" Through 'the hushed nir the whitening shower

desconds.
At first thin weavering, till at last the flavor Pall broad, and wide, and fast discording the day With a continual flow. The cherished fields Along the many current. Low the woods how their hoar heads, and ere the languist sun Faint from the west emile his evening ray. Earth's universal face, deep hid, and chill, Is one wild displing waste, that buties wide

There is something appropriate and beautiful in closing the old year and beginning the new, with a covering of snow. It is at once a winding sheet for the dead past, and a spotless tablet on which to write rough and the smooth, all beautifully tered and saved. It puts a new espect upon the whole face he should not forget the poer around him. the loaded wood sleds, pass over meadows now, or charity if needed, will bring and cultivated fields. Deep, narrow val- warmth and comfort to their homes, and lies are filled up, and unsightly brush and earry them through the Wister safely. brambles, under the walls and by the roadside, are concealed. The farm of the sloven is for once put in order, and looks neatly. The gaps in his fence, the briars in his fields, the thistles and weeds around his house and barns, no longer stare us in

tive of many profitable lessons to the friend the poor. have occupied. The expense of removing and with energy, will, in due time, transthese stones is considerable, but then you form barren acres into fertile meadows. and increased facility in tillage for a swamps into solid land. It will realize life-time. The clearing up of an acre of in more glowing colors than we have rocky land, is equivalent to a good sub. painted. soiling in most cases, and it makes that As we look over our books we find operation comparatively easy whenever the many names against which have been land is taken up for hoed crops. These written during the past year that ominous are important items to be deducted from word "Deceased." And how many more the expense of clearing. Then the age of the Agriculturist family, unreported to the mowing machine has arrived, and you us, have since this day twelve months. connot avail yourself of its great advantages fellen in life's battle field. This year will

the wall, that have so long robbed you of thousand or more will fall by the way-side the use of the richest strip of land in your in the year upon which we are now enterfields. Here foul weeds and vermin have ing. No one of us can say it will not be nestled, grass could not grow, or, if it did, I. Let us, then, start now on a new course neither cow nor seythe could appreach it. of life, resolved to spend this year as if You see how much better the fences look assured that it is to be our last If we do with this nuisance abated. Now it is not this, however the event may prove, it will expensive to make clean work with these truly be, what we now heartily wish to brush under the walls. A bush soythe and every reader, the grub hoe will finish them in a single season. You want the room they occupy, and the rich soil that always gathers under the fences.

Absurd as it may seem, there are farmers that plead for bushes and rocks. The former afford a delicate browse for the cattle, and the latter retain heat and moisture for the land. They prefer land with the rocks in it,—have perhaps seen land spoiled by taking the rocks out of it. Of course, if you add one eighth, or one-tenth. course, if you add one eighth, or one-tenth, knowing of the existence of such an ordito the surface of a field by removing stones, nance. It is well known that potatoes vary and if you bring a large amount of sub-soil in weight as well as in quality; the solid, to the surface by the digging, you increase watery potatoes will weigh the sixty the demand for manure, and if the demand be not met the yield may not be as great the first year after the operation. But let this demand fifty-six pounds, good and lawful measure. be generously met, and the thoroughly- Therefore it appears to be an injustice to loosened and deepened soil will give you a the producer or raiser of petatoes, and we better return for manure and labor, than trust that the law will be altered. you ever received before.

But the snow has completely covered those fences that divide a part of your Excellent Dried Beer .- For convemowing lots. Three fields are thrown into nience, the beef needs to be cut in strips one, and you have a ten acre field. How before salting. For one hundred pounds Fashionable flat & Cap Store much time would you save in tillage if of meat take two quarts of course or that arrangement were made permanent ? fine salt, and two ounces of saltpeter. Put It is a great vexation to cultivate corn or these in a large, smooth iron ket le, and potetoes in small-walled lots, where the place it over the fire until quite hot; then rows are hardly a dozen rods long, and add to it molasses, until the mass resemnearly half the time of your man and horse is occupied in turning about at the ends.

The mowing machine and the horse rake to the most of the model can never flourish in such circumscribed them up in a tub or jar. Turn the pieces March 23 1850. quarters. How much labor has been lost over every day. It needs no water, as the in fencing these small lots? The snow is salt and juice of the meat are sufficient to a great leveller, and its example should be fill : Il the crevices. After ten days, take

solid. You can drive your team to any very tender, and has a peculiarly delicious part of them with perfect safety. What a flavor.

OLEUM LIQUOR.

A Substitute for Linsced Oil.

[PATENT APPLIED FOR ]

[IE undersigned after to the public their Useum
quor as an efficient substitute for Januard Oil, a

ninner for all sorts of Paints ground in Oil, exceeding Red.

