The Lehigh Register.

ROBT. IREDELL, Jr., *Editor and Proprietor*

ALLENTOWN, PA., OCTOBER 12, 1870.

THE TAX QUESTION.

We are in receipt of a pamphlet of some sixty pages, entitled "Record of the action of the members of the House of Representatives during the Forty-first Congress. Compiled for the American Free Trade League by A. W. Nitsch." This record gives a list of Congressmen by States, and shows their action on the Tariff question. It divides the House as follows:—Protectionists 116, Moderate Protectionists 28; Free Traders 63; Waverers 14; Absentees 4. Total, 225.

The Pennsylvania Members are classed as:

Protectionists.—Randall O'Neill, Myers, Kelley, Townsend, Dickey, Cake, Mercur, Packer, Cessna, Morrell, Armstrong, Taylor, Scofield, Gilfillen, Covode, Negley, Phelps, Donley—Total 19.

Moderate Protectionists—*Stiles, Getz, Van Auken, Woodward*—Total 4.

Free Trader—*Haldeman*—1,

Democrats are printed in *Italics*.

THE ECONOMY OF THE GOVERNMENT.

Another proof of the economy practiced by the government in all its executive branches comes in the form of an official statement showing that while the receipts of the General Post Office have been over eleven per cent. increase over those of the last year of President Johnson's Administration, the increase in the expenditures for the mail service has been less than two per cent., notwithstanding this service has been largely extended in districts in the south which have always been a heavy tax on the department. The deficiency to be provided for is only $1,528,777. The Postal Department may never be made self-supporting, but the policy of the present Administration is bringing it nearer and nearer that condition, and Postmaster General Creswell is winning deserved honor. Secretary Boutwell recommends to all heads of departments that the estimates for the next fiscal year shall be as low as possible.

Germans recently returned from Paris say that the French Government and the better class of the people did not openly interfere with them, but from the day of the declaration of war they were insulted and persecuted by the mob, while the police professed to be powerless to protect them. At length they were summoned to the bureau of their respective "*arrondissements*," and the name of every man woman and child among them was recorded. They were then requested to become French citizens; the young men to serve in the army, and the old ones—and also the women and children—to work on the fortifications. They replied to the American Minister he counseled and he told them that he could not help them; that they must either fight against their country or leave France. They adopted the latter alternative; but when they reached the frontier the French officials attempted to compel the allegiance demanded, and many cases of this kind by main force they succeeded in are depriving their families of any other protection.

Paying off the national debt is something which there are very few in this nation, and it is, indeed, a most strange fact if such is the case. The agricultural interest of Pennsylvania is second to none, and the products of our farming districts are large, which is certainly sufficient evidence that our farmers are as equally industrious and enterprising as those of other States. Farmers and fruit growers have always been notable for their improving spirit, and are generally active in engaging in anything that they consider will improve their crops. Improvement naturally begets improvement, and great changes, in medical ones, can be made in any neighborhood by the guidance of such an organization as a farmers' club. Societies of this order are conducive of much profit, and every agricultural and fruit growing district should have one. Let all engaged in agricultural pursuits consider the value of such an institution, and let them start the movement in their locality for the establishment of one. Now is the season when the effort can be made without much loss of time. The farmers especially of Lehigh county should be energetic for the raising of a farmers' club, as they have many interests which could be materially developed, and which once brought forth, would prove advantageous to them financially and otherwise. Farmers of Lehigh county, let Excelsior be your motto until you raised a farmers' club to a permanent basis.

Boston, the hub of the universe, is again in luck. To her has it been definitely announced that the Crown Prince of Russia will visit this country next Spring, and will shed the light of his countenance upon the tri-mountaineers. He will be taken to see the State House, where the Governor will make a speech to him; there will be a dance in the Cradle of Liberty; there will be much visiting of prisons; and all the school children will sing "Jubilate" to his Imperial Highness. We know exactly what the speeches will be—we could write them all out pretty nearly verbatim at this very moment. After Boston has had its fill of these indescribable raptures, may our poor city have a peep at His wonderful Prince? Here, too, we are hospitable; and we believe that there is a little money left in the city Strong boxes.

