

ABOUT TURKEYS.

Who that has any savory reccollections of last Thanksgiving Day, or Christmas, and who that knows what large profits can be made out of these birds, who does not wish to try his hand at raising a brood or two this Summer? Here are a few suggestions on the subject :

Experienced breaders insist that for raising good healthy broads, an old turkey is much better than a young one.—
A bird does not arrive at full maturity until from two or three years old. Audubon, the great American Naturalist, says:

YANKEE NOTIONS, bon, the great American Naturalist, says: "The third year, the male tarkey may be said to be an adult, although it increases in weight and size for several years more. The females at the age of four, are in full beauty." It is well known that when farmers have killed off their old birds, and raised their broods successively from young goblers and pullets, the progney has grown smaller every year. Chicks so raised are tenderer, and more likely to die off from cold and exposure. Hence the frequent remrk from sagacious breeders, that you might as well think of improving your flock of sheep by breeding them from lambs, instead of vigorous, mature sheep As a general rule, the cock and hen should be three years old and upward, and the two of different breeds. Every year, the earliest hatched, most vigorous, and best formed young birds should be selected for future breeders, and others killed off when

During the Fall and Winter, turkeys need only moderate feeding, but as Spring opens, let the amount be increased, espec. ially during laying time. Considerable pains should be taken at this last period, to tame them. After they have laid their first litter-say fifteen or twenty-five eggs break up their nests, but do it without their knowledge. Continue to feed and cosset them, and in a fortnight's time, they will begin to lay again. It is thought a good practice to turn the eggs once or twice a week. When they have laid their second nest full, and show a disposition to set let them do so. Put their first lot of eggs under a common hen, at the same time; and when they are hatched, give the chicks to the turkey-mother, who will take eare of heir warming the productions.

When they are a month Diana, Delaware, Concord, Isabella, Catawha old, give them Indian meal mixed with warm water. Set pans of sour milk where S MALL PRUITS: they can get a daily sip, if they like.

Until they are ten days old, they should be housed at night, and let out during the day. When about a fortnight old, if the day.

When about a fortnight old, if the March 10, 1801—Jun. weather is then warm and settled, it is an BAGAINS ! BARGAINS !. excellent plan to make a large pen,a rod NEW FALL AND WINTER GOODS. square, of boards sixteen inches wide, and keep the brood in that until they are able with the brood in the brood in that until they are able with the brood in the to take care of themselves. Only they should be fed once a day to keep them from roving too far and too long from home .-American Agaiculturist

THE BEST DAIRY COWS.

For purely dairy purposes, the Ayshire Cow deserves the first place. In consequence of her small, symmetrical, and compact body, combined with a small chest rather narrow than otherwise, and a capacious stomach, there is little waste, comparatively speaking, through the respirato ry system ; while at the same time, there is a very complete assimilation of the food, and then she converts a large proportion of her food into milk. So remarkable is this fact, that all dairy farmers, who have PATENT MICA LAMP CHIMNEY. any experience on the point agree in stating, that an Ayrshire Cow, generally gives a larger return of milk for the fool consumed, than a cow of any other breed : the absolute quantity may not be so great, but it is obtained at a less cost ; and this is the point upon which the profit depends.

The Jersey Cow is remarkable for the richness of her milk; so much so, that two or three of this breed kept in large daries, very perceptibly improve the quality of the butter and cheese.

Short Horn Cows are seldom good milkers, unless the climate and food are both very favorable, and under most circumstances, they have a greater tendency to produce fat than milk.

MORTON.

VALUE OF ROOTS FOR FEEDING .- One thing is pretty certain-cattle are exceedly fond of roots of all kinds. They are great promoters of health, and as we trent ourselves to various kinds of dellicacies, there is no reason why their palates should not be gratifide. We estimate roots for feeding be gratifide. We estimate roots for feeding something like this: ruta bagas 10 cents a bushel, beets 12 cents, carrots 20 cents, and potatoes 25 cents. And then six cents albushel may be added for the gratification of seeing with what gusto they are caten.

Dentisty, and is provided with the lattest improvements PORCELAIN TEETH which will be insected on pivot or gold plats to look as well as the natural.

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitinted, weak, and poor. Reing in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venereal intention. Whatever be its origin, it is hereditory in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the red of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in

their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the longs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this serofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and cacraise. Such a medicine we supply in

AYER'S

Compound Extract of Sarsaparilla, the most effectual remedy which the medical skill of our times can devise for this every where prevailing and fatal malady. It is com-bined from the most active remedials that have been discovered for the expargation of this foul disorder from the bleed, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only serofula, but also those other affections which arise from it, such as Environment Skin Diseases, Sr. Anthony's Fire, HOSE, OF EDWARDS, SV. ANTHONY S FIRST, HOSE, OF ERVAPIELS, PERVILES, PESTILES, BLOTORES, BLAINA and BOILS, TUNDES, TETTER and Salt Ribers, Scale Heap, Risgword, Ribermann, Symilatic and Mercultal Dis-RIMEMATISM, SVEHILITIC and MERCHIAL DIS-HASES, DROPSY, DYSPERSIA, DEBILITY, and, indeed, ALL CONFLAINTS ARSING FROM VITTA-THE OR IMPURE BLOOD. The popular belief in "impurity of the blood" is founded in truth, for serofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIO.

