

FARMER'S DEPARTMENT.

September--Work to be done. Fairs--If grain crops be not already sown they should be attended to early in the month.

Light, sandy soil should not be ploughed in the fall. Select your ears of corn from such stalks only as bear more than one ear.

Kitchen Gardens--Collect onion-sets intended for replanting in early spring. Manure grounds intended for spring gardening, ploughing and sowing deeply.

Keep the hand and horse cultivator busy at work among the turnip and other root crops. Part the roots of all herbaceous plants for increasing their number.

Transplanting and Trimming of Fruit Trees. A German writer says that he transplants every nursery tree three times.

Upon this subject J. W. Field, a practical nurseryman says: "The true object of growing an orchard is to grow trees for their fruit, and not to obtain some other crop from the same ground."

Retrieval Cattle--I will give you a simple, yet very certain mode of getting a potato or apple out of a creature's throat. People frequently resort to harsh remedies, and sometimes lose a valuable crop or ox thereby.