Read, you grumblers against the extravagance of a Republican administration. On the first day of this month the National Debt was $14,196,773 less than it was one month before; it was $116,191,138 less than it was one year before; it was $175,929,641 on the first of March, 1869. This great reduction has been due to President Grant's Republican administration. And the good work is to go on, notwithstanding that sixty millions of taxes have been removed, for faithful collection of the revenues and careful economy in the expenses will still save money to reduce the principal and interest to the Public Debt.

Secretary Boutwell has stopped another leak of the public funds. A leak which at all previous times has been considerable. He has directed that all accounts for traveling expenses of Treasury officials hereafter certify that no free passes were used and that the amount demanded is only for actually necessary expenses. It is a nice thing for a government officer to make a long journey under orders and get a good mileage for the duty, though he travels on a pass and incurs no expenses of this new order of Mr. Boutwell's could only extend to every part of the executive branch of the Government, and also include Congressmen and Senators in its action, there would be a marked saving of the people's money.

Stephen Pearl Andrews, a professional philosopher of New York, has just enumerated for the benefit of a benighted world, the fundamental principles of "Universalogical Science." He affirms that the essence of being arises from Unism, Duism and Trinism. He proceeds further to state that the first of these unifies, the second differentiates, and the third "unites the Unism and Duism in hingewise (partly united and separated) complexity." Just so. We have always thought this was about the way of it, but never had sufficient time to inquire into it. We are confident, however, that this wonderful revelation will be satisfactory to our readers, and the rest of the world, and thank the philosopher for the discovery.

EDITORIAL NOTES.

It is emphatically contradicted by Admiral Porter that he asked Secretary Robeson to be relieved from the Navy Department.

The sum total of the French prisoners taken since the commencement of the Franco-Prussian war numbers 140,000.

The new internal Revenue law, which went into effect on the first day of the month, abolishes the necessity of stamps on receipts.

Late war despatches inform us that a severe outpost fight took place last Saturday upon Metz. It was terminated by the French being driven back with great loss.

The wires bring us the intelligence that the great freshet in Virginia is partly subsiding. The loss effected is at present difficult to calculate, but is estimated at one hundred thousand dollars.

The Industrial Exposition in Cincinnati is a great success. Ten to twelve thousand people visit it daily. A number of Pennsylvanians have goods on exhibition, which are said to have attracted attention for the fineness of manufacture.

The government has decided upon completing the system of storm signals by telegraph immediately. The late disastrous inundation in Virginia has caused this decision. Such a system will certainly avert many disasters which are the result of heavy storms.

That scourge, the yellow fever, is exerting its remorseless power upon Governor's Island, New York. The number of deaths daily have greatly increased within the past few days, and more determined efforts have been made to abate its virulence.

Election day is fast approaching, and every loyal Republican is urged to do his share in the work that is necessary to elect the men chosen by the party. With the combined effort of all, a triumphal victory will be the result.

Treasurer Spinner is preparing a circular to be addressed to banks and to bankers, calling upon them to send in all government greenbacks previous to 1869, and have them redeemed by issue of the series of 1869, as he desires to retire old issues, thereby facilitating trade and baffling counterfeiters.

Wurtemberg may be called one the largest fruit-growing countries in Europe. In very good and prosperous fruit years, as will happen once or oftener in every decennium, (1860, 1864, 1869,) the crop amounts to from three to four hundred weight of fruit for every head of our population.

With all the braggadocia which marks the utterances of individual members of the French Provisional Government, that government itself in its official declarations tones down its pride considerably, and acknowledges that it awaits and hopes for an armistice as the only means of extraction from its difficulties.

In the year 1851 the capacity of all the railroads in the United States was 5,000,000,000 tons, their value $750,000,000, and earnings for the year from freights $20,102,104. The earnings last year were $300,000,000, and the annual increase in tonnage 96,222,252 tons, valued at $600,000,000.

A fact for croakers. When General Grant became President of the United States, the greenback dollar was worth seventy-five cents. Now it is worth eighty eight and a half cents, making the entire volume of our currency worth nearly $160,000,000 more in the pockets of the people.

The Governors of Western and North-western States are about to issue a call for a convention of delegates from those States, to in force Congressional action for the full protection, under the laws of the United States, of all immigrants during their transit by sea and land. The Governors of Wisconsin and Minnesota are now at Milwaukee, arranging for the Convention.

