THE LEHIGH REGISTER, APRIL 16, 1856.

TTA DELICATE CASE .- A very interesting case came before 'Squire Stroh, on Wednesday last. A woman had a warrant issued for three others of her own sex, residing in Weisssuading her into a house, and then applying a coat of tar and feathers to certain parts of her person. During the progress of her examinamen-and some old ones too--found their way into the Squire's office. The testimony of the prosecutrix was of a very delicate and modest character, and created considerable merriment. The defendants were bound over to the next term of our Court to answer .-- Mauch Chunk Democrat.

million strokes with a pen and ink within a month; not to be mere scratches or dots, but far-down strokes such as form the child's first lesson in writing. The month was to be four weeks, and he was to abstain from the task on Sundays: so that he must average 36,000 strokes per day. On the first day he executed about 50,000 strokes ; on the second day near ly as many. But at length, after many days, the hand became stiff and weary, the wrist swollen, and it required the constant attendance of a relation or friend to besprinkle it, without interrupting its progress over the paper, with a lotion calculated to invigorate it. On the 23d

was leading to a long-winded dispute, when one of the by-standers took up the boot, gave it a shake, and tossed a half grown rat upon the floor. The discovery of the rat solved the riddle. The rat, to escape the cat, rushed into the boot; the cat, to secure a game dinner, rushed after him, and with such force that she could not back out again. Learn wisdom from pussy, and never "go it blind," even in a good cause .-- Albany Knickerbocker, 21st.

A BLIND HISTORIAN .--- One of the papers states that Wm. II. Prescott, the American historian, who resides at Groton, Mass., lost one eye when at college, by a blow from a crust thrown by a boy. The sight of the other was so weakened by sympathy, that he cannot use it. He accordingly uses the apparatus invented for the blind -- a stylus, with tracing paper, and string to guide the hand. He is thus able to sit up at night and write without lighting a candle. In this way his great historical labors have been perfected.

BOY TORN TO PIECES BY A BLOOD HOUND. -A little boy named Ephraim Whitehead was torn in pieces by a blood hound slut, in Cleveland, Ohio, Saturday afternoon. He was missed for some time : and upon search being made, was found in a lot near his home, mangled in the most shocking manner. He was still alive, and when asked whether it was the blood hound slut, owned in that neighborhood, which had attacked him, said "yes." He lived not half an hour after he was found.

D"" TRUTH STRANGER THAN FIOTION."-Such would seem to be the case with the reme dy now before the public, known as Carter's Spanish Mixture. Its powers in many instances seems to be really miraculous, and especially i port, or Lehighton, charging them with per- the radical and permanent cure of some of the most terrible forms of disease with which man-kind are afflicted. Scrofula, which seems entirely to baffle the skill of Physicians, has been cured in many instances by only a FEW BOTtion quite a number of the gossip-loving young TLES of this invaluable compound. Syphilis another of the most awful scourges, has been cured by Carter's Spanish Mixture in over 500 carses. It acts specifically on the Liver and secretions, and is the best alterative or blood purifier yet discovered. It has gained reputation wherever known which cannot h proached by any former effort of science, and it is prescribed by physicians and testified to by many of the most eminent public men of the coun

TY, many of whom say they consider it a matter of duty to make its merits generally known, and lately accepted a challenge to make one and cordially recommend it to the afflicted.

Over five millions of letters have been received and opened at the dead letter office in Washington during the past year. The amount of money found in them and returned to the writers, was \$17,000.

MODERN INVENTIONS.

