

The following works are sent to Sub-cribers in any part of the country, topon receipt of retail price, by mail or express perspense.

THE NEW AMERICAN CYCLOF EDIA: A popular Decisionary of General Knowledge. Edited by Geonous Russer and Crassies A. Dana. saided by a nomerous select corps of writers in all ranches of Sciencess Art and Literature. This work is being published in about 15 are extracted of feeding hay and straw from the stack is a very wasteful one, yet many farmers continue to do this, when with a little extra labor, one-balf or more could be saved. A large amount of provender is in this manner trodden under foot by the animals. Not unfrequently it happens that the stack is undermined by the constant "nibbling" at its foundation, and falls to the ground, thereby causing an additional waste. Grasses are annually becoming of more value, and should not be used prodigally. The economical way is to feed hay, straw, corn-stalks, &c., from racks constructed about the barnyard, or, what is better still, if possible, to draw all such provender to the barn, DESATES.

Form a club of four, and result the price of four books, and five copies will be sent at the results of expense for carriage of for too subscribers cleven copies will be sent at our expense for carriage. to draw all such provender to the barn, and feed it out from under cover. No other works will so liberally reward the exertions of Agents. As Agent Wayren in this County.—
Terms usuals known on application to the Publishers.
Nov. 24, 1880.

## ..... COMFORTS FOR COWS.

Now that the cold season is setting in, let the cows, especially the milk-givers, have all needful attention. They should be well housed and well fed. The stables stould be just moderately warm, well ventilated, clean, and provided with suitable bedding. Aside from the mere matter of food and drink, the animal should be kept comfortable. This matter can hardly be over estimated.

Then, as to fodder: part of this, of course, should be straw, and hay, and cornstalks; but to expect cows to give much milk on such lean fare, is folly. Favor them with messes of chopped roots, of cut straw, or stalks mixed with meal of some kind. A favorite " mess" for cattle, with n friend of ours is this: Cut up hay, or straw, or stalks, in pieces not more than an inch, or inch and a half long, put the provender in a tub or tight box, and pour boiling water upon it; then sprinkle on a little salt, and cover the whole with a little bran or meal to keep the steam in. When cold, feed it in messes of a bushel at a time. Good as this is, it should be varied from time to time, for cows like variety, as well as men. Cows should be salted two or three times a week. In mild weather they should range by day in a commodious yard, pro ected on twe sides, at least, by covered sheds. And this yard should have a penstock of running water, or a trough kept full from a good pump : the first is the best.

SHALL WE PLOW IN THE FALL

of ornamentation of articles in demeatic use. In order to farnish facilities for the gratification of the popular taste, and to meet the wants of these patrons of the Fine Arts desirous of theving Portraits on Porcelain, the Company have imported from Europe a collection of superior porcelain goods, manufactured to their own order, which they self at cost prices.

As the American Company are owners of the patent tight, and consequently the only persons antihorized to use the process, they have determined, in order to afford People in every section of the Union an opportunity to possess Portraits on China to make the following propasition to resolutate in the Country, who are mable to visit personally the Atelier and Galleries in New York, Persons sending a photograph, subbrotype, or dagmer-restype to the office of the Country in New York, assumption by Five Hollars, will receive in return by express, five of other charge, a richly ornamented Breakfast Cup and Sauger, with the portrait transferred there on All lands, except light loams and sandy soils, are benefitted by fall plowing, unless they are exposed to washing. Steep hill should never be plowed in the fall, unless you sow them immediately with grain or grass seed, to furnish roots to hold the soil in place.

But all heavy loams lying flat, and clays, are greatly benefitted by fall plowing. The teams are generally in the best condition for plowing at this season.—

They have had good pasturage through the summer, and, as a rule, have less to do in the winter and spring. It puts the spring work very much ahead to have all spring and roughly and the portrait can be reproduced to miniature printings; and, in like manner, portraits can be reproduced to do posterial wars or Vasus of every quality of fluids, ranging in price from twenty to the Handred Dollars, they will receive in return a pair of rich Sevens. As seven the portrait excent by the patentials and in like manner, portraits can be reproduced on posterial wars or Vasus of every quality of fluids, ranging in price from twenty to the Handred Dollars. The particular in writing the address, town, country and state distinctly. All letters to be address to clays, are greatly benefitted by fall plowthe green sward turned over in the Pall. MANAGER AMERICAN PHOTOGRAPHIC PORCE-However much of this may done, the teams will have enough to do in the Spring, in carting manure, cross plowing, harrowing. and getting ready for sowing and plant-

In the Fall, the lands that are most benefitted by plowing, are generally in the best condition for the operation. In the spring they are often so wet that they cannot be plowed until May or June -Now they are dry, and will crumble as they are turned over.

