PENNSYLVANIA HOTEL.

HENRY A. ZELLERS, RESPECTFULLY announces to his friends and the public generally, that he has moved into the house formerly occupied by William Byers, in Selinsgrove, Union county, Pa.—where he is prepared to entertain in a suitable manner all those who may favor him with a call. The house is neatly finished, and conveniently calculated for Public

ENTERTAINMENT. Good Cooks and Waiters have been engaged, and the Table supplied with the best provisions that can be obtained in a plentiful market. Particular attention has been paid to selection of his Liquors which are believed to be of equal quality to those of any other house in the state. The Stabling is convenient and extensive, and well filled with the best of provender, and will be attended by the most careful ostlers.

The subscriber respectfully solicits a share of public patronage, which he will endeavor to merit by moderate charges and strict attention to the comfort and convenience of his guests.
HENRY A. ZELLERS,
Selinsgrove, March 31, 1838.

Important to Tailors

PATENT ELASTIC SQUARE
AND
Self-varying Square Rule.
For measuring and drafting coats, in connection with another new and useful rule for cutting male or boy's coats upon a more familiar plan; also, superior rules for cutting all other garments incumbent on the branch, are now offered to the trade by the subscribers; believing them to surpass every thing of the kind which has preceded them.

Great imperfections in the art and facilities to produce a miss-fit have been standing before the cutter ever since the introduction of rules, filling the mind with fear and anxiety, until the coat is finished and tried on, at which crisis the blood is often caused to rush into the face at beholding a bad fitting coat.

The rules, with one or two exceptions, which have been in use ever since the first invention of the kind, were wholly predicated upon principles giving the same proportion for every man, which principles would long since have been superseded by self-varying rules, had tailors but thought that the variation in the proportions of men's bodies are almost as many as in the feature of the face.

Two or three rules styled *Self-varying*, have made their appearance within about ten years, each inventor claiming the honor of having perfected the art, upon which J. G. Wilson, of New York, entitled his system perfect; but instead of being perfect, it contains many erroneous principles, which the subscribers forbear to point out until that gentleman assails this assertion. All such systems have heretofore been defective in two ways: First, they are only in part self-varying. Secondly, those parts which are intended to be self-varying are defective. In fact, there are certain points on the coat which cannot be effected by self-varying principles in any other way, nor by any other means, than those laid down by the subscribers.

Unlike any other of the kind, this system now offered to the trade is conducted without any breast measure, and effects every point and every part of the coat by self-varying principles, in a way calculated to convict the senses of any reasonable man, that should it ever fail to produce a good fit upon any shape whatever, the charge must be laid to a careless and incorrect measurement. It may seem mysterious that this rule is said to be self-varying, and yet a square rule—a square rule and yet conducted without a breast measure; but the whole mystery will be unfolded at once by examination. Unwilling to have it said that the subscribers are attempting to palm this system upon the trade with misrepresentations, they avow their willingness to submit it to the hands of an impartial committee for an examination of its principles, in comparison with any other ever invented in the United States, at Philadelphia or New York, which committee shall make the decision known through the press. The subscribers set all systems which are governed wholly by the breast measure aside as inferior and not worthy to compare with; consequently they will compare with none but such as are governed in part by self-varying principles. For if the principles here offered to the trade are not worthy of patronage it is right that it should be made known, and they sink into oblivion. On the contrary, if they are found as above represented, or if thereby the subscribers have put an end to all further improvements in the art of cutting coats they deserve some patronage and compensation for their exertions.

Terms—if forwarded to order \$1, if personally taught \$12