We know of no invention of modern times that de-serves or is destined to occupy a higher niche in the temple of fame, than the discovery or invention of the Vegetable Epiletic Pills for curing Epilepsy, or Fall-ing Pile. When Dr, lance first prepared these Pills, he intended them a lotion calculated to invigorate it. On the 23d day the million strokes, exceeded by some few thousands "to make assurance doubly sure," was accomplished.—N. Y. Mirror. SINGULAR OCCURRENCE.—In clearing up one of the rooms at Stanwix Hall. yesterday, a waiter discovered a cat so arowded into a boot that it was with difficulty that she could be ex-tricated. Having got her out, the next ques-tion in order was, "how did she get in ?" This was leading to a long-winded dispute, when

BISIS STORS,

The Illinois Central Railroad Company IS NOW PREPARED TO SELL

OVER TWO MILLION OF ACRES OF FARMING LANDS,

Tracts of 40 acres and apwards, on long Credit. and at low rates of Interest. THESE lands were granted by the Government, to aid in the construction of this Railroad, and in-clude some of the richest and most fertile Prairies in

the State, interspersed here and there with magnifi-cent groves of oak and other timber. The Road extends from Chicago, on the North-East, to Cairo at the South, and from there to Galena and Dunleith, in the North-west extreme of the State, and as all the ands lie within fifteen miles on each side of this Road. Indus he within fifteen miles on each side of this Road, ready and cheap means are afforded by it for trans-porting the products of the lands to any of those points and from thence to Eastern and Southern markets. Moreover, the rapid growth of flourishing towns and villages along the line, and the great in-erease in population by immigration, etc., afford a substantial and growing home-demand for farm pro-duce.

The soil is a dark, rich mould, from one to five fee in depth, is gently rolling and peculiarly fitted for grazing cattle and sheep, or the cultivation of wheat, Indian corn. etc.

Economy in cultivating and great productiveness are the well known characteristics of Illinois lands, Trees are not required to be cut down, stumps grubbed, or stone picked off, as is generally the case in cultivating new land in the older States. The first

usually repays the cost of plowing and fencing. Wheat sown on the newly turned sod is sure to vield very *large profits.* A man with a plow and two yoke of oxen will break one and a half to two acres or day. Contracts can be made for breaking, ready or corn or wheat, at from \$2 to 2.50 per acre. By judicious management, the land may be plowed and fenced the first, and under a high state of cultivation

the second year. Corn, grain, cattle, etc., will be forwarded at rea-sonable rotes to Chicago, for the Eastern market, and to Cairo for the Southern. The larger yield on the when hads of Illinois over the high-priced lands in the Eastern and Middle States, is known to be much more than sufficient to pay the difference of transpor-tation to the Eastern market. Bituminous coal is mined at several points along

be Road, and is a cheap and desirable fact. It can be delivered at several points along the Road at \$1,50 to \$4,00 per ton : Wood can be had at the same rates to \$4.00 per ton : Wood can be had at the same rates per cord. Those who think of settling in Iowa or Minnesota, should bear in mind that lands there of any value, along the water courses and for many miles inland, have been disposed of,—that for those beated in the interior, there are no conveniences for transporting to market the produce, Railroads not having been intro-duced there. That to send the produce of these lands one or two hundred miles by wagon to market, would cost much more than the expense of cultivating them, and hence. Government lands thus situated, at \$1,25 per acre, are not so good investments as the

\$1,25 per acre, are not so good investments as the land of this company at the prices fixed. The same remarks hold good in relation to the lands in Kansa's and Nebraska, for although vacant lands

may be found nearer the water courses, the distance in you to market is far greater, and every hundred miles the produce of those lands are carried either in wagons, or interrupted water communications, increases the expenses of transportation, which must be borne by the settlers, in the reduced price of their products, and to that extent provide from the formers and to that extent precisely are the incomes from their farms, and of course on their investments, annu-ally and every year reduced. The great fertility of the lands now offered for sale

by this company, and their consequent yield over those of the Eastern and Middle States, is much more

than sufficient to pay the difference in the cost of transportation, especially in view of the facilities furnished by this Road, and others with which it conacces, the operations of which are not interrupted by the low water of summer, or the frost of winter.

PRICE AND TERMS OF PAYMENT.

PRICE AND TERMS OF PAYMENT. The price will vary from \$5 to \$25, necording to location, quality, etc. Contracts for Deeds may be made during the year 1856, stipulating the purchase momey to be paid in five annual installments. The first to become due in two years from the date of con-tract, and the others annually thereafter. The has payment will become due at the oud of the sixth year
