ARRIVAL OF THE STEAM SHIP LIVERPOOL.

Twenty days later from England. By the Steam Ship "Liverpool," which arrived at New York from Liverpool yesterday morning at 11 o'clock, we have London and Liverpool papers to the 13th ult.

Armed Associations for Protection of Property. In consequence of Lord John Russell's circular, offering arms to any associations of house holders, who volunteered their services to protect the lives and property of the neighboring inhabitants, a communication was made from the Mayor of Bath to his lordship, asking certain questions, to which his lordship replied on Monday, that the government did not contemplate associations of a military character, and that therefore they had not taken into their consideration points referred to of the uniform, or choice of officers, by the members of such association.

WAR IN THE EAST.

War, it is rumored, has sprung up in Syria between the Sultan of Turkey and the Pacha of Egypt. It has been the aim of the European Powers to prevent this, but the passions of the Turks and Egyptians are too much roused to admit of peaceful arbitration.

We learn from our correspondent at Toulon, that considerable activity prevails in the arsenal of that port, and that all the workmen are in full employ. Order had been received by the Telegraph for several vessels to repair to Levant.

GERMAN BANDITS.

The southern and western parts of Swabia have been this winter infested by numerous bands of robbers and swindlers, under a leader named Baarfuss, whose exploits have been of a daring description.

On the 4th of June, Lord John Russell took occasion to say that the Government would not now pursue its plan of national education, that it had given up the idea of founding a normal school, and that he now meant to propose the funds originally intended to be voted should be distributed for the purposes of education, under the superintendence of the National Society and the British and Foreign School Society.

COMMUNICATIONS.

Mr. Editor, A notice has appeared in the "Danville Intelligencer" and "Berwick Sentinel," informing the people that it is the intention of the speculators in and about Danville, to apply at the next Legislature for a charter of a BANK to be located at DANVILLE.

Let the Democracy of the county take this subject into early and candid consideration, and vote for no one for member of the legislature who refuses to give a written pledge to oppose the chartering of a bank in the county. A DEMOCRAT.

THE LEGISLATURE.

It is profitable when we are about selecting new agents to look back upon the acts of those whom we have heretofore had in our employ, that we may see whether they have been faithful in the discharge of the duties intrusted to them, in sustaining the interest of their constituents generally, or whether they have taken advantage of the powers conferred upon them, to enrich themselves and their friends at the expense of the many.

or purposes. Out of this 91, but 44 are of a public nature, the remainder are mostly for individual benefit. Thus six months has been spent by the legislature in granting extra privileges to speculators, that they might control the Agricultural and Mechanic interest of the country, and suck out their very life blood to enrich their coffers.

Mr. Webb, A late Register contained a communication signed a "Sugarloaf Whig," representing the Whigs of Sugarloaf as being opposed to the agitation of the removal question.

That we can do nothing now as a party is evident from the fact, that we number less than one third of the legal voters of the county, and I see no prospect of an increase at present. Then why should we oppose the attempt making by the Democrats to effect that for us which we are unable to do for ourselves?

A WHIG OF SUGARLOAF.

Mr. Webb, I have waited with considerable impatience for some movement in the removal question, as I am very anxious it should be agitated this fall, and I find that every person in this section of the county, with whom I have conversed upon the subject are equally determined with me, to have the question fairly tested.

TRUTH WITHOUT FEAR

BLOOMSBURG: SATURDAY, JULY 13, 1839.

Appointments by the Governor.

Benjamin Patton, Jr. Esq. President Judge of the 5th Judicial District, consisting of the county of Allegheny; in place of T. B. Dallas, resigned.

A right feeling is beginning to be felt and expressed, among all classes of people, in opposition to the increase of bank charters. Indeed, so general has it become, that even the whigs find themselves compelled to follow the wake of popular opinion.

SPECULATION.

"There is no speculation in those eyes, which thou dost glare with," said Macbeth to the Ghost of Banquet but that was in old times, long before Bank Stock was run after or the Morus Multicaulis fever raged.

The whole batch of Philadelphia Loan Companies have gone by the board, and made assignments. They had issued a large amount of paper during the suspension, which they are now unable to redeem, and which of course is now worthless trash.

Four Banks in Georgia have stopped payment and refuse to pay their notes either in specie or other bank notes. This is going the whole hog.
