The sun goes down of Stockholm a little be-fore ten o'clock. There is a great illumination all night, the sun passes around the earth to-wards the north pole, the refraction of its rays is such that you may see to read at midnight. Dr. Baird read a letter in the forest near Stockholm at midnight, without artificial light. There is a mountain near Bothnia, where on the 21st of June, the sun does not go down at all. Travellers go there to see it. A steamhoat goes up from Stockholm for the purpose of carrying those who are curious to witness the phenomenon. It occurs only one night. Josoph Clowell, Allentown, Agent for Lohigh Co. YOUR attention is respectfully solicited to the above method of Roofing, now much used in Philadelphia and vicinity, and which has been exten-sively in use in many of the cities of the West, during more than eleven years past, during which time if has been tested under every variety of circumstances, and we confidently offer it to the public as a mode of Roofing unobjectionable in every important particular, while it combines, in a greater degree than any other roof in use, the valuable requisites of cheapness, du-rability, and security against both fire and water. This is rapidly superscaling the use of all other kinds of roofs, wherever it has been introduced, giving gen-eral satisfaction, and is highly recommended by all who have tested its utility. These roofs require an inclination of not more than one ion! to the foot, which is of great advantage in case of fire, and foot arbit less than any other roof in use, while the amount of material saved, which would otherwise be used in extending up the walls and framing for a steep roof, often makes a still farther important re-duction in the cost of building. Gutters may be formed of the same material as the roof, at much less expense than any other. In case of defect or injuey, from any cause, there is no roof so easily required. ## Book Printing.

Book-making is most actively pursued in the United States. Over three hundred publishers are busy supplying the mental wants of the public, and over three thousand booksellers are distributing the productions. Books have multiplied to such an extent in our country that it now takes 750 paper mills, and 2.000 engines are as hot as coal fire, some as sweet as honey, in constant operation, to supply the printers, some tasteless as long-drawn soda. ## Get Married!

Marry, let the risk be what it may-it gives dignity to your profession, it inspires confidence and commands respect. With a wife, the lawyers are more trusty, the doctor more esteemed, the mechanic throws the hammer with increased power, and shoves the plane with a more dexterous hand, the merchant gets a bigger credit-in short a man without a wife, is man at all !
