

AGRICULTURALIST.

From the American Agriculturist.

NORTHERN CALENDAR FOR JUNE.

In the north this is the most active month for vegetation of the whole year. It becomes the farmer, therefore, to be stirring with the lark, and watch attentively the whole circle of his fields. Nothing should be neglected. The potatoes designed for winter should now be planted; ruta-bagas sown, and if any vacancies occur in the sugar beet and mangel wurzel beds, they should be filled up by transplanting. The ruta-baga is one of the most important crops of Great Britain, but though a useful one in this country, the uncertainty of it compared with many others, and its far inferior value to Indian corn, to which our climate and soil is perfectly adapted, render it but of secondary consequence. By many who have tried each, the sugar beet is much preferred for feeding stock; and it is certain the latter will keep longest without injury; and in most parts of the country it is a much surer crop, suffering less from drought, and vastly less from insects. Davy, who analysed them, gives for ruta bagas; only 64 parts in 1000 as nutritive matter, while he found 136 in mangel wurzel, and 146 in 1000 in the sugar beet. Where an early crop is taken off the land, ruta bagas, and even the common white turnip, may be raised to advantage, as they may be sown after any crop, and still have time to insure a good growth. Ground bones are a most excellent manure for every variety of turnip, as is also lime. The last may be used to great advantage with almost all crops and soils, when not already found in them in abundance. The plow, burrow, cultivator, and hoe, ought to be plied constantly; the surface kept finely pulverized, and all weeds exterminated. It will frequently save a vast deal of labor to the farmer to go through his fields of wheat, oats and barley, and to pull up all the noxious inroads, chess, cockle, charlock red root, &c. The garden requires particular attention during this month. Keep the weeds cut and the useful vegetables in. As soon as the early radishes, lettuce, &c., are taken off, supply their places with cabbage plants, turnips, late beans, and peas. Leave no nook or corner unoccupied, remember that it will require fifty times the labor to extirpate the progeny the following year, that is necessary for extirpating the weeds that are suffered to seed this. Weedy fields and hard sods intended for huckwheat, should be prepared, and though the old rule is to sow when the chestnut blossoms appear, it is a safer one, to get it in somewhat earlier especially upon land subject to early frost. Sheep ought to be carefully looked at after shearing. Cold, drenching rains are peculiarly hurtful to them at such times. In 1842, large numbers, in the state of New York, were chilled to death in June. Unless they have dry, well sheltered fields to run in, and are stout, well fleshed and hardy, they should be driven home, for the night at least, and provided with a little grain, beans or roots. A supply of salt in troughs, where it is not liable to waste from rains, should at all times be within their reach. Always have tar at the bottom of the trough. This last precaution prevents worms in their heads, and has a general healthful effect. Some of the early glasses and clovers may be cut, and when put up, add salt to the extent required by the animal while feeding, animals like salt with their food, as well as man. Renew your fields of broad cast or drilled corn for soiling. Look well to your bees; many swarms will come out this month, and your hives must all be in readiness. Their preparation for swarming may be known by their clustering on the outside of the hive, and a peculiar piping noise from the new queen.—Use some of the improved hives so as to secure your share of the honey without endangering the lives of the bees. Watch the moths closely, and kill them as they are found, and when they have made their way into the hives, get at them there and exterminate them as soon as possible. Kitchen Garden.—The main point in this month, is to keep the garden entirely clear of weeds, as their growth will now be very luxuriant, and if thoroughly subdued will be much more easily kept out the succeeding months. This is especially requisite with cucumbers and melons, around which keep the ground entirely clean and loose. Sweet potatoes cultivate well, and draw the earth up about to roots. Cabbages for autumn and winter use can be planted out, and celery plants be transferred into trenches. Peas may be sown for late crops, although they do not bear so abundantly as those sown earlier in the season. Sow lettuce, and transplant every week in order to

insure a regular succession throughout the season. This should be done in most weather; or if in dry weather, late in the afternoon, accompanied with a plentiful watering. During the month sow kidney and other beans, for successive crops, and in the early part of the month, a few lima beans may be planted for a late supply. Turnips for late crops may also be sown this month. Fruit-Garden and Orchard.—During this month apple and other fruit trees can be trimmed. For this work, the present season is preferable to the winter, for the reason that the sap, being in full circulation will exude, and covering the wound, heal it in a short time. On the contrary, in the winter no sap can exude, and the branch will frequently be quite dead for some inches in the wound. All useless limbs and upright shoots cut away, and let the tree be trimmed to an open head. In plum-trees, all black knots, formed by the insect, must be taken off and burnt, or the disease will spread rapidly. Cherries will not bear much pruning, and it is generally best to let them grow naturally. Stone fruits frequently bear in such profusion, that the tree is unable to mature them all, and they are thus of comparatively small size. To remedy this, the cultivator should thin out the fruits by hand, leaving only a moderate crop; the nourishment of the tree being thus devoted to a limited quantity, will produce a larger and more delicious fruit. When trees are allowed to bear too abundantly, the great effects made to mature all their fruit, will sometimes exhaust them to such a degree as to induce diseases, from which it will often take them several years to recover. During this month, insects will frequently attack fruit trees in great numbers. For some of these, as the slugs and others of the same nature, a sprinkling of ashes or lime is the most immediately destructive. For the Aphids and smaller insects of the same habits, a solution of whale oil soap, applied with a syringe, is the most efficacious. Caterpillars can be destroyed while they are yet in small clusters, by means of burning sulphur.

