THE Republican Pennsylvania Central committee have fixed upon the 10th of April as the day for holding the Gubernatorial Convention, the place of meeting being Harrisburg.

THE Auditor General has very properly reused to pay the modest little bill of \$30,000, presented for repairs and decorations on the halls of the Senate and House of Representatives at Harrisburg, until the items are ap proved by the Finance Committee of the Legis lature. The rumor that Tweed had been in Harrisburg originated in the presentation of this bill

GEN. JOHN EATON, the National Commisioner of Education, takes occasion in his a aual report to point out the feasibility and advantage of a National Educational Convention n connection with the Centennial Celebration of American Independence at Philadelphia in 1876. The idea is a good one, and we hope it may be acted upon. Education, that is the education of the masses, is the great hope and bulwark of our republic, and whatever will in any way advance the interests of popular edneation in the United States is a matter of practical concern to every citizen.

ONE of the "rank and file" of the Republi can party writes us as follows concerning the LEHIGH REGISTER:-"Your paper is deserving of patronage, being certainly the best one ublished in Allentown. There is even hope t will yet lead the victorious party in Lehigh county. Ledigh should be Republican-its interests demands it. Republican political economy has made it what it is for Democracy surely has not and, unless by a complete new departure, never can."

How much better might the REGISTER I made if some of our leading Republican iron kings thought the same as this one of the "rank and file," who, when it was needed, even of fered his life for the cause.

THE adage that every dog has his day is for cibly proven in the case of General Hartranft. to officer in the army did so much fighting and received such tardy recognition of his who has been their candidate for a ability and his gallantry. The history of his years, and taking up a new man. career is one of the most interesting and remarkable of the war, especially as it required the witnessing of his skill and daring by the President himself before a pair of stars were placed upon the General's shoulders. The copie, however, were not so slow to recogize his worth, and after two terms in the Auditor General's office he stands at the lead of the candidates for the Gubernatorial nom'nation. In Montgomery, Northampton, Lewsburg, and wherever else a few of the sur viving veterans of the gallant Fifty first reside the enthusiasm is particularly strong in his favor, while in Philadelphia a number of Hartranft clubs have already been organized

PARIS has a new sensation. The proprietor of one of the morning papers there, Le Monde, has guspended his publications on Monday mornings "out of respect for the Sabbath." This is certainly extraordinary conduct for a renchman, and it has naturally set the Pariians to talking and wondering. The bishops and clergy are pouring in their congratuons upon the conscientious journalist, while the less pious Frenchmen shrug their oulders and wonder what the world is comng to. A good many American newspaper en would be glad to follow the example of heir French brother, for journalists do not ake special delight in working on the Sab bath, but in this country the newspaper has ecome so closely and thoroughly interwoven vith the social and business life that Monday yould be practically a dies non without its ewspapers. Our ancestors used to get through e world without daily newspapers at all. out we should find it pretty slow and dull work doing without them nowadays.

What the result of the winter's action ongress upon the tariff will be it is impossi predict, but there is reason to fear that at it will be depressing, if not disastrous, to erican industry. Nearly every one of the called Revenue Reformers has a plan of his n in regard to the reduction of dutics, but cy all agree, in effect at least, in seeking t d up and strengthen foreign manufactures the expense of those in this country. How idal this policy is has been demonstrated r and over again in this country in years t, but the Free Traders scoff at all demontions and are willing to let the future take of itself, provided they can gain what y consider a present advantage by giving igners the practical control of our markets Free Traders say that they will be satiswith nothing less than the complete aboon of all duties upon coal and iron, and will leave no measure unresor ed to to g about this result. The practical effect of ing the duty off coal will be to put money the pockets of the Nova Scotia coal opeore and take it out of the pockets of our own inous operators. That does not seem to desirable result to strive for, but there are n Congress, some of them from Pennsylure the crippling of our bituminous coal inst.