The schools in Pennsylvania were never in a better condition than at present. Those who have the educational interests of the State in their care are untiring in their labors to improve the whole school system, and certainly merit commendation for their work. Many reforms, however, are needed, which would result beneficially to both teacher and scholar.

Complete census returns of the State of Delaware give a population of 125,050 souls in 1870 against 112,216 in 1860, an increase of 11.3 per cent. The population of the three counties in 1870 is as follows: New Castle, 63,523; Kent, 29,823; Sussex, 31,704. The increase upon the population of 1860 is for New Castle, 16; Kent 73, and Sussex 7 per cent.

German immigration to the United States has not, it seems, been materially checked, as it was greatly feared would prove the case. The arrivals at the port of New York for the week ending last Saturday were twice as great as for any week during the last two months, and the total arrivals for August last were only 1,886 less than for the corresponding period of last year.

General Garibaldi is free to succor France if he will, is an announcement that has been made, with what truth will soon be known. His release from confinement at Caprera is said to be due to the publication of the hero's complaint that Italy made a prison to him of his island. Victor Emanuel could not stand it to have the newspapers repeating this imputation against his treatment of the liberator of Italy, and he has released the hero.

After much controversy Bavaria and Wurtemberg have at last consented to become members of the German Confederation, and thus an important step toward the completion of German unity is taken. The threats and demonstrations of France have, strangely enough, hastened the union they were intended to prevent. This important connection will afford great satisfaction to the well-wishers of the German Confederation in America.

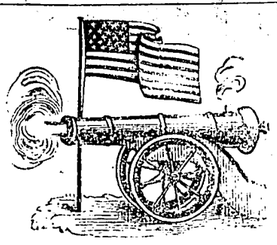
The Mutual Case Ball Club of New York has issued a challenge to all the clubs in the country to join in a base ball tournament for the championship. The initial game will open on the grounds at Williamsburgh, on October 17th. The club winning two out of three games will be declared the champion of America, and receive a gold ball and flag. Here is an opportunity for our Allentown clubs to exhibit themselves and win renown.

The connivance of the Chinese authorities with the diabolical outrages committed at Tien-Tsin is asserted in all the accounts that have so far reached us of that ghastly affair, and is a horrible comment on the mellifluous promises of the late Mr. Burlingame. The fact seems to be that if there was ever a real softening of the Chinese feeling towards foreigners it was only a temporary one, and the old spirit, stiffened by the isolation of centuries, has reasserted its sway.

German immigration to the United States has not, it seems, been materially checked, as it was greatly feared would prove the case. The arrivals at the port of New York for the week ending last Saturday were twice as great as for any week during the last two months, and the total arrivals for August last were only 1,886 less than for the corresponding period of last year.

Philadelphia has an institution called the "Fuel-saving Society." The idea of the society is to receive deposits during the summer from the industrious poor to be returned in coal during the winter. No deposits are received by charitable contributions and none from persons whose circumstances will enable them to purchase fuel in the season when there is plenty in the market, and no person shall be permitted to deposit with more than one of the receivers. Such an institution could be of great service in many of our interior cities.

It is stated that President Grant has originated and is about to inaugurate a new commercial policy of his own, with reference mainly to the South-American States, which it is expected will result in transferring to us the bulk of the trade and commerce of that country, and thus filling our shipyards and workshops with labor. It is promised that this new policy will place every branch of our National Industry in a prosperous condition. This ought to satisfy even the grumblers and croakers that our hero-President is looking to the prosperity and welfare of the country at large.



Election Yesterday.

Lehigh Has Done Better.

Glorious Republican Triumph.

Tremendous Gains Throughout the County.

Our Protectionists Redeem their Pledge.

In the city, the Republican Mayor is defeated by 110. Both branches of Councils are Republican, and seven Republican School Directors are elected. Throughout the county the Republican gains have been heavy.—Oliver's gain thus far is 1406, and if he is defeated it will be by a very small majority.—The only information we can get from Montgomery is that the returns are incomplete and that it is believed Acker has carried the county by a slight majority. Lehigh county has done nobly and her efforts should have been seconded by her sister county of Montgomery. Below we give the result as far as heard from:

	Oliver,	Acker,	Rep gain
Allentown, 1st Ward	118		26
" 2d "	69		74
" 3d "	92		39
" 4th "	153		103
" 5th "	24		140
" 6th "		65	60
Salisbury		34	131
North Whitehall		71	163
Catasauqua	199		5
Lynn		83	7

South Whitehall		68	63
Millerstown		40	11
Gains in the County			1406

Democrats before Election.

