The New Side-Door Party.

Mr Johnson, failing to defeat Gen. Hawin Connecticut, seems to have turned his attention to Pennsylvania and marked ton. Geary as a sacrifice to his pride and ambition. Fearing o endorse Mr. Clymer penty, he has inaugurated a new party-n ittle "sid -door" arrangement-hoping hereby to induce enough Republicans by bribes and threats to desert their principles and throw away their vetes on a third canlidate. Every intelligent Union voter of course knows that to vote for a third candilate is a vote against Geary and in lavor of llymer, the manifest purpose of the origient of Gen. Genry; but we incline to the or inion that they will fail in this, because

if Mr. Johnson's proselytes are true to themselves and to the new party, it will take in more copperhead voters than Republicans. William F. Johnston and Senator Cowan are the chief pillars of this new organization in Western Pennsylvania, where the movement seems to have originated, and neither of them possess the least personal or political influence. Both these every Republican in Lehigh county to aid worthics supported McClellan and Pendleton, in 1864. It is true Mr. Cowan did not canvass for the copperhead ticket, but he nevertheless lent what little influence he had to the copperhead party. Mr Wm. A better selection could not be made, because Tom. thinks the people of the North are traitors and the rebels all patriots and a wronged people. It is evident that his nomination was intended as a reward for his abuse of the Government and opposition to the soldiers on all occasions since the commencement of the rebellion, and his support of the contary for the punishment of crime or the men and measures of the Southern Contederacy. What part did he take in the crganiza ion of the tail end of the Rebel ardens, recommend to Congress to change the my in New York at the time the battle of Constitution so that it would recognize Gettysburg was being fought and the New York riots were in full progress?

THEN AND NOW-The old Democratic parts were in favor of elavery and free trade the latter for the reason that it kept the working men poor and nearer on a level with their property, and they could roint to the laboring men and tell their slaves they were better off than the poor whites. Now they advocate free trade in order to prove the truth of their old theory that agriculture or manufactories could not prosper unless they owned their laborers. By free trade they hope to cripple the resources of the country the better to enable them to use the laborer to accomplish their purpose in again getting possession of the Government.
