The answer, besides a general denial sets up as a counter claim that the plaintiff agreed to make him their sole agent in New York; that he spent much money in advertising for ther on this ground: that the plaintiffs violated their agreement, and even failed to deliver him on his orders first quality slate, but often put him off with second quality. The plaintiffs moved to strike out this answer, on strong afildavits, to the effect that the answer was untrue; that no such arrangement was made, and that so far from i the company had continually had difficulty in an ranging its payments for sales to the defendant The Court denied the motion, on the ground that it could not decide the case on affidavits.

Considerable excitement just now prevails it Lehighton, concerning the recent developmen of iron luterest there and the probable early cen tering of large improvements and heavy outlay of capital on account of it. The fact of the existence of iron in large quantities in that place is no no tion or freak of imagination. There has been thorough examination of the ground. The local ty is about two miles west of the town. On the surface le from two to three feet of paint of a ver million color. The iron, besides being found quite largely in some spots upon the surface, is found in quantities that cannot, of course, be estimated but surely indicated as almost exhaustless, at a depth of ten or twenty feet. An enterprising mer chant. Mr. Fredirici, who has given the subject much attention, states that the ore found is of good quality, yielding 60 to 75 per cent. He, with others, have a long lease upon the property, and are in carnest in the intention to go forward in developing the mine. They have already com menced clearing away earth for that purpose.
