A DOZEN REASONS,

Why Henry A. Muhlenberg should be elected the next Governor.

1. Because from his youth up he has uniformly acted with the Democratic party, never once deserting the sacred principles he in early life imbibed from his patriotic ancestors.
2. Because he has uniformly, in all the relations of life, public and private, maintained a character unsullied by a single stain, and is 'proof and bulwark' against all the assaults of partizan malevolence.
3. Because in the Congress of the United States he battled side by side with Andrew Jackson, against the encroachments of the United States Bank, sustaining him in his veto of the re charter and in the removal of the deposits.
4. Because he is strongly committed against the assumption of state debts, that dangerous and silly heresy, by which European stockjobbers expect pecuniary enrichment, although it will inevitably entail a national debt upon the country, from which unborn generations would strive in vain for extrication.
5. Because he is pledged by his past acts to the constitutional right of the General Government to embark in ruinous schemes of Internal Improvement, having warmly espoused General Jackson's veto of the celebrated Maysville bill.
6. Because he is the friend of economy and retrenchment in the public expenditures in order that labor may be lightly burdened.
7. Because he is devotedly attached to the fair fame and honor of his native State—very favorable to the honest payment of every dollar of the public debt—and the sacred preservation of state faith, as the duty of an enlightened people and an honest government.
8. Because his name is well and favorably known in all the financial circles of Europe and his elevation to the 'Chair of State' would, of itself, exercise a highly salutary influence upon public credit.
9. Because he is pre-eminently generous and philanthropic in his nature; his heart beats warmly in unison with the interests and feelings of the masses—he is the poor man's friend—and the benefactor of the down-trodden and oppressed.
10. Because he is ready at all times, under all circumstances, to support measures that will enable honest industry to receive adequate reward, having never once forgotten in the golden rule, that 'the laborer is worthy of his hire.'
11. Because he is in very word and deed a republican of the good old Jefferson school.
12. Because he is eminently qualified in education, habit, and experience, for a full and competent administration of our State government—in which respect he has the advantage of his incompetent and inexperienced competitor.

SECTION 7. Makes specific appropriations for the current year, commencing June 1, 1844, and ending June 1, 1845, as follows:

HEALTH is characterized in an individual by the absence of all pain, suffering, or affection in any part of his body; by the free and regular exercise of his functions without any exception. They consist in having a good appetite at meal time; an easy digestion, free evacuations, without looseness or constipation at least once in every twenty-four hours, and without heaviness, or burning at the passage, the use of the water without acrimony or burning, and without a reddish sediment which is always a sign of a present or an approaching pain; quiet sleep without agitation or troublesome dreams; no noise of bile or other bad matter in the mouth upon rising in the morning; no longer a sweet breath; no itching, pimples or spots on the skin; no piles; no burning heat upon any part of the body; no excessive thirst when exposed to labor or other known causes; no interruption to any natural evacuation; no pain at their natural returns.

Where the state of the system does not harmonize with the above picture of health, it is of the greatest importance that no time be lost in seeking for a doctor, or in the use of foolish remedies too often the result of speculation instead of this course a dose of BRANDRETH'S PILLS be taken, which will not deceive, but will at once restore health to the organ or part that requires it.

All who wish to preserve their health, all who are deterred to do so by their life against the encroachments of 'sense which might send them prematurely to the grave, will, without hesitation, have recourse to the Brandreth's Pills, who the state of the system does not harmonize with the above picture of health.

Those who live in a country where contagious or miasmatic diseases prevail, should be on their guard with the above picture of health, and observe himself with particular attention, in order to act accordingly. The pills are rightly directed will follow this advice—be unwise as to their own destruction.

THE WATCH OF MRS. WASHINGTON
The editor of the New York True Sun has examined a watch worn by her connections, and is now owned by Mrs. Webster, daughter-in-law of the late Noah Webster. Under the dial is engraved 1741, showing the watch to be 103 years old—it is cylinder, horizontal, capped, jewelled, and gold case, very plain, and resembling in shape the ordinary small sized 'bull's eye.'

