TO COACHMAKERS. CUSTER'S PATENT CARRIAGE GEARING!

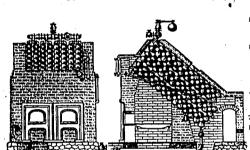

This mode of gearing is far superior to any yet invented for beauty, simplicity and durability, and does not require a genius to attach it to any khad of spring carriage or wagon, and will answer all the purposes that platform gearing will, with about one-fourth the labor.

ADVANTAGES OVER ANY OTHER GEARING.

The braces support the body so that it cannot more backward and forward. It prevents straining the spring-bolts and care of spring. It rides much steadler.
It answers for all kinds of carriages and spring wagons.
It is much lighter.
It improves the appearance of a carriage.
It takes less skilled labor to construct one.
It is much easier washed and kept clean.
It is especially adapted to carriages and wagons where short turning is required.
It is much stronger and less liable to get out of order.