THE undersigned ofter to the public hierthleum Liquor as an efficient substitute for Linesed Oil, as a
thinner for all sorts of Paints ground in Oil, except
Venetian Red.
When trained with the Olean the Paint will cover
better, ory quicker and will be more durable, and when
varnished, the paint will have and retain the most
glossy appearance; a nat the electricity of the thinner
will embet the agrill to yiest to the varnish; and the
cracking and ceeding off, so common in ordinary varnished oil prints is cautirely avoided.
For painting Tin Rouls its equat cannot be found.
The Olean can to used by itself, or in common with
Linneed Oil. Varnish, Lapan or Turpentins at the option of the Painer.
Its cost is about one-half of that of Linesed Oil,
thus considerably reducing the expense of painting.
We faithfully recommend it for all purposes indicated and warrant it to give satisfaction. A liberal discount to the trade.
DIRECTIONS.—Thin the paint with the Oteum Liquor and work it well, duti it flows freely from the
brish.
The brash must be free from all moisture and in rariably ought to be soaked well with the Oteum Liquor and oplaning.
Instead of planing the brushes in water over night,
as painters generally de, they ought to be put in the
Oleum Liquor, which will greatly ficilitize the work. HOURS OF MEALS—

November 17 1853 .-- 15

A NEW and singularly successful remedy for the A care of all Billous discesses — Costiveness, it is gestion, Jaundice, Dropey, Rhemmatism, Francism, Jennicos, Propes, Rhemmatism, Francism, Jennicos, Rendache, Pains in the Breast, Side, Huse and Limbs, Fennic Complainty, Sc. &c. Indeed, very few are the discesses in which a Purgative Medicine is not more or less required, and routh, sickness and suffering might be prevented, if a harmless but effectual Cathartic were more freely used. No person can feel well while a costive habit of body prevails; besides, it soon generates serious and often fatal discusses, which might have been avoided by the timely and judicious use of a good purgative. This is alke true of Colds, Feverish symptoms, and Billous derangements. They all tend to become ar produce the deep scaled and formidable distempers which load the hearses all over the load. Hence a reliable family physic is of the first importance to the public health, and this Pill has been perfected with consummate skill to meet that demand. An extensive trial of its virtues by Physicians, Professors, and Patients, has shown results surpassing any thing hitherto known of any medicine. Cures have been effected beyond belief, were they not substantiated by persons of auch exalted position and character as to forbid the suspicion of unitruit.

Mong the many eminent gentlemen who have testified in favor of these Pills, we may mention:
Prof. J. M. Locar, Analytical Chemist, of Cincinnati, whose high professional character is endorsed by
John McLean, Judge of the Supteme Court of the United States.

Thos, Coparis, Sceretary of the Treasury.

his friends and the public that be less taken the Richauge Hatel. In Bloomsburg, located on Main Street, directly opposite the Court House, which has been throughly required and improved, where he is prepared to accommodate his customers with good fare and to general satisfaction.

He also has in connection with the Exchange Hotel, an exvient

omnibus Line, running regularly acceptant these per day to and from the Depot on the arrival of the Care, by which passengers with the pleasantly conveyed to the Depot Station, or taken from and returned to their residences, if desired.

The will slively be keppy to enterious and accommodate by treaders to

clinati, whose high professional character is endesided by
John McLean, Judge of the Supreme Court of
the United States.

Thos. Corneys, Secretary of the Treasury,
Hor. J. M. Whight, Governor of Indiana.
N. Lonoworth, great wine grower of the West.
Also, Dr. J. R. Chillow, Practical Chemist, of
New York City, endorsed by
Hox. W. L. Marry, Secretary of State.
WM. B. Astor, the richest man in America.
S. Lerand & Co., Fropr's of the Metropolitan
Hotel, and many others.
Did space permit, we could give many hundred
certificates, from all parts where the Pills have
been used, but evidence even more convincing than
the experience of eminent public men is found in
their effects upon trial.

These Pills, the result of long investigation and
study, are offered to the public as the best and
most complete which the present state of medical
science can afford. They are compounded not of
the drugs themselves, but of the medicania virtues
only of Vegetable remedies, extracted by chemical
process in a state of purity, and combined together
in such a manner as to insure the best results. This
system of composition for medicines has been found
in the Cherry Fectoral and Pills both, to produce a
more efficient remedy than had hitherto been obtained by any process. The reason is perfectly elvious. While by the old made of compusition, every
medicine is burdened with more or less of acrimonious and injurious qualities, by this each individual virtue only that is desired for the curative
effect is present. All the inert and olmoxious qualities of each substance employed are left behind, the
curative virtues only being retained. Hence it is
self-evident the effects should prove, as they have
proved, more purely remedial, and the Pills a surer,
more powerful antidote to disease than any other
medicine known to the world.

As it is frequently expedient that my medicine
should be taken under the counsed of an attending
Physican, and as he could not properly judge of a
remedy without knowing its composition, we known

Of all t

few would be taken it their composition was known. Their life consists in their mystery. I have no mysteries.

The compasition of my preparations is laid open to all men, and all who are consistent to judge on the subject freely acknowledge their convictions of their intrinsic merits. The Cherry Feederal was pronounced by scientific men to be a wonderful medicine before its effects were known. Many eminent Physicians have declared the same thing of my Pills, and even more confidently, and are willing to certify that their anticipations were more than realized by their effects upon trail.

They operate by their powerful influence on the internal viscors to purify the blood and stimulate it into healthy action—iemove the obstructions of the stomach, bowels, lives, and other organs of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derangements as are the first origin of disease.

Being suggis-scrapped, they are pleasant to take, and being purely vegretable, no harm can arise from their ties in any quantity.

For minute directions, see wrapper on the Box.
