FARMER AND HOUSEKEEPER.

TO PREVENT CHAFING.—During the "hot term" persons of a full habit, who walk much, are inclined to chafe. This can be cured or prevented by the use, once or twice a day—at retiring and rising—of a solution of common alum in water. The alum may be dissolved in warm or cold water, but should be used cold, applied with a soft linen or cotton cloth to the parts affected. The proportions are a lump of alum large as a walnut to half a pint of water. If too strong, where the flesh is excoriated, weaken with cold water.

AN ITEM FOR THE LADIES.—J. L. Booth, of Rochester, N. Y., the inventor of the new steel capped rail for railroads, says: "Fold a wet towel or cloth a few times, placing the same on a table or in a pan, set the glass jar (cold) upon it, and pour in the hot fruit or liquid without fear, and if a jar can be broken in this way he would like to know it. If, perchance, one should break, it would be easier to give a philosophical reason for it than for it not breaking. As it is an intolerable pest to heat the jars prior to filling, the announcement will be thankfully received by all who are not aware of the fact." Mr. Booth offers to give $50 to the first person who will send him a satisfactory explanation, showing why the jar does not break under the above mentioned circumstances.

PRESERVING SEED CORN.—As the season is at hand for farmers to lay away their seed corn, we give the following suggestions from an old farmer in Wisconsin. As soon as the largest ears become hardened or glazed, though the stalk may be quite green and the husk on the ear somewhat green, select the largest and ripest ears, and on the same day divest the corn of all the husk, save as much as will suspend it. Braid the ears in bunches of ten or twelve and suspend them in some dry place, or if the atmosphere be damp, hang the bunches around the wall of the kitchen for three or four weeks at least. It may hang either in the kitchen or any dry, airy place, where neither damp nor rain will get to it, until planting time. All such seeds will grow in any land not flooded with water.—*Prairie Farmer.*

SELECTING A COW.—The Massachusetts *Ploughman* gives the following directions: "It is sometimes the case that the best judges will be deceived. A cow of very unpromising appearance, coarse in the neck, large boned, and second or third-rate milk marks generally, will now and then turn out to be first-rate, while another, with these marks largely developed, fine in the head and neck, and promising everyway, will prove unsatisfactory. But a failure in this case is rare. Let the head be light, the forehead broad, the horn rather thin and clear, the eye clear and prominent, the neck thin, and the forequarters rather light, the back straight, the hindquarters well-developed, wide over the loins, the carcass deep, the udder coming forward and well-shaped, the skin soft to the touch, the teats well set, not too large nor too small, the tail long and thin, like a whip lash. Such a cow ought to be a good one."

TO INSURE EGGS FOR WINTER.—If an old hen has been laying well all summer, and is late in moulting, she requires rest and time to recover from the moult; and if cold weather comes on her when but partly moulted, she will, perhaps, be a long time recovering the proper condition for laying. If, however, she is allowed to set late in summer so as to rest her from egg-laying, and during the time she is tending her brood she is encouraged to moult, by warmth and generous feeding, she will, when her moult is completed, soon get into a laying condition, and by good management, may often be kept laying all the winter, and lay better and larger eggs than pullets.—I give barley and oats mixed each day and have the run of a small field. To prevent their wanting to set, I regularly take up all the eggs so laid and never leave but two in a nest.—*Cor. London Field.*

LIFE--HEALTH--STRENGTH, LIFE--HEALTH--STRENGTH, LIFE--HEALTH--STRENGTH,

Hundreds and thousands annually die prematurely, when, if they would give the Great French Remedy.

DR. JUAN DELAMARRE'S

CELEBRATED SPECIFIC PILLS

Prepared by Faranciere & Dupont, No. 214 Rue Lombard, Paris, from the prescription of Dr. Juan Delamarre, Chief Physician of the Hospital du Nord ou Lariboisiere a fair trial, they would find immediate relief, and, in a short time, be fully restored to Health and Strength. It is used in the practice of many eminent French physicians, with uniform success, and highly recommended as the only positive and Specific Remedy for all persons suffering from General or Sexual Debility, all derangements of the Nervous Forces, Melancholy, Spermatorrhœa or Seminal Emissions, all Weaknesses arising from Sexual Excesses, or youthful indiscretions, Loss of Muscular Energy, Physical Prostration, Nervousness, Weak Spine, Lowness of Spirits, Dimness of Vision, Hysterics, Pains in the Back and Limbs, Impotency, &c.

No language can convey an adequate idea of the immediate and almost miraculous change it occasions to the debilitated and shattered system. In fact, it stands unrivalled as an unfailing cure of the maladies above mentioned.

Suffer no more, but use The Great French Remedy; it will effect a cure where all others fail, and although a powerful remedy, contains nothing hurtful to the most delicate constitution.

Pamphlets, containing full particulars and directions for using, in English, French, Spanish and German, accompany each box, and also sent free to any address when requested.

Price one dollar per box; six boxes for five dollars.

JACKSON'S WASHING COMPOUND!

THE undersigned wishes to announce to the public that he has taken the Agency of this valuable compound, and now offers FAMILY RIGHTS for sale. This Compound has, in many places almost universally come into use, resulting in a

Great Saving of Labor and Time,

and proving far less destructive to wearing apparel than the old mode of washing. By this method the

Finest Linens, Laces, Cambrics etc.,

can be readily and easily cleaned with very little trouble. No need of rubbing the skin off your hands and tearing the clothes to pieces. It will wash in hard and soft water. Clothes need boiling but a few minutes, and but very little if any rubbing with the hands; thus avoid their wear on the wash-board. It removes Paint, Grease, or stains of all kinds. It does not injure the color.

It is not only better than ordinary soap, but much cheaper. Give it a trial and you will use nothing else.

It positively will not injure the clothes, as many have given it a fair trial for several years, and it speaks for itself. The compound cannot be sharp when every pound of ingredients requires 50 gallons of water.

☞Persons who have used it desiring to act as sub-agents among their neighbors and friends, by making application to me will be authorized to do so, and receive a commission of 10 per cent.
