No. 9 West Hamilton street, Allentown, Pa.

B. LOCHMAN respectfully informs the citizens of Allentown and vicinity, that he is now prepared to take AMBROTYPES in connection with Daguerrootypes. His Ambrotypes are far superior to those of any other operator in town—however much may be talked of the "Patent! Ambrotype, to the contrary notwithstanding. The Ambrotype is a new and beautiful style of picture taken on glass, and unequalled by any other style. They are without the glare of the Daguerrootype, and therefore can be seen in any view. They can be seen on either side of the plate, are not reversed, and show everything in its true position. Their cost is but a trifle more than a daguerrootype, and they are indestructable to the action of the atmosphere, and cannot be injured by rubbing or washing. Both Ambrotypes and Daguerrootypes. No. 9 West Hamilton street, Allentown, Pa. sition. Their cost is but a trifle more than a daguer rectype, and they are indestructable to the action of the atmosphere, and cannot be injured by rubbing or washing. Both Ambrotypes and Daguerrectypes taken in an unsurpassed style without regard to weather. By long experience, arducus toil, a desire to please, and heavy investments of capital, he feels assured that any one who may favor him with a call will receive in return a perfect picture, not to be excelled, in point of artistic beauty, by any one in this section of country. He would also invite attention to his new and splendid stock of cases, which range in price from 75 cents to 10 dellars. Please bear in mind, that pictures can be taken in clear or range in price from 75 cents to 10 dollars. Please bear in mind, that pictures can be taken in clear or cloudy weather.

Economy in cultivating and great productiveness are the well known characteristics of Illinois lands. Trees are not required to be cut down, stumps grubbed, or stone picked off, as is generally the case in cultivating new land in the older States. The first crop of Indian corn, planted on the newly broken sud, usually repays the cost of plowing and fencing.

to \$4,00 per ton; Wood can be had at the same rates per cord.

Those who think of settling in Iown or Minnesota, should hear in mind that lands there of any value along the water courses and for many miles inland, have been disposed of,—that for those located in the interior, there are no conveniences for transporting to market the produce, Railroads not having been introduced there. That to send the produce of these lands may are too harden whiles by when to market, would ine and choice stock, not surpussed by any in town. It consists of Men's, Boys' and Youths' Panama, Palm Lenf, Leghorn, Canada, Marienibo, Michigan, &c.—A fine stock of Missos' Bloomers.

Our assertment of CAPS is one of the most extensive in the place, and are adding to it almost daily. Customers may rest assured that they can be suited, as the stock has been selected from the largest as-

duced there. That to send the produce of these lands one or two hundred miles by wagon to market, would cost much more than the expense of cultivating them, and hence, Government lands thus situated, at \$1,25 per acre, are not so good investments as the land of this company at the prices fixed.

The same remarks hold good in relation to the lands in Kansas and Nebraska, for although vacant lands may be found mearer the water courses, the distance to market is far greater, and every hundred miles the produce of those lands are carried either in wagons, interpretal water communications, increases the interrupted water communications, increases the

The great fertility of the lands now offered for sale by this company, and their consequent yield over those of the Eastern and Middle States, is much more than sufficient to pay the difference in the cost of transportation, especially in view of the facilities furnished by this Road, and others with which it connects, the operations of which are not interrupted by the low water of summer, or the frest of winter.

FOR ALL THE PURPOSES OF A

FAMILY PHYSIC.

THERE has long existed a public demand for an effective purgative pill which could be relied on as sure and perfectly safe in its operation. This has been prepared to neet that demand, and an extensive trial of its virtues has conclusively shown with sure and perfectly safe in its operation. This has been prepared to meet that demand, and an extensive trial of its virtues has conclusively shown with what success it accomplishes the purpose designed. It is easy to make a physical pill, but not easy to make the best of all pills—one which should have none of the objections, but all the advantages, of every other. This has been attempted here, and with what success we would respectfully submit to the public decision. It has been unfortunate for the patient hitherto that almost every purgative medicine is acrimonious and irritating to the bowels. This is not. Many of them produce so much griping pain and revulsion in the system as to more than counterbalance the good to be derived from them. These pills produce no irritation or pain, unless it arise from a previously existing obstruction or derangement in the bowels. Being purely vegetable, no harm can arise from their use in any quantity; but it is better that any medicine should be taken judiciously. Minute directions for their use in the several diseases to which they are applicable are given on the box. Among the complaints which have been speedily cured by them, we may mention Liver Complaint, in its various forms of Jaundire, Indigestion, Languor and Loss of Appetite, Listlessness, Irritability, Bilious Headache, Bilious Fever, Fever and Ague, Pain in the Side and Loins; for, in truth, all these are but the consequence of diseased action in the liver. As an aperient they afford prompt and sure relief in Costiveness, Piles, Colic, Dysentery, Humors, Serofula and Scurvy, Colds with soreness of the body, Ulcers and impurity of the blood; in short, any and every case where a purgative is required.

They have also produced some singularly successful cures in Rheumatism, Gout, Dropsy, Gravel, Erysipelas, Palpitation of the Heart, Pains in the Back, Stomach, and Side. They should be freely taken in the spring of the year, to purify the blood and prepare the system for the change of seasons. An occasional dose st

CONSUMPTION.

This remedy has won for itself such notoriety from its cures of every variety of pulmonary disease, that it is entirely unnecessary to recount the evidences of its virtues in any community where it has been employed. So wide is the field of its usefulness, and so numerous the cases of its cures, that almost every section of the country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs which are incident to our climate. And not only in formidable at tacks upon the lungs, but for the milder varieties of Colds, Coughs, Hoarseness, &c.; and for Children it is the pleasantest and safest medicine that can be obtained.

As it has long been in constant use throughout this section, we need not do more than assure the people its quality is kept up to the best that it ever has been, and that the genuine article is sold by—all the Druggists in Allentown, and by Druggists
