No. 9 West Hamilton street, Allentown, Pa. B. LOCHMAN respectfully informs the citizens of Allentown and vicinity, that he is now prepared to take AMBROTYPES in connection with ed to take AMBROTYPES in connection with Daguerrectypes. His Ambrotypes are far superior to those of any other operator in town—however much may be talked of the "Patent" Ambrotype, to the conrary notwithstanding. The Ambrotype is a new and beautiful style of picture taken on glass, and unequalled by any other style. They are without the glare of the Daguerrectype, and therefore can be seen in any view. They can be seen on either side of the plate, are not reversed, and show everything in its true position. Their cost is but a trife more than a daguersition. Their cost is but a trifle more than a daguer rectype, and they are indestructable to the action of the atmosphere, and cannot be injured by rubbing of rectype, and they are indestructable to the action of the atmosphere, and cannot be injured by rubbing or washing. Both Ambrotypes and Daguerrectypes taken in an unsurpassed style without regard to weather. By long experience, ardunus toil, a desire to please, and heavy investments of capital, he feels assured that any one who may favor him with a call will receive in return a perfect picture, not to be excelled, in point of artistic beauty, by any one in this section of country. He would also invite attention to his new and splendid stock of cases, which range in price from 75 cents to 10 dollars. Please boar in mind, that pictures can be taken in clear or cloudy weather. cloudy weather.

# New Spring and Summer Farm Lands for Sale. Another Lot of Cheap Goods.

The Illinois Central Railroad Company IS NOW PREPARED TO SELL

#### OVER TWO MILLION OF ACRES OF FARMING LANDS, In Tracts of 40 acres and upwards, on long Credits and at low rates of Interest.

THESE lands were granted by the Government, to aid in the construction of this Rollroad, and include some of the richest and most fertile Prairies in the State, interspersed here and there with magnificent groves of oak and other timber. The Road extends from Chicago, on the North-East, to Cairo at the South, and from those to Galeria and Purchith the South, and from thouce to Galena and Dunleith in the North-west extreme of the State, and as all the lands lie within lifteen miles on each side of this Road, porting the products of the lands to any of these points and from theuce to Eastern and Southern points and from thence to Eastern and Southern markets. Moreover, the rapid growth of flourishing towns and villages along the line, and the great in-crease in population by immigration, etc., afford a substantial and growing home-demand for farm 'pro-duce.

The soil is a dark, rich mould, from one to five fee in depth, is gently rolling and peculiarly fitted for grazing cattle and sheep, or the cultivation of wheat,

Indian corn, etc.

Economy in cultivating and great productiveness are the well known characteristics of Illinois lands. frees are not required to be cut down, stumps grubbed, or stone picked off, as is generally the case in cultivating new land in the older States. The first crop of Indian corn, planted on the newly broken sod,

usually repays the cost of plowing and fencing.

Wheat sown on the newly-turned sod is sure to yield very large profits. A man with a plow and two yoke of oxen will break one and a half to two acres per day. Contracts can be made for breaking, ready or corn or wheat, at from \$2 to 2,50 per acre judicious management, the land may be plowed and fenced the first, and under a high state of cultivation Corn, grain, cattle, etc., will be forwarded at rea-

Corn, grain, cattle, etc., will be forwarded at reasonable rates to Chiengo, for the Eastern market, and to Cairo for the Southern. The larger yield on the cheap lands of Illinois over the high-priced lands in the Eastern and Middle States, is known to be much more than sufficient to pay the difference of transportation to the Eastern market.

Bituminous coal is mined at several points along the Road, and is a cheap and desirable fuel. It can be delivered at several points along the Road at \$1,50 to \$4,00 per ton; Wood can be had at the same rates per cord.

per cord.

Those who think of settling in Iowa or Minnesots, should bear in mind that lands there of any value, should bear in mind that lands there of any value, along the water courses and for many miles inland, have been disposed of,—that for those located in the interior, there are no conveniences for transporting to market the produce, Railroads not having been introduced there. That to send the produce of these lands one or two hundred miles by wagen to market, would cost much more than the expense of cultivating them, and hence, Government lands thus situated, at \$1,25 per acre, are not so good investments as the land of this company at the prices fixed.

The same remarks hold good in relation to the lands in Kausas and Nebraska, for although vacant lands may be found nearer the water courses, the distance to market is far greater, and every hundred miles the

may be found nearer the water courses, the distance to market is far greater, and every hundred miles the produce of those lands are carried either in wagons, or interrupted water communications, increases the expenses of transportation, which must be borne by the settlers, in the reduced price of their products, and to that extent precisely are the incomes from their farms, and of course on their investments, annually and every year reduced.

The great furtility of the lands now offered for sale by this company, and their consequent yield ever

PRICE AND TERMS OF PAYMENT.