Democrats After Election.

The yellow fever has caused all communication between New York and Governors' Island to be suspended. The epidemic is still raging at that place fearfully.

Vice President Colfax, in a speech at Mishawaukee, Indiana, last evening, asserted that it was his positive intention to retire from political life at the end of the term for which he had been elected.

The contents of the New York female broker's journal may be very sensible, and calculated for the improvement of all womankind, defining her sphere, and all that, but for the life of us we cannot discover where the sense or interest is. We beg pardon, ladies, but then we are poor *men*, and may not understand such things.

Information from all sections of the country received by the Republican Congressional Committee at Washington, is to the effect that the Democrats will not gain nearly as many Congressmen in the next House as it was generally claimed two months ago they would. The advices are that as a general thing they are not making much headway in doubtful districts.

There will be no general order or pardon issued with regard to the release of the Fenians now imprisoned in Washington, because of violations of the neutrality laws. Whatever pardons are granted will be made out singly. The papers in several cases have been prepared at the Attorney General's office for the signature of the President.

The boarding of an American schooner in the West India waters by a French vessel has little significance for American merchants, but much for our German friends engaged in the trade with the islands. It is the first indication of the activity of the French in those waters, where the Germans have a large trade and where their ships are comparatively helpless.

The plate of the higher denominations of the new funding bonds will be completed in a few days, when, it is announced, "a small number of the bonds will be printed for disposal to those who desire to invest in them." Secretary Boutwell does not expect to do much in marketing them for some months to come, and he regrets the ommission of the compulsary clause from the funding bill.

Virginia is again appealing to the charity of the North. This particularly unfortunate State has again been visited by a calamity as terrible in its effects as any of its predecessors. A mighty flood, whose ravages are hardly yet ended, has swept over the State, destroying the property and lives of its people. Although no movement has yet been inaugurated in the East for the purpose of extending aid to the sufferers, it is only fair to presume that it will not be long delayed.

The ex-blockade runner and Cuban privateer Hornet has again been seized at New York on the ground that she intended to carry an armed expedition to Cuba in violation of the neutrality laws. The case will be brought before the United States District Court on the 25th instant. As this craft has several times eluded the vigilance of the United States government, and made Cuba her point of destination, some measures should be created for their discontinuance.

A circular issued by a joint committee of the Cotton States Mechanics' and Agricultural Fair Association and Augusta Board of Trade proposes to southren agriculturalists the formation of a central organization or "agricultural congress," for the advancement of their interests, including the improvement of the labor system, the encouragement of foreign immigration, and the deversification of the agricultural products of the South. The initiatory meeting of this general association is appointed at Augusta, Georgia, October 26, 1870, during the fair of the Cotton States Mechanics' and Agricultural Fair Association. State and county agricultural societies are invited to send delegates, and arrangements have been made with railroads to transport these delegates free of charge, or at reduced rates.

The Washington correspondents of the leading dailies are very excited just now in regard to impending cabinet changes. A few days ago they were "dead sure" that Hiram Walbridge, of New York, would shortly succeed Mr. Fish at the State Department, and now they are equally certain that Mr. Walbridge was never thought of by the President for a Cabinet office. The latest report which we see in the Washington gossip about Mr. Fish's successor is that it will be Wayne McVeigh, who is now on his way to Constantinople to act as United States Minister to Turkey. This report is good until contradicted, but it will not be long before these sharp-eyed fellows at Washington will find out that Mr. McVeigh is not the man at all, and then they will tell us about somebody else. All this makes business for the telegraph companies and gives the people, like the ancient Athenians, "some new thing" to talk and speculate about.

SPIRIT OF THE PRESS.

The successful issue of the great engineering project of De Lesseps seems to have awakened some degree of energy in our own country. A surveying expedition will be sent to the Isthmus of Tehuantepec to institute the preliminary surveys with a view to the building of a canal connecting the Gulf of Mexico and the Pacific. This Isthmus offers peculiar inducements to the work, although the labor of building the projected canal cannot but be much greater than would be required if the Nicaragua route were taken. In the latter the actual distance by land is by far shorter although the other obstacles are equally as great as in the Mexican route.