By plowing now, they are prepared to receive the full benefit of the action of the frost, rain and snow through the Winter. There are no disintegrators like the elements. Stiff clays and hard pans are made loose and friable by these exposures. The more rough and broken they are left THE undersigned is also extensively engaged in the by the plow, the better. Then there are Indicated this Watersons, a large assortment of rough pasture awards full of brush and rank weeds, and reclaimed swamps with a hy which he is enabled to fill orders on presentation thick turf of swamp grasses, that are best times he ready to attend Functeds. Simon C. SHIVE. subdued by tearing them up now. They Broomsburg, January 29, 1859. freeze and thaw through the Winter, and little life is left in them by Spring.

Besides this, plowing has an important THE PARIS influence upon insect life. Many insects burrow in the earth, and if left undisturbed come forth with new life in the Spring. Plowing disturbs their winter arrangements and kills millions of their larvre.

At this season the soil may be safely plowed deeper than in the Spring. The Including Including

TRUNKS! TRUNKS!!

HOSTETTER'S STOMACH BITTERS.

It is a fact that, at some period, every mem-ber of the human family is subject to disease or disturbance of the bodily functions; but, with the aid of a good tonic and the exercise of plain common sense, they may be able so to regulate the system as to secure permanent health. In order to accomplish this desired regulate the system as to secure permanent health. In order to accomplish this desired object, the true course to pursue is certainly that which will produce a natural state of things at the least hazard of vital strength and life. For this purpose, Dr. Hostetter has introduced to this country a preparation bearing his name, which is not a new medicine, but one that has been tried for years, giving satisfaction to all who have used it. The Bitters operate powerfully upon the stomach, bowels, and liver, restoring them to a healthy and vigorous action, and thus, by the simple process of strengthening nature, enable the system to triumph over disease.

For the cure of Dyspepsin, Indigestion, Nausea, Flatulency, Loss of Appetite, or any Bilious Complaints, arising from a merkid inaction of the Stomach or Bowels, producing Cramps, Dysentery, Colic, Cholera Morbus, &c., these Bitters have no equal.

Diarrhea, dysentery or flux, so generally contracted by new settlers, and caused principally by the change of water and diet, will be speedily regulated by a brief use of this probably more prevalent, in all its various forms, than any other, and the cause of which may always be attributed to derangements of the digestive organs, can be cured without fail by using HOSTETTER'S STOMACH BITTERS, as per directions on the bottle. For this disease every physician will recommend Bitters of some kind;

directions on the bottle. For this disease every physician will recommend Bitters of some kind; then why not use an article known to be infal-lible? All nations have their Bitters, as a pro-ventive of disease and strengthener of the sysventive of disease and strengthener of the system in general; and among them all there is
not to be found a more healthy people than
the Germans, from whom this preparation emanated, based upon scientific experiments which
have tended to twove the value of this great
preparation in the scale of medical science.
Feven and Auge... This trying and provoking disease, which fixes its relentless grasp on
the body of man, reducing him to a mere shadow in a short time, and rendering him phy-

dow in a short time, and rendering him physically and mentally useless, can be driven from the body by the use of HOSTETTER'S RENOWNED BITTERS. Further, none of the

from the body by the use of HOSIE-HERTS
RENOWNED BITTERS. Further, none of the
above-stated diseases can be contracted, even
in exposed situations, if the Bitters are used
as per directions. And as they neither create
nausea nor oftend the palate, and render unnecessary any change of dist or interruption
of ordinary pursuits, but promote sound sleep
and healthy digestion, the complaint is removed as speedify as is consistent with the production of a thorough and permanent cure.

For Persons in Advanced Years, who are
suffering from an enfectled constitution and
infirm body, these Bitters are invaluable as a
restorative of strength and vigor, and need
only be tried to be appreciated. And to a
mother while nursing these Bitters are indispensable, especially where the mother's nourishment is inadequate to the demands of the
child, consequently her strength must yield,
and here it is where a good tonic, such as
Hostetter's Stoment Bitters, is needed to impart
temporary strength and vigor to the system. Ladies should by all means try this remedy for all cases of debility, and, before so doing, should ask their physician, who, if he is acquainted with the virtue of the Bitters, will ommend their use in all cases of weakness.

CAUTION .- We caution the public against using any of the many imitations or counterfeits, but ask for HOSTETTER'S CELEBRATED STONACH BITTERS, and see that each bettle has the words "Dr. J. Hostetter's Stomach Bitters" blown on the side of the bottle, and stamped on the metallic cap covering the cork, and observe that our autograph signature is on the label.

signature is on the label.
