STRAWBERY JELLY .- Tako etrawberrie nen fully ripe, strain, and to each pint of ice add a pound of the best refined sugar oil briskly, skimming when necessary, for n or fifteen minutes, or until it will jelly, hich may be known by dropping a little in ld water. If done it will fall to the bottom

ntidote, for the bite of a maddog is said to a to allow the sommon nitrate of silver, easily curable, to fi ter into the wound. It de mposes the saliva, and in doing this deroys the virus. The nitrate dissolves in an qual quantity of water. If the bite is already enled, the cicatrix should be rubbed and esticated away entirely.

YORKSHIRE TEA CAKES.—Two pounds of our, a quarter of a pound of butter melted in tle milk, two eggs well beaten, a pinch o alt. Mix the whole together with a teacupful f good home made yeast, and enough milk to orm a dough. When light, knead it again, ut it in cakes, place them on tins, and when hey rise again bake them in a moderately hot n. A few dried currents are sometimes adled to the dough.

A CAUTION .- A correspondent of the Me. farmer writes that a neighbor of his a few sys ago applied kerosene oil to the yoke of a sluable pair of oxen to kill lice. Both of sem were soon after sick, and one of them led. On being opened the smell of oil was lite strong and doubitless caused big sick. lays ago applied kerosene oil to the yoke of a lied. On being opened the smell of oil was uite strong, and doubtless caused his sickness and death. [We once printed a receipt or curing hollow horn, so called, which was o pour about half a gill of turpentine in the follow of the head between the horns. A farnote who tried it told us it set the animal wild and she almost ran herself to death.—

FRECKLES are removed in a surprising short time, by a perfectly new process which proba-bly no one besides the writer is acquainted h. This process I have tried first on my own person, and the good effect obtained, war rants its general introduction into the toilet oms and "boudpirs" of the world. Here it e: Take powdered nitre (saltpetre.) any small quantity, and apply it to the parts af-fected, by the finger, moistened and dipped in the powder. This is the proceeding; when properly done and judiciously repeated, it will move all freckles from the face.

A HINT TO HAY-MAKERS .- It is well known by all hay makers, that the soles of boots and shoes, in the hot dry weather during haying. become smooth as glass, and full as uncertain for a foothold, as well as dangerous on the top of a load, or in according and descending the mows. Now, to remedy this evil, take the soles from a pair of cast off rubber shoes, and tack them to the bottom of your boots. It this bint is practised by hay makers, they will at all times know where to find their feet when they put them down.

To KEEP TIRES (N WHEELS -Hear what a practical man says on the subject: "I ironed a wagon one year ago for my own use, and before putting on the tires I filled the fellocs with linseed oil; and the tires have worn out and were never loose. I ironed a buggy for my own use several years ago, and the tires are now as tight as when put on My method are now as tight as when put on My method of filling the felloes with oil is as follows: I use a long cast-iron heater, made for the purpose. The cil is brought to a boiling heat, the wheel is placed on a stick, so as to hag in the oil each felloe, an hour for a common-sized felloe. The timber should be dry, as green timber will not take oil. Care should be taken that the oil be no hotter than a boiling heat, in order that the timber be not burnt. Timber filled with oil is not susceptible to water, and the timber is much more durable. I was amused some years ago, when I told the blockenith how the told the blockenith how the timber of the terminal the suscess of Spirits, Dimbers of Vision, hysteries, Pains in the Back and Limbs, lacksmith how to keep the tire tight on wheels, by his telling me that it was a profitable busss to tighten tires, and the wagon maker will say that it is profitable to him to make who supports the wheelwright and smith say?'

How to REMOVE STUMPS .- A correspondent to the Rural Register states that Mr. John Barnes, of Baltimore, removed a troublesome stump from near his house in the following

Last fall, with an inch augur, he bored a hole in the centre of the stump ten inches deep, and into it put about a half a pound of oil of vitriol, and corked the hole up tight .-This soring the whole stump and roots extend-ing through all their ramifications, were so rotten that they were easily eradicated."-If true, the above would be a cheap method of removing stumps. The sulphuric acid can be bought for about five cents per round.