But, notwithstanding this, the Tehuantepec route has the crowning advantage of being in a country which will gladly furnish every facility for the prosecution of the work, and which is bound to allow the United States unlimited control of the canal when completed. Meanwhile, till the plan ripens into execution, the mariner sailing from the Atlantic to the Pacific seaboard must double the terrible capes, and worst of all, in doing so lose time as valuable as gold.—*Phila. Press.*

The announcement that no prisoners will be taken before Paris is very serious, and concerns not only the combatants, but all humanity. The ordinary horrors of war are unavoidable, but the raising of the black flag is an outrage upon our civilizations. War has its rules and restraints, and the killing of woundedmen ought to be regarded as disgraceful as the firing upon a flag of truce or a hospital signal. Surprises and artifices are justifiable, but cold-blooded murder of defenceless, wounded soldiers is a cruelty that ought to be instantly rejected with horror by all nations who aim at being something better than barbarians.—*Philadelphia Post.*

The Russian Government is at much pains to announce that it intends to maintain its neutrality between Prussia and France, and adds significantly enough that "a Turkish war "would have no connection with the present "conflict." The papers clamor for the abrogation of the Paris treaty which protects Turkey, and Russia is clearly as eager for the invasion of that country as the French were three months ago to overrun Germany. In spite of England—indeed, in contempt of her—Russia's determination to renew the old issues with Turkey seems fixed.—*New York Tribune.*

The Solar Eclipse.—Professors Wm. Harkness, Asaph Hall and John R. Eastman, of the Naval Observatory in this city, will sail from New York on the Cunard steamer China on the 2d of November for Liverpool, and thence to Malta by the Peninsular and Oriental line of steamers, and then to Syracuse, Sicily, where they will make observations of the total eclipse of the sun, which occurs on the 22d of December, between 12.30 and 3.30 P. M., and is visible in the Mediterranean Sea and the northern part of Africa. The party will be in the charge of Professor Harkness, and will take out a complete set of instruments.

Their observations will be on the time of apparent contact of the sun and moon, the physical constitution of the corona, observations with the spectroscope, and polariscope, and photometrical, magnetic, and meteorological observations etc. The time of totality will be about 2 P. M., and should the day be clear it is expected that a number of valuable observations will be made. The party on their way home will visit the principal European observatories to examine their methods with a view to adopting anything which may be found superior to our own.

Professor Simon Newcomb with another party will also sail about the same time for Gibralter, or the northern part of Africa, to make observations of the eclipse in that locality.—*Washington Star.*

Consumption, Bronchitis, Laryngitis, Cough, Hoarseness, and all diseases of the Throat and Lungs, readily relieved by the magical and healing influence of Briggs' Throat and Lung Healer. Sold by Druggists.

Catarrh, Headache, Neuralgia, &c.—How few there are who have not suffered with at least one of the above distressing diseases. How few there are that have ever yet found anything that would relieve—not to mention cure—those painful afflictions. Briggs' Allevanter is a *home-hole* remedy for each and every one of these prevalent complaints. It not only relieves instantly, but radically cures every case, when used according to directions. The astonishing success of Dr. Brigg's Allevanter as a family medicine, is an established fact. To try it is to become convinced. Sold by all Druggists at $1, each bottle making two quarts when diluted for use.

Scattered Nerves.—Briggs' Allevanter has absolute control over all Nervous Diseases. Sold by John B. Moser, Joseph Stoffel, Lewis Schmidt & Co., Lawall & Martin, and Druggist everywhere.

Corns, Bunions, Ingrowing Nails, &c.—Still another triumph in the medical art! Thousands offer their congratulations to Dr. Briggs for the astonishing success of his Allevilator and Curalliver in the speedy relief and cure of Corns, Bunions, and all diseases of the feet, no matter how severe or aggravated the case may be. The application of these great remedial agents instantly soothes the most distressing cases and rapidly effects a cure. Sold by Druggists. By mail, 40 cents each.

Dr. J. Briggs & Co., Newark, N. J.

The experience of medical men is that the physician who treats special diseases has better success than those in general practice. It is a fact we do not dispute that some deaths will occur under the most skilful treatment, but from the general experience of the profession we learn that practice and give their attention to a particular branch of the profession. The treatment of diseases of females is a branch of the medical profession that I have given special attention to for several years, and would say to ladies suffering from weakness, falling of the womb, chronic or acute inflammation of that organ, to suffer no longer. My office hours are from nine to ten morning till eight o'clock in the evening.

Dr. W. A. HASSLER,
Chew St., bet. 5th and 6th, Allentown.

Cancers, Tumors and Swellings of all kinds warranted cured without using the knife, giving pain or drawing blood. See testimonials.

This is to certify that I had been troubled for about three years with a swelling or tumor on the large finger of my right hand, which had been pronounced incurable time without any benefit, after which the tumor commenced to grow and enlarge very fast. I consulted Dr. H. D. Longaker, and went under his treatment, by which the tumor was removed without using the knife or drawing blood, and causing me but little inconvenience while under treatment.

I can from my own experience recommend Dr. Longaker's treatment to all persons having tumors, cancers, tumors, cancers or any old or chronic diseases, with the assurance that in my case it has been successful in curing a very painful operation having failed to cure it. He gave perfect satisfaction and effected a cure in a very short time. THOMAS P. BITZ.

Hokendauqua, Lehigh Co., Pa.

Dr. H. D. Longaker's office is on the East side of Sixth street, between Hamilton and Walnut, Allentown.

Special Notices.

☞ WORDS OF WISDOM FOR YOUNG MEN, on the Rail-y Passion in Youth and Early Manhood, with SELF HELP for the erring and unfortunate sent in sealed letter envelopes, free of charge. Address, HOWARD ASSOCIATION, Box P, Philadelphia, Pa. May 10-1y

PAIN KILLER
PERRY DAVIS & SON PROVIDENCE, R.I.
1840 1870

This celebrated medicine has won a deservedly high reputation as an alleviator of pain and a preserver of health. It has become a household remedy, from the fact that it gives immediate and permanent relief. It is a purely vegetable preparation, made from the best and purest of materials, and is to be depended on in every family. It is recommended by physicians and persons of all classes, and to-day, after a public trial of thirty years—the average life of nostrums—stands unrivaled and unexcelled, spreading its usefulness over the wide world. Its strengthening and curative properties are widely known. Its enduring fame. We do not deem it necessary to say much in its favor as one small bottle will do more to convince you of its efficacy than all the praise we could bestow. Give it one fair trial and you would not be without it for ten times its cost.

Directions accompany each bottle.

Sold by all Druggists.

Price 25 cts., 50 cts., and $1 per bottle.

☞ TO CONSUMPTIVES.—The advertiser having been restored to health in a few weeks, by a very simple remedy, after having suffered several years with a severe lung affection, and that dread disease, Consumption, is anxious to make known to his fellow-sufferers the means of cure. To all who desire it, he will send a copy of the prescription used (free of charge), with the directions for preparing and using the same, which they will find a sure cure for Consumption, Asthma, Bronchitis, &c. The only object of the advertiser in sending the Prescription is to benefit those who are in need of the information which he conceives to be invaluable; and he hopes every sufferer will try his remedy, as it will cost them nothing and may prove a blessing.

Parties wishing the prescription will please address,

Rev. EDWARD A. WILSON,
Williamsburg, Kings Co., N. Y.

☞ HOW TO CURE CONSUMPTION.

THE PHILOSOPHY OF DR. SCHENCK'S GREAT MEDICINES.—Will people never learn to know that a diseased liver and stomach surely disease the entire system? The plainest Principles of common sense teach this, and yet there are hundreds who ridicule the idea, and continue in the course which almost inevitably brings them prematurely to the grave. Living as the majority of people do, a state of positive variance with the laws of nature, it must be apparent to all that, sooner or later, nature will revenge herself. Hence we find that persons who indulge in excesses in the use of very rich or indigestible food or intoxicating drinks, invariably pay a heavy penalty in the end. The stomach becomes disordered and refuses to act; the liver fails to perform its functions, dyspepsia and attendant evils follow, and still the suffering individual persists in clinging to the time-worn and completely exploded ideas of the past. Dr. SCHENCK'S medicines are recommended to the sick and afflicted because they are certain to cure if they are used as directed, and all that is necessary to establish their reputation with every afflicted man or woman in the land is a fair and impartial trial. Let those who are skeptical on this point, and who have permitted their systems to become poisoned from the use of worthless and celebrated remedies for Consumption, discard their prejudices, and be governed by the principles of reason and common sense. If the cough is dry and hacking, and you feel it in the cases out of ten the seat of the disorder will be found in the stomach and liver, and a certain remedy should be taken to tone the stomach and to stimulate the liver to healthy action, use

