on the wharf in Philadelphia, \$390 currency. Works were then commenced in this Stat and New York, and no sooner had they begun operations than the English manufacturers canvassed our market to find buyers at \$130. Now, who was benefited by this ? We not only brought down the price of English rails, but developed the resources of our own country-gave employment to many hundreds of off. men and enriched our country. "These facts are known to Mr. Wells, yet he endeavors to persuade the country that a protective duty is always a tax on the consumer, and labors to induce Congress to reduce a duty which was at the rate of three cents to one and a half cent per pound, a change which he well knows would close all our Bessemer rail works and unterstitute and the sense of the stension. The proposi-tion f offer shows how it may be accomplished and unterstitute are statistic because of the stension without any practica-result cannot be forgotten. That debate certifie to the necessity of this extension. The proposi-tion f offer shows how it may be accomplished and unterstitute be accomplished and would close all our Bessemer rail works and restore to his English friends the monopoly of our market." The people of Lehigh county and the banks of new four per cent, bouds at the rate of one hundred dollars for eightly dollars of rate of one hundred dollars for eightly dollars of notes issued, would absorb six hundred and are directly interested in this question and in their name we thank Mr. Kelly for his able vindication. the iron interest is to Lehigh county and the necessity for its protection. He must know that Pennsylvania demands a tariff for protection, and we hope he will stand by Mr. Kelly and help to crush out the evil which

be allowed to obstruct its passage. A good provision is that requiring a "Mining Boss" o take charge of the interior arrangements of the mine, and to be responsible for faithfully carrying out the precautions necessary to ensure safety. The "Duplicate Shaft," however, is what specially demands our approval and we confidently expect that it will pass into a Such terrible disasters as that of Avondale surely do not need to be repeated to teach us prudence and humanity in our mining dis-

WE know of no more enterprising and liberal-publisher than Mr. George W. Childs, of the Philadelphia Ledger. His latest act of liberality and enterprise is the printing and distribution among his 80,000 subscribers of a handsome and very useful almanac for 1870. Most of the information it contains is of more Most of the information it contains is of more immediate concern to Philadelphians, but there is enough in it besides to make it valuable to his country patrons. Mr. Childs' liberality has been displayed in numerous ways: in the gift of a burial tot to the printers, in dinners to the craft and to his employees, in a free ex-cursion of his employees to Cape May, and in baseline without number. New discussion donations without number. Now, those who read the Ledger are presented with this very expensive publication free of cost. It is not at all surprising that a daily newspaper with such a gentleman at the head of it, should be one of the most profitable published in the en-

tire world.

A Bill, framed and designed for the pur-pose of effecting a reform in the present meth-od of conducting mining operations, is now before the State Legislature. Some portions of it may be readily improved, and doubtiess many of its provisions will be modified before it is passed. On the whole the bill is a good one, and as it affects the personal safety of a large portion of our fellow citizens, we hope it may receive the early and careful attention of their Representatives and that the influence be allowed to obstruct its passage. A good has suddenly acquired an infamous notoriety. Placed in a position of influence and enjoy. minister of the gospel, he has abused both and reaps the reward of a wrong doer. In another part of our issue will be found the particulars of the sad affair. We have no desire to call further attention to them excep as to one item, viz, his letter to the Tribune an excitement that bordered on madness; but

The focent French Route, which found such favor at three per cent, nominally, was uttered at prices varying from sixty-five to sixty-eight, so that one thousand millions of obligations represented six hundred and fifty or six hundred aud eighty mil-lions of money actually paid, making the anomal cost to the government more than five per cent. It would be easy to show how other governments have paid much more. Well may we yet a little longer yield to England, where wealth is so sur-passing, and to Switzerland, where economy takes the place of wealth. The time is at hand when the wealth of England and the economy of Switz-erland will be less commanding than the unques-tionable resources of our contry.

the weith of lengths and the construction of the unques-eriand will be less communifier than the unques-tionable resources of our country. One lumediate consequence of these measures would be the relief of the people from eighty to one hundred millions of taxation, while there would remain a surplus revenue of two millions a month applicable to the reduction of the debt, be-lag more than enough to liquidate the whole prior to the maturity of the new obligations, if it were thought advisable to complete the liquidation at so carly a day. The constry will breathe freer, business will be more elastic, life will be easier, as the assurance goes forth that no heavy taxation shall be con-tinued in order to pay the debt in eleven years, as b is now proposed, nor in fifteen years, nor in twen-ty years. By the present measures while retain-