FOR ALL THE PURPOSES OF A FAMILY PHYSIO, are so composed that disease within the range of their action can rarely withstand or evade them Their penetrating properties search, and cleanse, and invigorate every pontion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almonae, containing certificates of their cures and directions for their use in the following complaints: Continents, Hearthurn, Headacha crising from disordered Stomach, Nauses, Indigestion, Pain in and Marbid Inaction of the Boxeds, Flatilizary, Loss of Apparite, Joundice, and other kindred complaint, arising from a low state of the body or obstruction of its functions.

Aver's Cherry Pectoral, POR THE BAPID CURE OF

Coughs, Colds, Influenza, Hourschess, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the

Patients in advanced stages of the disease.

So wide is the field of its usefulness and so numerous are the cases of its cures, that almost every section of country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to essept observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the alliceach they can never forget, and produced cures too numerous and too femarkable to be forgotten. PREPARED BY

The Life Medicines should it possible, he taken in the early stages of offices complaints; and if possible ready stages of offices complaints in the parts of our continual, readers comment intersecsacy—their virtues spins for those.

Moffart life Pills—The use of these Pills, for a very short time, will affect an entire cure of sail affectm, and a striking improvement in the claroses of the skin.—Common tolds and ladients; will always be cared by one dose, or by two even in the warst cases.

Pills Pills II—The original proportion of these Meditines was cured of Piles of 25 years standing, by the use of the late Medicine office.

Levan Complaint—An affection of the Laver may be known by a feeling of tension or pain in the right side about the right of the live, office promotion as in pleaners, but sometimes stull; a difficulty in drawing a long recati; dry cough and inclination to voint. This discusses may be produced by cald, by violent exercise, by intense same she has by long common blines favor or agaic, and by varrous solid concretions in the substance of the liver. And to those producing excess, are demagonarit of the discustions, which are very frequent causes of obstructions and discusses of the liver.

This discusses should be arrested in the commonement when can be done by a few dones of the late Pills.

When once the liver is a massed to the performance of covery will come.

Even according to the medicines, and a specity recovery will come.

For this source we will be found a spice, specifically and certain remark.

When once the liver is a massed to the performance of covery and country. However, and the done of the medicines, and a specity recovery will come.

For the source of the medicine leave the system amplies to a currency of the decime is a proper functional. With common control of the discusses of the performance of the

nederices, after all others had been found more than saless.
Indig saion and Dyspepsia.—If we were called upon a specify one disease which more than any other is the ane, while it is the offspring of civilization; we should eause Dyspepsia. It is generally attended, or rather restrictive, of a long trans of sile, such as illenthory, riministery, a prawing pain at the stocket, who comply a sense of unconfortable weight when full pains in the head, side and pin of the stoomer, restrictives, children, languar, or wifingness to take exercise, for

ness, languer, unwithingness to take exercise, &c.

\*\*\*SOFFIT'S LIFE MEDITIVES\*\*

Moffat's Life Medicines are peculiarly adopted to the curs of this alsets seing complaint. They are upon the howels in a very mile, and, at the semontime, very effectual matner, and have never yet furied to cure this discence when used according to nor directions.

General Debility—The most common of all complaints is that of a general weakness of the whole system, onserved panishes between the properties of the whole system, onserved panishes, making a loss of appetite, any diffiguress, and indiced imbility to undergo enginess. There is a fittle vital investion, off-artinor sallowness and dryness of the skin, tendency to fiver-sin-ray, unfaintees for secrety, in short all those symptoms of languar, disquired, and weakness that give evidence of a full or in the vital powers, and a low, unhealthy and morbid cumition of the system.

Life Pills and Phoenix Bitterg.

The Life Fills and Phoenix fluters are perhaps, the dearting to call and examine. REPAIRING. Set remody for restoring arrength to the body for they can a gentle cartuarile, and, by their tonic qualities. Will be done in the most presupt and enrefut manuscrapt and upon terms which cancel in the give satisfactors. Moffairs Life Fills.—Persons of a perhaps of STEAWBRIDGE A. WILSON. Moonsburg. April 28, 1830. ADVICE TO PENALIS.—Penalism who value their health should never be without the Life Medicines, as they partly its libest, remove destrictions, and give the skin a beautiful, clear, healthy and blooming appearant a beautiful, clear, healthy and blooming appearant as the still continues the
