical de-nartments are but branches of the great trank REFERENCES. concern.

The rapid changes of weather in our variable climato is peculiarly trying to the constitution of the weak and delicate. Rheumatism, Pain and Aching of the Bones, Neuralgia, Hacking-Cough, &c., not only affects them, but seizes hold on many who are now most vigorous and healthy. To all such, we cannot in too strong terms,

recommend the use of Carter's Spanish Mixture. It cures disease by purifying the blood, and expelling from the system all the impurities which tend to generate or retain disease; it is perfectly harmless, and has gained for itself a reputation as an alterative and strengthening tonic, which is not approached by any medi-cine now before the public. As a remedy for Scrofuls, and the very worst forms of depraved blood, no medical discovery yet made equals it. The proprietors of this valuable remedy are in daily receipt of letters from all parts of the country detailing cures by Carter's Spanish Mixture, after all the efforts of Physicians and the regular remedies of the profession had signelly failed. We take great pleasure in calling the attention of the afflicted to its merits as a medicinal agent of singular and extraordinary officacy.

The Charlestonians are putting up their own ice from the ponds surrounding Charleston. They usually import it. Other Southern cities this year have their ice supply at their own doors, which will very materially affect the trade in that article next season.

This is rapidly superscaling the use of all other kinds of roofs, wherever it has been introduced, giving gen-eral satisfaction, and is bighly recommended by all who have tested its utility. These roofs requi inclination of not more than one inch to the

THE METHODIST BOOK CONCERN. - The North-restern Christian Advocate says of the Metho-dist Book Concern, that "it commenced in 1789, in Philadelphia, under the supervision of steep roof, often makes a still further important ro-steep roof, often makes a still fu Rev. JOHN DECKNS, the first book steward, agent, and editor, of the Methodist Episcopal Church, with a borrowed capital of \$600 : and though losing in 1832, by fire, nearly \$300,000. no roof is so cool in summer, or so warm in winter

The following named gentlemen in Allentown have heir houses roofed with the aboved named compositheir houses roofed with the aboved named composi-tion, and are able to testify to its superiority over any other kind of roofs : B.F.TREXLER, Unionst., between Ninth and Tenth.