OLD FIELDS.

If you have any old fields on your place, which mortify your feeling every time you look upon them, then pass your harrow over them, then sow a bushel of plaster thereon, per acre, keep your cattle off until fall, and, unless we are much mistaken, you will have an excellent pasture of which you may feel proud, and for which your stock would be grateful, were it possible for the instinct of their natures to give birth to that feeling. We say tooone and all thus situated, try our prescription.

HAULING OUT MANURE.

This work should command your earliest attention; and when you shall have done hauling out all you may have prepared look to your lanes, roads, woods and other places, gather up all you can find; and take it also to your fields destined for corn—don't be afraid of giving that crop too much manure, lest you ruin it up—it's a fallacy for a farmer to talk of burning up such a plant by feeding it too luxuriously.

WHO CAN BEAT IT?

Apples two years Old!—Corcelius Williamson, Raritan township, in Hunterdon county; brought to our office; on Saturday last, a number of apples; perfectly sound, which he informed us; were a fair sample of some which he had on hand for two years! Higgins for tall timothy; and Williamson for fine apples—strong team that.—Hemington Gazette.

TRUTH.

Truth has been thus eloquently described by a writer who lived upwards of two hundred years ago:—'Truth is the glory of time; and the laughter of eternity; she is the life of religion; the light of love, the grace of wit, and the crown of wisdom, she is the brightener of honor, the blessing of reason, and the joy of earth; she is the angle's worship, the saint's bliss; and martyr's crown, she hath a pure eye; a plain hand; a piercing wit; and a perfect heart. Her tongue never faints; her hand never fails; and her faith never ceases. She is honored in love; and graced a constancy; in patience admired; and in charity beloved.'

An Irish post boy; having driven a stage or a gentleman during torments of rain; the gentleman driedly said to Paddy, 'Are you very wet?' 'Atrah! I don't care about being very wet; but please your honor, I'm very dry.'

Yellow Fever.—The yellow fever was raging at Vera Cruz, on the 5th instant.

Brandreth's Pills.

HEALTH is characterized in an individual by the absence of all pain, suffering, or affection in any part of his body; by the free and regular exercise of his functions without any exception.—They consist in having a good appetite at meal times, an easy digestion, free evacuations, without looseness or constiveness at least once in every twenty-four hours, and without heat, dryness, or burning at the passage, the free issue of the water without acrimony or burning, and without a reddish sediment which is always a sign of a present or an approaching pain; quiet sleep without agitation or troublesome dreams; no taste of bile or other bad taste in the mouth upon rising in the morning; no sourness or disagreeable rising of the stomach; a clean tongue; a sweet breath; no itching, pimples or spots on the skin; no piles; no burning heat upon any part of the body; no excessive thirst when exposed to labor or other known causes; no interruption to any natural evacuation, nor pain at their periodical return.

Where the state of the system does not harmonize with the above picture of health, it is of the greatest importance that no time be lost in sending for a doctor, or in the use of foolish remedies too often the result of speculation; instead of this course a dose of BRANDRETH'S PILLS be taken, which will not deceive, but will at once restore health to the organ or part that requires it.

THE SATURDAY MUSEUM.

New and Improved Series.
To the Subscribers of the Philadelphia Saturday Museum.
It is with unfeigned satisfaction on the part of the Proprietors, Editors and Regular contributors of the Saturday Museum that their paper is now offered to its numerous subscribers, under such arrangements as will place it beyond all rivalry among American Weekly Newspapers. Certain features in the typography having heretofore been adopted in the museum, which it is now considered expedient and more consistent with good taste to abandon. The sections into which the paper was divided, occupied much valuable space, which by the present condensed arrangement of the matter increases the amount of reading in ever number nearly four columns, equal in the course of a year to two duodecimo volumes of three hundred pages each.

ORIGINAL ARTICLES.

The museum is sustained in its editorial columns by the talents and experience of gentlemen competent for every species of periodical writing. The violence of political partisanship and the prejudice of religious sectarianism will be equally eschewed.

ORIGINAL FICTION.

It is hardly necessary to assure the subscribers to the museum that this department will be richly supplied.

ORIGINAL SKETCHES, ESSAYS, &c.

Under these titles the museum will contain the contributions of the ablest writers of our city.

