THE Indiana Republicans. in State conven tion, have resolved that while they favor a reduction of Tariff dad other taxation, they also insist on National Legislation to protect the coal and iron interests. Indiana has recently discovered promising beds of iron ore and ac cessible veins of block coal, which has inducad her to join the army of Protection. The prospects brighten. In a few years we wil manufacture nearly everything we need within our own boundaries.

THE recent assassination of the Earl of Mayo, Governor General of India, makes an important vacancy in the British Civil Service. The position is an important one, and it is also lucrative enough to be cagerly sought for. The salary is \$125,000 per year, and this renerous sum is usually doubled by extra allowance. As the place is generally held for six years unless the incumbent sooner suc cumbs to the effect of the climate or is assassinated, it affords a good opportunity for getting rich at the public expense, and there will be no lack of applicants for the desirable place.

SENATOR WILSON of Massachusetts places himself in the hands of his friends in respect to the Republican nomination for the Vice Presidency. He said that he was disposed to withdraw altogether when Vice President Colfax recalled his positive declination, but his triends in various quarters urged him. to remain in the field and so he awaits the decision of the National Convention at Philadelphia. He does this in an entirely friendly pirit toward Mr. Colfax, and if this gentleman is renominated he will have no heartier sup port than that given to him by Senator Wil-
