W. DEH. REEDER. Allentown, March 9, 1869. HYDROPHOBIA .--- A French physician, named Buisson, claims to have discovered that hot baths

are a sure cure for hydrophobia. He says that having been himself bitten by a patient dying o the malady, he experienced on the ninth day ance from four friends, we can build up a paper afterward unmistakeable indications of its devel opment in his system, and resorted to a steam sphere of usefulness will be enlarged. Where we bath as a means of sulcide, to avoid a more fright re unable to get the news in any other way, we ful death. To his delight, hower, he found that are willing to pay for it. We ask this from the when the heat had risen to 138 degrees Fahren ung men. To their excitions the people look heit, the symptoms disappeared, and instead of r the power which will revolutionize the country dying he came out cured. Apropos of this sub-

politically ; and as they are the ones to be builted | ject, a correspondent of an exchange has furnished what he says is a compilation of medical authoritics, showing that there is no specific poison in the bite of an animal having hydroph

than in the bite of any other animal; that the valuable journal, Fernon's Register, for the followdisease is much rarer than it is supposed to be; that it is not the same in n-human being as it is in an animal; and that it spreads like an ordin

ary epidemie. Doubtless there is much exaggeration in the cases reported, and the danger fro the bite of a dog may be no greater than that from any other wound.

A SECRET IN PLUM RAISING .- A late write

A SECRET IN PLUM RAISING.—A late writer says that "the secret connected with raising is to plant plenty of trees, so as to give fruit to the cur-culo destroys the fruit on fifty trees we have only to plant iffy more in order to secure a bountiful supply for ourselves." This plan may answer very well in theory, but in practice we find that the more plums the more curcuillo, simply because the opportunities for propagation are increased in proportion to the quantity of fruit produced. Soil and elimate has far more influence in regulating the increase or decrease of this pest of the plum-orchard than the number of trees planted. There are a few localities where the curcuilo does not thrive, but plum-trees do, and the people living in these sections should take advantage of their cir-cumstances and grow plums extensively.—Hearth and Home. 126,217 2,258,635154,596 Producing \$41,179-61. "The affair was burled in the deepest mystery until hnauguration day of last week, March 4, when all the facts connected with Capt. Rehrer's alkap-pearance, were revealed to Mr. George W. Cole of Tamaqua, by the Captain himself. Mr. Cole, we night state, is well acquainted with Capt. Rehrer, Well, he was standing on a sidewalk in Washing-ton, looking at the line forming for the procession, when he observed a soldier in a detachment of the Marine Corps, wearing the chevron of a scrgeant. He recognized him at once as Rehrer. Impulsively Mr. Cole rushed to Rehrer, and much to the aston-lishment of the commissioned officer in command, and to Rehrer's own surprise, who denied that he

ishment of the commissioned officer in command, and to Rehrer's own surprise, who denied that he was himself, he siezed him by the collar for the purpose of dragging him to a private room in a hotei close by and having an explanation of his actions. The officer in command of the detach-ment soon understood from Mr. Cole the state of the case, and consented that Rehrer should accom-pany Mr. Cole to a private room. That having heen done, Rehrer confessed to Mr. Cole that the motive for his decamping in the mysterious man-ner he had done, was the fact that he wish heavily indebted to his futher, father-in-law and others, and that he saw no prospect of extricting himself from of millions a year, in the natural way and by immigrition, it may be as well to hint to the rising generation and new arrivals, (the old activers know all about it,) that Hos-rettrack's STOMACH BITTRES is the most whole-one and potent vegetable tonic ever manufactured; that it is a specific for debility, dy-pepsia, billionsness, and mias-matic fevers; that it prevents as well as eitners, these com-plaints and, their complications; that it is not ''bad to take,'' and is absolutely harmless; resigned.