PRICE AND TERMS OF PAYMENT.

The price will vary from \$5 to \$25, according to location, quality, etc. Contracts for Deeds may be made during the year 1856, stipulating the purchase money to be paid in five annual installments. The first to become due in two years from the date of contract, and the others annually thereafter. The last payment will become due at the end of the sixth year from the date of the contract. Interest will be charged at only three per cent. pe

As a security to the performance of the contract the first two years' interest must be paid in advance, and it must be understood that at least one tenth of the land purchased shall yearly be brought under Twenty per cent, from the credit price will be do-

Twenty per cent. from the credit price will be deducted for cash. The Company's construction bonds will be received as cash.

Ready framed form buildings, which can be set up in a few days, can be obtained from responsible persons. They will be 12 feet by 20 feet, divided into one living and three bed-rooms, and will cost complete set up on ground chosen anywhere along the Road, \$150 in cash, exclusive of transportation. Larger buildings may be contracted for at proportionate rates. The Company will forward all the materials over their read premptly.

Special arrangements with dealers can be made to

Special arrangements with dealers can be made to supply those purchasing the Company's lands with foncing materials, agricultural tools, and an outfit of provisions in any quantity, at the lowest wholesale

It is believed that the price, long credit, and low rate of interest, charged for these lands, will enable a man with a few hundred dollars in each and ordinary in-dustry, to make himself independent before all the purchase money becomes due. In the mean time, the

purchase monoy becomes due. In the mean time, the rapid settlement of the country will probably have increased their value four or five fold. When required, an experienced person will accompany applicants, to give information and aid in selecting lands. Circulars, containing numerous instances of successful farming, signed by respectable and well-known farmers living in the neighborhood of the Railroad lands, throughout the State—also the cost of fencing, price of cattle, expense of harvesting, etc., by contract—or any other information—will be cheerfully given, on application, either personally or by letter, in

# FAMILY PHYSIC.

There has long existed a public demand for an effective purgative pill which could be relied on as sure and perfectly safe in its operation. This has been prepared to meet that demand, and an extensive trial of its virtues has conclusively shown with what success it accomplishes the purpose designed. It is easy to make a physical pill, but not easy to make the best of all pills—one which should have none of the objections, but all the advantages, of every other. This has been attempted here, and with what success we would respectfully submit to the public decision. It has been unfortunate for the patient hitherto that almost every purgative medicine is acrimonious and irritating to the bow-els. This is not. Many of them produce so much griping pain and revulsion in the system as to more than counterbalance the good to be derived from them. These pills produce no irritation or pain, unless it arise from a previously existing obstruction or derangement in the bowels. Being purely vegetable, no harm can arise from their use in any quantity; but it is better that any medicine should be taken judiciously. Minute directions for their use in the several diseases to which they are applicable are given, on the box. Among the complaints which have been speedily cured by them, we may mention Liver Complaint, in its various forms of Jaundice, Indigestion, Languor and Loss of Appetite, Listlessness, Irritability, Bilious Hendache, Bilious Fever, Fever and Ague, Pain in the Side and Loins; for, in truth, all these are but the consequence of diseased action in the liver. As an aperient they afford prompt and sure relief in Costiveness, Piles, Colic, Dysentery, Humors, Scrofula and Scurvy, Colds with soreness of the body, Ulcers and impurity of the blood; in short, any and every case where a purgative is required.

They have also produced some singularly successful cures in Rheumatism, Gout, Dropsy, Gravel, Erysipclus, Palpitation of the Heart, Pains in the Back, Stomach, and Side. They should be freely taken in the spring of

answer a better purpose than any thing which has hitherto been available to mankind. When their virtues are once known, the public will no longer doubt what remedy to employ when in need of a cathartic medicine. Being sugar-wrapped they are pleasant to take, and being purely vegetable, no harm can arise from their use in any quantity.

COUGHS, COLDS, HOARSENESS, BRONCHITIS, WHOOPING-COUGH, CROUP, ASTHMA, AND CONSUMPTION.

This remedy has won for itself such notoriety from its cures of every variety of pulmonary cleense, that it is entirely unnecessary to recount the evidences of its virtues in any community where it has been employed. So wide is the field of its usefulness, and so numerous the cases of its cures, that almost every section of the country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs which are incident to our climate. And not only in formidable at tacks upon the lungs, but for the milder varieties of COLDS, COUDHS, HOARSENESS, &c.; and for CHILDREN it is the pleasantest and safest medicine that can be obtained.

As it has long been in constant use throughout

As it has long been in constant use throughout this section, we need not do more than assure the people its quality is kept up to the best that it ever has been, and that the genuine article is sold by all the Druggists in Allentown, and by Druggists generally throughout the Country.
