REPUBLICAN STATE TICKET. FOR AUDITOR GENERAL: COL. DAVID STANTON. POR SURVEYOR GENERAL: COL. ROBERT B. BEATH.

THE colossal bronze statue of Mr. Lincoln, ordered by the Lincoln Monumental Associa tion of Philadelphia, which arrived in that eity early last month, will be erected in Fairount Park and dedicated on the anniversary of the preliminary Emancipation Proclamation, in September next. Its whole cost has been about \$30,000, contributed by citizens.

ATTORNEY-GENERAL Leavitt of Mississippi, a native of the South, testifying before the Congress Committee on Ku-Klux, expressed his opinion that the existence of the Ku-Klux would be as apparent in the next election as in 1868 and 1869. The Tribune has already shown how Forty Thousand Republican voters abandoned the polls at the last Presidential election. And now we have due warning that the programme of 1868 is to be repeated in 1872.

Ir the friends of Temperance in Pennsylvania intend to weaken their cause they have only to nominate an independent Temperance State Ticket and they will accomplish their Tapose without the slightest difficulty. As the case now stands they have supporters in either party, but once in the field seeking to draw votes to their candidates they will arouse the active opposition of those who favor temperance but have sense enough to know that holler cause than temperance, the prosperiy and stability of our country, is at stake in the present campaign.

A PRENCH inventor proposes the use of etroleum for locomotives, and recently exhibited a model of a small engine heated by alight. This engine consumes its own smoke apparatus. A larger locomotive, with slight revements, has since been built, and successful trials made of its working qualities. The comsumption of oil was thirty-five per of oil producing twenty-five pounds.

With such a ticket, it claims, principles may be thrown to the dogs: the new dodge will combine the support of all the leaders of the various factions and the rank and file will be sure to tumble in. The less said about principles, too, the better, and with Chase and Hancock for President and Vice President, it thinks Republicans will rally around their flag as well as Democrats. The Herald is a "wild Irish man.'

THE Maryland Democrats have nominated William P. Whyte for Governor. He has twice been an unsuccessful congressional candidate, and was in the United States Senate for a short time after Reverdy Johnson was appointed United States Minister to England. The Convention which nominated Mr. Whyte did not adopt any platform or commit itself either in favor of or in opposition to the "New Departure" policy of the Vallandigham wing of the party. One of the speakers at this convention, however, took strong ground against "the new doctrine sought to be foisted upon us and the new ideas that white men are not competent to govern," and he endeavored to impress upon his fellow delegates the importance of standing upon "the principles of the old Democracy." and the fact that his remarks were received public way, and as they have nominated their candidates without any platform they can parture" idea is not very warmly received at regular appropriations and hamper the action he South, and it is very evident that the of the Government. Democratic party as a whole will never adopt that idea as a part of its national policy and platform without a hard fight.

Rumons have been published extensively Treasury Department had proved to be a failure and that the new five per cent. loan had seen no official corroboration of this statement and hope that the project will not be aban doned. The expense attending the sale of the loan is complained of, but the subscriptions already amount to \$60,000,000, which produce an annual saving of \$600,000 to the Government. The war in Europe, which has drawntaken more freely, and at home we have a class which always has more regard for popu lar applause than for the interests of the people and of the government, and which has the known settled policy of the government and that our debt was to be reduced annually at the rate of \$100,000,000 per year, our credit would be increased and the loan would find well that there are, for the larger the list of well that there are, for the larger the list of well that there are, for the larger the list of well that there are, for the larger the list of well that there are, for the larger the list of those figures were correct. There was a most absurd attempt to imitate the Prussian style of marching, which naturally, like most attempts at imitation, failed conspicuously. Any of your readers who has ever seen Prussian troops on the march will be sure to remember that they have a peculiar swing of the left arm. Now this swing of the arm, when uniform in a body of troops, as it is among the Prussians, adds greatly to give that machine-like appearance to the soldiers on which Kaiser. William is known so greatly to pride himself. But, when each man swings his arm independently of his comrade, such a proceeding by no means contributes to the soldierly appearance of a regiment. something startling in the occurrence of a quick succession of crimes which bear a resemblance to one another, either in the motive or the mode of their commission. Only a few days ago it seemed as if murder following upon illicit intercourse between the sexes was becoming epidemic. To day a mania for poisoning appears to be the fushionable form of crime, of which the Sherman case in Connec ticut, the Ruth case in Kansas, the Wharton case in Baltimore, and one or two others that | . have recently come to light, are the most conspicuous examples. In reality, there is no cause for surprise in this concurrence of simcommanded a Division long before he had a son are offenses which experience shows to be was a reward of true merit. Dr. H. D. Longaker offices his services to the silicated more especially to those suffering from Chronic Diseases. He will be glad to see and talk with them. It is his practice to plainly declare a disease incurable if he believes into the so. In those cases which he undertakes crotton and the application of experienced skill, ratined by many years of practice in tealing disease in its various and most malignant form. That his skill has not been exerted in vain, numerous certificates, that may be seen at his office, will testify. A few numerates celected for publication, which are shown to efficient of this but they are published rather as an evidence that many who have deemed themselves hopelessly sflitted have by a proper application of the resources of medical science, heen restored to health and the cujoyment of all its blessings. ings :-Mrs. Ellus Weggant, Johnson Corners P.
