A Lehigh Countian in Kansas. JEWELL CITY, KANSAS, May 14. Our party left Coopersburg on the 17th of April, and arrived at Topeka on the 21st, where we left the train and filling our haversack, with proviroot for Jewell City. The object of my trip was to take up my residence in this section. The first and I inspected was held by the Railroad Com ouny and by speculators, and sells at from \$3 to \$150 per acre. The three dollar land is without imber and water, and is bluffy. The highest priced land is of the very best, well timbered me stone and fair improvements, and the soil fiv to eight feet deep. My purse was too slim to pur Reservation which is nearly all in the hands of peculators. Here I became disgusted with the Vest and determined, after visiting my friend Dr. G. S. Christ in Jewell City, to return home to ennsylvania. Emigrants should not stop short of Jewell county. From this point Westward 1 met with land which is worth talking about, good soll, six to eight teet deep, with gravel below, no wamp and no hard pan, nothing .o produce fever and ague. Noll and I took claims in Osborn county, about fifteen miles above the forks of Solomon River, on a branch called Twin Creek, which con about five miles north-west of our claims, com osed of Pennsylvanians, from Berks and Las caster counties, numbering about forty active, go shead men. I spent one day with them. They were working as busy as bees, ploughing, sowing etc. They have built a stockade and after plant ing is over will erect dwellings. Their leading nen are Col. W. L. Bear, president ; Major H. D furkley, treasurer, and Dr. J. P. Moore, secretary. They have the best land, with which the beau iful farm land of Lebigb, Berks and Lancaster would be nowhere in comparison. It is true it is acked down by the tramping of millions of buffalo, but when these are driven westward the bare ground becomes green with the verdure of prairie grass, and after cultivation enables it to absorb ne rains of heaven will be the garden spot of the world. Timber is not plentiful, though sufficient for building purposes and the coal deposits will furnish us with the fuel. The cause of the scar city of timber is the yearly recurring fires which weep the prairie. For fences we can use hodges

In the last census Osborn county had thirty-three en. Two claims were taken up before ours in the same township, but you cannot imagine how many thousands are emigrating to this State. I stayed with a man about one hundred miles east rom here who came to this State but a few years ago. He had but five dollars then, now he has a farm which he can sell for \$6,000 any day, and, besides, it is well stocked. But roast duck will not come on a man's table of its own accord and work and good management are required to insure prosperity. There are hundreds of men who, if they came West and worked like they do East would soon become independent. The prices of stock is pretty steep on the frontier. A good yoke is worth from \$125 to \$195; horses \$250 to \$400; cattle from \$8 to \$50 according to age. Flour sells for \$4.50 a hundred and other provisions in proportion. One hundred nlies further east you can buy much cheaper. This seems to me one of the best 'ocutions for

stock raising I over saw. A man with a little capital could coin money.

The Indian troubles are of no account and are brought on by the white settlers, who fire on every red skin they see. As Noil and I were on our way back to the land office a settler who was driving along took us for Indians. He turned his team and fled precipitately, and returned with ten or twelve other settlers, but was surprised to find us not set. He afterwards said that if he had had capital could coin money.

About a hundred young men have been more ammunition be would have fired upon us. HORSEMEN, ATTENTION:
