WHAT IS THE MAPTER?

Ever thice the election, the leaders of the De mocracy have been contriving some plan to re lieve themselves of the stigma of secession and traiter orship into which they led their party ng the rebellion. Some of them have suggested plans by which the to them much desired object could be obtained. They have reviewed the history of their deeds, and concluded that it would have been well for them had it never been written, and that they must start on some other tangent, than opposition to the immutable principles upon which our government is found-

In casting about for a sign of hope, though the stars did not fall in showers, a sign was giv en them. It was perched over one of the beautiful lakes that bound the northern line of our republic, and is called negro or universal suffrage. The Chicago Times, the most ably conducted journal in the interest of the modern democracy, seeing the handwriting on the wall, and, knowing that his or any other party that goes into a contest entirely on the defensive, is doom ed-has come out boldly in favor of not only adopting the constitutional amendments propos ed by Congress, but goes still further, and advocates universal suffrage, and argues that by the withdrawal of all opposition to the proper securing of the rights of the colored man and a decent respect for his interests, the democratic party can yet secure their sympathy, and be able to control a large majority of their votes. That the South must adopt it in order to maintain its power in Congress and the Electoral College, and will be wise in meeting what must come more than half way.

"The negro question out of the way," says the Times, the Democrats have once more a chance. Their resistance to impartial suffrage is only to pile up stupendous majorities against

We do not admit the correctness of this statement, but allege that it is their opposition to the principles of liberty and justice that has compelled them to take back seats. "The only votes made for the Democracy by

persecuting the colored man and denying hin his rights, are in such cities as New York." This is true; those and those only who have

lived from the labor of the negro, or helped to spend his carnings to secure the success of the Democratic party and continue his bondage, will persist in abusing, vilifying, and maltreating him. The agents of European manufactories who control New York, seeing a profitable trade swept from under them by the tariff and the freedom of the negro, will be compelled to seek some other mode of inducing Congress to support free trade for their benefit, than playing into the pockets of the slaveholders and aristo-

That the Democracy are preparing to demand the right of suffrage for the colored man is evident from the movements of their leaders in New York, who have lately visited the President, and, as is reported, endeavored to induce him to support the Constitutional amendment, doubtless paving the way for that masterly stroke of Policy. They are the proper party, as they have started every political question relating to the negro.

JURY COMMISSIONERS.

Some of our exchanges are again agitating ers, to be elected as Inspectors of election are now chosen, who shall have charge of the jury wheel, select the names of persons to serve as jury men, place them in the box, and draw every jury, leaving the Sheriff of the county to keep the key, as now provided by law, but prohibiting him from taking part in the selection of the names and the drawing. A law of this nature would remove the whole machinery of selecting and drawing juries from party politics, as it should be. Where the jury are all selected from one political party, there is always a chance for bias in the minds of persons having cases to be tried, which should not be allowed to exist. In most cases doubtless justice is done without regard to politics, but cases do occur every year that partake of a partizan character, and care should be taken to have juries so selected that there will be no chance for a partizan jury. We are in favor of such a law and would like to see it made a general law. It would not increase the expenses of the counties as the pay the commissioners now get, would pay the jury commissioners We might say some very hard things against Lohigh county grand juries, if so disposed, for it is a well known fact, especially among the members of the bar, that in not more than one term, out of the four, can bills of indictment be procured for certain offences. The same rule should also be applied to the election of associate judges." It would place both the jury and that portion of the judicary above suspicion of party bias, and beyond the reach of party machinery.

COPPERHEADS AND SECESSIONISTS .- The Southern people know no difference between & Iredell, at Norristown, has been changed to the word "Democrat," as applied to the Copperhead party, and "Secessionist;" they believe that the Copperheads of the North all agree with them on the question of State rights, secession, &c. How necessary, then, that the patriotic people of the North should be vigilant, and not allow the enemies of liberty, of the Constitution and the Union to triumph at any future election!

It is useless to say that the South has surrendered the right of secession; it is folly to talk of the solemnity of their promises to remain faithful to the Union in future. The same men who formally pledged themselves to abide the result of the war, over and over solemnly swore to support the Constitution, and preserve the Union, and made use of their official position to destroy both. Their words will not do hereafter, for they have falsified in the past. We want some security for the preservation of peace in the future. That we were once deceived is a fault of our adversaries; if fooled again we have ourselves, and no one clse, to blame.

Bitter experience forces the Union men of Maryland to the conviction at which their brethren of Louisiana arrived through a bloody test-that Impartial Suffrage is the only defense of the loyal, and the only cure of the Rebel, in the South. The issue, so long evaded and postponed, has ripened in Maryland through the heat of the contest won at the expense of those who fought to save the State which others attempted to destroy. They can pow well afford to set the justice of Impartial frage against the wrong of this bad mishap; we doubt if anything but defeat would have taught them, or any other large class of men in the South, the lesson. But it would be strange if the men of Maryland could not advance to the same views which even Judge Reagan of Texas, ex-Secre ary of the Confederacy, has had the sagacity to announce.

