### Agricultural.

ESTIMATES OF THE CROPS OF THE UNITED STATES. - We have received an estimate from the Report of the Patent Office, relative to the crops of the United States for the past year. The tables are too long for insertion, but we have condensed them into the following space:

Pupulation in 1845, Bushels of wheat raised,			21,090,000
			126,364,600
	11	barley,	6,222,050
	44	pafe,	185,500,000
	.01	rye	32,951,200
	16.	backwheat,	12,553,000
	11	Indian corn,	583,150,000
	76.	potatoes,	114,475,000
Tons of hay.			15,735,000
Pounds of tobacco,			318,909,000
		Cotton,	1,066,000,000
	44.	Time	119,199,500

200,000,000 TO STEEDE \$0,330 Tons of hemp, Of this Penasylvania has produced : 15,200,000 Bushels of wheat, o barley, n oatre as tye. o buckwheat, " a - Indian corn, e. potatoes, Tons of hay, 610,000 Pounds of tobacco,

Profess of Dairy Farming. - Orin Wilson, Esq., of Huntsburg, Geruga county, Ohio, kept seventeen cows only the past season, and without any exita keeping, realized from his dairy the sum of \$006, which gives the sum of \$35 61 each cow. This does not include the calves sold or hogs fattened from the dairy, and a quantity of most splendidty illustrated Volumes for famililes ever issued on the American Continent, contain-

AN OLD APPLE .- Col Samuel Jaques, of the "Ten Hills Farm," near Baston, says the Worcester Spy, has presented to the American Antiquarian Society, an apple more than fifty-six years agency destrable in each one of our principal old. It was given him on the 12th of September, 1792, as a birth-day token by a young lady, the period of whose entrance into life corresponded with his own.

### Curious fast in Natural History.

can clothe himself. He is not, however, ges, elegantly bound in gift, pictorial muslin the only exception; nor is he the only animal that can clothe itself. The larvæ or grab of that species of moth which is cal- gravings: designed as a valuable and cheap presled the "clothes moth," manufactures, as ent for parents and teachers to place in the hands soon as it comes into the world, a coat for of young people, in attractive bindings. uself, of hair or wool, and for the protection of its tender skin, lines it with silk. This is a curious and singular fact. If this coat were the insect's only natural covering, it would grow with the insects day Book.-Description of Great Britain and Iregrowth, but it is artifical, and some provis- land -Bible Biography - Scenes and Sketches in ion, therefore, must be made for its enlargeditional length only were required, the task volume on the Wonders of the World. would be easy: the covering being cylindrical, all that would be necessary would the effected by adding a ring or two at the top or the bottom. But the coat must be widened, and this is an operation which insect, as if it had learnt the art of tailoring ges, at One Dollar per year in advance. accomplishes its object with equal ease and one on each side, in order, to give addis. One Dollar, or Ten Cents for single copies. tional width, and then introduces two slies. of the same materials, to fill up the space : -that if the slits were made on each side, edged to be the best and cheapest ever published, from one end to the other, at once, the coat as they certainly are the most salesble. Any acwould fall off; it proceeds, therefore, with it has completed the enlargement of that half, proceeds in like manner to enlarge the other. What more could be done by a skilful tailor ! . And, be it observed, that this operation is performed, not by imitation, for it never saw the thing done; The facts are curious, and worthy of at-

THE LAWYER POSED .- A lawyer not over young nor handsome, in examining a attempts to confuse ker, and thus render her testimony contradictory and unavailable. She, however, seemed to be calm, and proof against all frivolous questions put to her. At last, the lawyer, determined to perplex her, said "Miss, upon my word, you are pretty !" The young lady very promptly replied "I would return the complineat, dear sir, if I were not on outh!" As may be supposed, the lawyer questioned her no further.

SINGULAR CAPE OF SEPPOSED DEATH .-Capt. Hood, a well known cutzen of Beetle child taken wek, which, after much suf- facture and all warranted. fering, and with all the indications of the final struggle with death, received its parents' embrace in the presence of other friends,-The glazed eyes of the sufferer were closed, and a bandage was applied to support the section. Ladies and gentlemen, now is your omended it to all se a chemicantent medicine. the under jaw, as is customary. After a time to get bargains in attendance, who was aiding in the above ser's Store, where the patronage of the public is that I expect to keep it constantly in my shorts, lution and laying out of the corpse, coin, respectfully selicited, menced by sprinkling some cold water on the child's face. Strange to tell, the child opened his eyes, and began to recover, and is now in the enjoyment of full health.

THE Attention of Teachers, School Directors Parents and merchants is called to a series a Arithmetics, prepared with great care by Mr.

confidence in the powers of a certain Magnetic | The first named is already introduced into some tinstrument which he had invented, called the of the best Academies, and a large number of directed at once to the "Gold Placers," if any faction, both to Teachers and papers, It has the nointed. His scientific calculations proved to acter, based upon our own beautiful decimal sysne tounded in truth and protound wisdom, and tem of currency-and is considered by Teachers his new instrument, the "Geleometer," folfalled as the beginning of a new crais this department ter reaching California, he struck open one of the thora which nearly all our present Arithmetics richest gold names in that country, upon an ob- are copied,) of continuing the pupil for years in some branch of the Sacramento fiver in a going the process of reducing pounds to farthings, and than \$3,000 worth of gold in a single day, which lette College; Mr. Stoever, runcipal of the Preer with several hundred Prefessors and Teachers in various sections of the country. BJ It is also the chespest Arithmetic in the market,

"The Youth's Columbian Calculator," by the same Author, has just been issued. It contains 94 pages, with about 200 examples for solution on the state; it chibraces the tunos mental rules, Compound Rules, Simple and Compound Reduc-

tion, Single rule of Three, or Proportion, &c. Teachers who have examined this work since its publication, are of the opinion that it is just what is very much wanted at this time in our District Schools as a Primary Arathmetic territoria commencing the study of numbers, but the reasons that those Primary Books now in use are either lee joverale, or too far in advance of the pupil; in fact, that there has been no auitable Francity treatise on Arithmetic before the public. It is aiso believed that this voltage will contain a sufficient amount of practical and hicker, as will commonly occur in the transaction of ordinary business-more particularly in the Fenale Department of our District Schools, namy of which seldom learn the use of numbers as far as. Reduction or Proportion, and as the work is intended, in part, for this class of pupils, great care and labor has been bestowed with a view to render every part perfectly plain and easy of comprehension by the pupil. The calculations are in Seni currency," with the use of a few fractions, sufficient ment, that a child may learn to operate with it in for general use, as a knowledge of fractions can be

acquired to in the larger velon The key endences several bandred examples in Arithmetic and Mensuration, and off or value ble matter for the use of the Teacher. The ex-

idustrations, demonstrations &c. "Tickner's Acid metical Tables," is designed for the use of younger classes in the Schools of the inited States. This hock is new published by the first time, and is considered by competent judges, the best Table Back in the market of