SCHENCK'S MANDRAKE PILLS.—The daily increasing demand for these pills is the best evidence of their value. Thousands upon thousands of boxes are sold daily. Why? Simply because they act promptly and effectually. Invalids who may not find it convenient to call on Dr. Schenck in person are informed that full and complete directions for use accompany each package of the

MANDRAKE PILLS, PULMONIC SYRUP and SEAWEED TONIC.—These medicines will cure consumption unless the lungs are so far gone that the patient is entirely beyond the reach of medical relief.

If may be asked by those who are not familiar with the virtues of these great remedies "How does Dr. SCHENCK'S medicines effect their wonderful cures of consumption?"

The answer is a simple one. They begin their work of cure by arousing the stomach, liver and bowels into an active healthy condition. It is food that enriches for nidable disease. SCHENCK'S MANDRAKE PILLS act on the liver and stomach, promoting healthy secretion, and removing the bile and other matters which have resulted from the imperfect digestion of the food, and the derangement of the system generally. The sluggish state of the body and the consequent accumulation of the unhealthy substances named prevents the proper digestion of food, and, as a natural consequence creates disease, which results in prostration and finally in death.

SCHENCK'S PULMONIC SYRUP and SEAWEED TONIC when taken regularly, mingle with the food, aid the digestive organs, make good rich blood, and as a natural consequence, give flesh and strength to the patient. Let the family say what they will, this is the only true cure for consumption. Experience has proved it beyond the shadow of a doubt, and those who are to-day alive and well who a few years since were regarded as hopeless cases, it who were induced to try Dr. SCHENCK'S remedies, and were restored to permanent health by their use.

One of the first steps the physician should take with a consumptive patient is to regenerate the system. Now how is the to be done? Certainly not by giving medicines that exhaust and enervate—medicines that impair instead of improve the functions of the digestive organs. Doctor SCHENCK'S medicines cleanse the stomach and bowels of all substances which are calculated to irritate or weaken them. They create an appetite—promote healthful digestion—make good blood, and, as a consequence, they invigorate and develop the entire system, and more especially those parts which are diseased. If this cannot be done, then the case must be regarded as a hopeless one.

If the physician finds it impossible to make a PATIENT FEEL HUNGRY, if the diseased person cannot partake of good nourishing food and properly digest it, it is impossible that he can gain in flesh and strength; and it is equally impossible to bring a patient to this condition so long as the liver is burdened with diseased bile, and the stomach laden with unhealthy slime.

Almost the first request made to the physician by a consumptive patient is that new and powerful medicines that will remove or allay the cough, night sweats and chills, which are the sure attendants on consumption. But this should not be done, as the cough is only an effort of nature to relieve itself, and the night sweats and chills are caused by the diseased lungs. The proper and ultimately successful mode is to gain the blood, and ultimately prescribe for the stomach, impede healthy digestion, and generate that fearful fever, a hectic flush.

There is, after all, nothing like facts with which to substantiate positive claims, and in this we feel safe in saying that the cures effected by Dr. SCHENCK'S medicines are unparalleled. Nearly all who have taken his medicines in accordance with his directions have not only been cured of consumption, but, from the fact that these medicines act with wonderful power upon the digestive organs, patients thus cured speedily gain flesh. Cleansing the system of all impurities, they lay the foundation for a solid, substantial structure. Restoring these organs to health, they create an appetite. The food is properly assimilated into quantity of blood is not only increased, but is made rich and strong and in the face of such a condition of the system all disease must be banished.

Full directions accompany each of the medicines, so that it is not absolutely necessary that patients should see Dr. SCHENCK personally, unless they desire to have their lungs examined. For this purpose he is at his principal office, No. 15 North Sixth St., corner of Commerce, Philadelphia, every Saturday, from 9 A. M. until 1 P. M. Advice is given without charge, but for a thorough examination with the spirometer the charge is $5.

Dr. Schenck's Pulmonic Syrup and Seaweed Tonic each, $1 50 per bottle, or $7 50 a half dozen. Mandrake Pills 25 cents a box. For sale by all druggists.
