"The life of the flesh is in the blood" so saith the scriptures.—Leviticus c. xvii v. ii.

DR. LEIDY'S BLOOD PILLS.—What better than scripture testimony can we have of the life of the flesh depending upon the condition of the blood? If impure or diseased, the flesh must of course be diseased thereby, and the whole system partake of such disease. If the doctrine be true, and there is not a doubt of it (for it is a fact acceded to by all, that the scriptures, are true beyond a doubt,) then it behooves us to guard against the consequences of such impurities, and thus preserve the flesh healthy. If the flesh be healthy, constituting as it does the principal portion of the human body, then must the whole body be healthy.

In vegetables only can we find the medicine whereby all impurities of the blood may be removed.—Upwards of one hundred years experience of the most celebrated, the wisest and best physicians have proved certain vegetables to possess purifying properties. These vegetables will not here be named, and Dr. Leidy wishes to remunerate himself, and profit by the long, laborious, and costly experiments necessary to be made, that the active principles of those vegetables might be extracted and reduced to such form as makes them easy, safe and pleasant to be taken.

These vegetables are contained in the justly celebrated Blood Pills, manufactured only by Dr. N. Leidy, a regular Druggist and Physician, attested by Drs. Physic, Chapman, Jackson, Horner, Gibson Dewees, James, Hare, Cox, &c.

The above Pills may be employed as a mild or active purgative. Their action is easy, and may be employed by all persons under all circumstances.—They will at all times be found serviceable, when the least sickness is present. They require no change of diet, restraint from occupation, or fear of taking cold from their use. They are daily prescribed by numerous physicians, certifiers of the fact accompany the directions. They are the most effective purifier of the blood and other fluids of the human body ever discovered. Persons having once used, will ever after, as occasion may acquire, have recourse to them.

Price Twenty Five Cents a box.

Sold by all respectable Druggists and Merchants throughout the Union, and in this city only at Dr. Leidy's Health Emporium, Second street below Vine.

MISCELLANY.

DESTRUCTIVE STORM.

The American Atlantic shores have been recently visited with one of the most violent storms ever before known. It occurred on the 26 of August. Thousands of dollars worth of valuable property has been destroyed, and what is still more to be deplored, the loss of human life has been very great. The whole coast is strewn with wrecks, among which are some of the most valuable vessels that sails out of our seaports. The Southern papers give the most lamentable tidings of destruction caused by the storm which they say entirely baffles description. Hundreds of houses have been swept away, and their fragments scattered to the winds. Plantations have been destroyed, and men who were before wealthy are now reduced to the pinching wants of poverty. The gale continued for four days; on the morning of the fifth, at day break, when the storm had subsided, the North Carolina Republican says a heart-aching sight presented itself. "Vessels were sunk ashore, capsized, dismantled, with exhausted crews clinging to the wrecks, and exploring succor by signals, as soon as the sea was sufficiently calm, boats put off, manned by our hardy pilots, and brought many of the sufferers on shore. The news from all sections is bad enough God knows, yet we fear the worst part is yet to be told.

FIFTY NEW BANKS.

Every democrat should recollect, before he casts his vote for members of the Legislature, that application will be made next winter for more than 50 NEW BANKS, with a capital over 7 MILLIONS!! This is a device brought up by the whigs to destroy the democratic party and give the vote

of the State to Henry Clay in 1840. In some counties dissatisfied politicians who have acted with our party a short time, are the applicants—they know what they are to get, if successful. A few democrats have given notice of intended application under a desire to benefit the towns they live in, but at the bottom of every bank may be found the moving finger of the whigs: We say, trust no man as a representative who is in favor of establishing a new bank no matter what his reason may be. Throw him off and vote for a man opposed to this scheme to break down Gov Porter and the democratic party. Those complying will combine all their interest and log roll so that if one bank will pass, 50 will pass. Then beware of bank influence. It is calculated to ruin our country, and to make hewers of wood and drawers of water out of farmers and mechanics.—Iron Gray.

BANKS.

Perhaps the most prominent feature which distinguishes the democratic party; is an avowed opposition to banks—not only to the mammoth of all iniquity, the mighty fortress in which the last hopes of the aristocracy are entrenched, the contemner of all legislative and executive authority, and the foul defamer of the rulers selected by the people for their wisdom and prudence The United States Bank—but to all banks. This opposition arises from their aristocratic and dangerous tendency of soul less corporate bodies, invested with special and exclusive privileges—the fluctuating, unstable, and unsafe currency with which they supply the community, and the unceasing and too successful operations of war which legislative assistance enables that paper to prosecute against the circulation of the more durable and precious coins of gold and silver. This is a fundamental principle, with which the genuine friends of equal rights will never allow themselves to trifle. Indeed, so much are we attached to it that we have no sort of confidence in any individual who professes democracy, if he will attempt to excuse or justify the inconsistency. A bank democrat—why, there can be no such thing—it is a contradiction in terms. Vermont Patriot.

An Incident.—"Hurra," said a little fellow as he ran a long side of the carriage in which we were riding in the procession, on the day of the reception of the President—"Hurra! I'll be President next time!" and we looked closely at the little fellow. He was about twelve years of age, had on straw hat and was otherwise plainly dressed in summer cloths, with his pantaloons pulled up to his knees, it raining violently at the time. Well, thought we, that may be, for at your age, the citizen who now holds the proud station of Chief Magistrate of this intelligent, powerful, and free people, and who is this day being honored, had no better prospects than yourself to attain the high eminence he reached. Industry the cultivations of good morals, and application—untiring application, have raised him and will also raise you to distinction. Well may every boy in our land, to whom the path of distinction is alike open, fired with laudible ambition swing his hat and cry out as did the little fellow, "Hurra, I'll be President next time."

To us the incident was an interesting one.

Enduring Affection.—A young and pretty woman made her appearance the other day at the gate of the Pere la Chaise cemetery, attended by a footman, who held under his arm a coffin-shaped box, richly ornamented. The keeper asked what were the contents of the box, to which the lady replied, with tears in her eyes, that it contained the mortal remains of the being who in his life engrossed all her affections, her beloved Pyramus, an English spaniel, who had breathed his last the day before, and whose body she wished to deposit in her family vault. Tho' Madame de G—was most eloquent in depicting the many good qualities of the deceased, which, as she thought, fully entitled him to a place among her human friends, the keeper was inexorable. The lady wept and insisted, and the interference of the police was necessary to induce her to retire.

A gentleman who represented a Congressional district in this State for many years, was remarkable for his minute knowledge of the sentiments of his constituents. On the occasion when on an electioneering tour having an active and popular opponent to contend with, his success seemed hopeless, and a friend so expressed himself. The candidate thereupon, exhibited a schedule with his calculations in reference to every precinct in the district, making his own majority 106. The friend suggested a name of one who had gone over to the other side; that, said he, will make my majority 105, which was actually the case.