SNUFF BOX FROM POTATOE SKINS.—At a recent meeting of the Brooklyn Institute, Mr. Partridge presented to the Society a snuff-box, made from the skins of potatoes by hydraulic pressure. The box was highly polished, and neatly finished. The cutest Yankee might examine it, and guess for a week, and then be unable to tell the material from which it is manufactured. It is of German make.

TEACHER WANTED.

ANY School Teacher out of employment will probably obtain a situation, by applying to the School Committee of Berwick. It is not necessary for the applicant to present any proof that he possesses the qualifications usually required, if he can take three jiggers a day at Mr. Nicely's, and a spree of a week's duration, every month, to afford the children healthful recreation, he will probably be employed in the place of a young man now in charge of one of the schools, whose moral character is of too high an order to suit the taste of a portion of this community. The applicant need not fear the interposition of any authority, to prevent his admission into the building, as the committee will force him in through the roof, if not through the door. As no other town in the State would accept of a teacher, such as is required here, a single insertion of this notice, it is believed, will bring a host of applicants.

THE SATURDAY MUSEUM.

New and Improved Series.
To the Subscribers of the Philadelphia Saturday Museum.
It is with unfeigned satisfaction on the part of the Proprietors, Editors and Regular contributors of the Saturday Museum, that their paper is now offered to the numerous subscribers, under such arrangements as will place it beyond all rivalry among American Weekly Newspapers. Certain features in the typography having heretofore been adopted in the museum, which it is now considered expedient and more consistent with good taste to abandon. The sections into which the paper was divided, occupied much valuable space, which by the present condensed arrangement of the matter, increases the amount of reading in every number nearly four columns, equal in the course of a year to two duodecimo volumes of three hundred pages each.
With this change in the museum we have the pleasure of announcing also, a general improvement in all its departments, with additional advantages exclusively presented in this journal—They are briefly exhibited under the following heads:
ORIGINAL ARTICLES.
The museum is sustained in its editorial columns by the talents and experience of gentlemen competent for every species of periodical writing. The violence of political partizanship and the prejudice of religious sectarianism will be equally excluded.
ORIGINAL FICTION.
It is hardly necessary to assure the subscribers to the museum that this department will be richly supplied.
ORIGINAL SKETCHES, ESSAYS, &c.
Under these titles the museum will contain the contributions of the ablest writers of our city.
FOREIGN LITERATURE.
This general head embraces an endless variety of selections from the Reviews and magazines and other Periodical publications of Europe. This advantage the museum boasts as peculiar, and of itself sufficient to secure its universal popularity.
NEWS.
This head will include every species of matter properly belonging to a Newspaper, COMMERCIAL AND OTHER MATTERS.
An experienced editor is employed exclusively for the collection and reporting of the markets, the revision of the Bank Note and stock tables, and the regular correction of the price current.
AGRICULTURE.
As the most important of all arts, a portion of the museum will be regularly devoted to the subject of Agriculture.
MISCELLANY.
We might proceed to enumerate under various other heads, the subjects which will constitute distinguishing features of the museum. Suffice it to say that nothing will be omitted necessary to preserve its character as the greatest and best

in America.

BEE HIVES A New Kind.

THIS is one of the best constructed Bee Hives ever invented. It is so arranged, that you can get from the bees, honey at any season of the year, without saying 'try to them.' It also prevents bees being stung by the worms. The subscriber is now prepared to dispose of township or single rights in the following townships, on the most reasonable terms.—Bloom, Henlock, Liberty, Jefferson, Mt. Pleasant, Greenwood, Orange, Fishing creek, and Loudon and Jackson.
He also keeps on hand, ready made, which he will sell cheap.
He has in his Bee house, several swarms of bees in operation in hives of the above description, which he would invite the public to call and examine, for he believes that all who do so, will at once acknowledge that they are the best hives now in use.