THE LARGEST

MANKSGIVING.

The President has appointed the 29th of Noremount as appointed the zeth of November as a day of Waterial thanksgiving.

He madone well by this act. The people, now have much to be thankful for We sam thank God that we have a Congress now, able, patriotic, firm and determined to prevent An. liew Johnson and Wm. H. Seward from making treason glorious and traitors grand. We can thank God that the next Congress will be composed of the same material, with a large addition to its strength as compared to the complexion of the present Congress. We can hank God that the people of the States which saved the country from rebellion, now clearly anderstand Andrew Johnson. We can thank God that the Democratic party is buried beyond the reach of plummet's sounding. And we can thank God that he has opened the eyes of the American people to a view and an appreciation of equal and exact justice. Andrew Johnson has done well to afford us the opportunity to render those thanks in a marked public manner. and when we can thank God for a riddiance of Andrew Johnson, we will be the most blessed

people on the face of the earth. The world moves and the Democratic party with it. By telegraph from St. Paul we learn that the chairman of the Democratic State Committee of Minnesota has published a letter advising the South to accept the Constiautional amendment. We patiently await the stial bridge. It consists of five spans, 18 feet action of The Age, and of Mr. Wallace, the wide in the clear, with side walks on both action of The Age, and of Mr. Wallace, the chairman of our Democratic State Committee. They will be a little backward at first, but they will take the dose.

SLATE. - There is a fine slate formation extending from the Delaware across North-ampton and Lehigh counties differing in idth at various points, now being worked t considerable extent. In Lehigh it commen es at Slatington about two miles south of the Blue Mountain, where are located the works of the Lehigh Slate Company who are manufacturing large quantities of Roofing and School slate and also marbleized mantels. Near Slaington are a number of quaries owned and worked by other Companies and individuals. The whole of the land on Trout Creek, or both sides of its hanks, is underlayed with slate, which is being worked at several points. David Laury has opened a very fine quarry. The old quarry of Henry Williams is one of the most productive yet opened At Labarsville, three miles from Slatington, are a number of quarries now being worked ome of them have been opened for a num ber of years, and the quality fully tested The vein extends across the townships of Washington, Heidleberg and Lynn, and had been opened and tested at a number of points years ago, but owing to the low price at which slate was then sold the business was inprofitable and many quarries were abanloned, but now the prospect of getting a Railroad, through that Region, the advance in the price and increased demand, have giv on an impetus to the business which makes i hid fair to become one of the best in the coun-

Poor Andy, will he not do to serve those who wish to rob the people and destroy the Government in order to get an office. He first proclaims that honorably discharged soldiers shall have the places of profit—then turns them out, and chooses men like Neiman, whose whole lives have been spent in scheming for office, place and spoils. was once a Democrat, but rather weak in the knees, so much, so that he went with Pierce and his aristocratic crew in their unjust and wicked crusade to force slavery into Kaneas. Then he followed that most pliant tool of incolerance-the old Public Functionary in all his trenchery and corruption in endeavoring to place this government irrevocably in the hands of slaveholding, would be lords of the cotton States, and when they lost their hold on power, and attempted by treason and murder, to overthrow the Government, and set up one of their own, he went with them, and during the whole of the rebellion was one of its most ardent, but cowardly supporters, rejoicing at every rebel victory. He is a very proper man for a Johnson appointee, having abused him most unmercifully from 1861 until atter the murder of the lamented Lincoln and rejoiced over the vote of Clymer in the Senate clusing the chamber of that body for him to speak in.

It is well for this country that we had President who compelled such men to take back seats, at a time when firmness, courage, natriotism and devotion to the country the time of need were required, but now Andy may reward them for their abuse of him and treachery to their country.

THE METEORIC SHOWER .- On Monday and Tuesday nights of last week, the people in this vicinity kept a look-out for the splen-did Meteorio display which had been announced as coming off about that time. Monday evening was bright and clear, but the watchers could see nothing unusual in the heavens, and determined not to let a scene of that character pass unobserved, continued their vigils through Tuesday night. Some report that a number of stars were seen to move from their accustomed places; but no grand movement was observed, and they retired to renew watch again on Wednesday night, but the wenther was unfavorable, the clouds were so thick that not a single star could be seen with the naked eye. The vision could not with the naked eye, ` penetrate the clouds with sufficient power to vitness the grand display.

At Washington on the morning of the 14th inst., a number of meteors were observed from the government naval observatory, and he number increased from 2 o'clock until four,"when the clouds obscured the view. In that time about 160 were seen.

By the cable we have advices from London and Greenwich. We learn, that during the evening of the 13th and the morning of the 14th insts., the weather was beautiful, and the shower of meteors was of great beauty, most of them appeared to be larger than stars of the first magnitude-bursting forth in splenlor, one breaking behind a cloud-flashed up like sheet lightening.