FOREIGN LITERATURE.

This general head embraces an endless variety of selections from the Reviews and magazines and other periodical publications of Europe. This advantage the museum boasts as peculiar, and of itself sufficient to secure its universal popularity.

NEWS.

This head will include every species of matter properly belonging to a Newspaper.

COMMERCIAL AND OTHER MATTERS.

An experienced editor is employed exclusively for the collection and reporting of the markets, the revision of the Bank Note and stock Tables, and the regular correction of the price current.

AGRICULTURE.

As the most important of all arts, a portion of the museum will be regularly devoted to the subject of Agriculture.

MISCELLANY.

We might proceed to enumerate under various other heads, the subjects which will constitute distinguishing features of the museum. Suffice it to say that nothing will be omitted necessary to preserve its character as the greatest and best.

FAMILY NEWSPAPER

THE NEW VOLUME,

We to day commence a New Volume of Chambers Journal, and we avail ourselves of the occasion to remind those who desire to subscribe for it, that it is the proper time to do so. A work that has risen to a circulation of 75,000 copies weekly in Great Britain, cannot be one of mean pretensions. For moral tendency, information, instruction, and cheapness, it has no equal in the English language. It can, therefore, be recommended to families in every rank of society, without stint or reserve, and if it be desirable to put into the hands of the rising generation agreeable and instructive reading, as a set-off to the English and French novels circulating in such profusion, Chambers' Journal is a work eminently adapted to that purpose.

TERMS
In order to put this work within the reach of all classes of the public, we have determined to issue it at the very low price of one dollar and a half per annum, and also to furnish it to agents at a discount from this price of thirty-three and a third per cent. And in order to disseminate the publication still more extensively we have determined to give individuals or companies of individuals who may order five copies the advantages possessed by agents, and to extend to them also the benefit of the discount. A remittance of five dollars then provided it be in funds at five per cent in the city of New York, or not more than five per cent discount, will command five annual copies. The publication is weekly contains eight pages, and is printed in the quarto form, with neat type and on good paper. It is scarcely necessary to state that the low price at which we offer this work, will oblige us to adhere to the cash system without any deviation whatever. Editors throughout the Country inserting their Prospectus four successive weeks, and sending a copy containing it to the Albion Office, will be entitled to a free copy for one year.

NOTICE.

ALL persons indebted, to the subscriber, will please take notice that the subscriber, has left his Books in the hands of Solomon Newhart Esq. for collection. All persons indebted will please call and settle the same to save cost and trouble.

In fact, whatever offer is made, by any other Family Journal, at all approaching in worth, beauty or pretensions, to the SATURDAY COURIER, will be furnished by us.

The SATURDAY COURIER has become so well and favorably known through a triumphantly popular course of thirteen years, that it would be superfluous to say much on that subject here. We may remark, however, that to the industry, talent and enterprise, which have for years kept this paper a bright exemplar for all its imitators, will constantly be added the productions of every available writer, and continued judicious and liberal Expenditures will constantly be made, as well in the Literary as the Typographical departments. Our means will enable us to be in advance of all others.

Original Domestic Tales, Essays &c.
Every number contains several practical Domestic Tales, Essays, or Sketches, from such pens as T. S. ARTHUR Esq. one of our most popular Tale-writers in America Henry W. Herbert Esq. Dr. James M. Henry, Professor Ingraham, John Frost, I. L. D., Mrs. Caroline Lee Hentz, Mrs. M. St. Leon Loup, and indeed most of the writers in this country or Europe.

OUR ENGRAVINGS
Scarce a number is issued without one or more instructive and explanatory engraving or copy of some gem of the old masters, with a descriptive Tale, Essay, or Sketch.

OUR TRAVELLER.
In this department constantly appear Original or Selected LETTERS from our special correspondents or transient travellers, in England, France, Ireland, and Germany.

To Farmers, Gardeners, &c.
Our increased size gives us much more space to indulge in our favorite subject of filling the bounteous earth, and especial attention is paid to Agriculture, Horticulture, Floriculture, and the culture of every thing calculated to improve and benefit mankind; make them independent of Foreign Monopolists, pernicious Legislatures, &c.

Our European Correspondent.
Our especial European Correspondent, resident in London, keeps us supplied with the earliest issues and materials for enriching our departments with choice Literature and Variety, and giving to Emigrants, as well as others, a correct and connected account of whatever occurs of interest, either at home or abroad.

THE MARKETS.

Particular care is taken to procure the earliest advices in reference to the prices of all kinds of Grains, Provisions, Produce, &c. the state Stocks, Banks, Money, and Lands; and our extensive arrangements will hereafter render our Prices current of inestimable value to the Traveller, Farmer, and all Business classes whatever.

Bloomsburg MARBLE YARD.

The subscribers have established at the above place, a new MARBLE YARD, and will always be ready, at the shortest notice, to furnish to order,
