

CUTTING OATS.

Some of our contemporaries have recommended farmers to cut their outs when Ladies' Dress Goods, quite green, stating that the straw is much better for fodder, and that the grain fills and yields quite as well as though left till quite ripe. We do not know but what this is true to some extent, but are inclined to think that oats are the worst of all our grain crops cut early, and we prefer to let them get so ripe that few of the first this way a much heavier and fully ma-

## JAVA WHEAT.

According to a correspondent of the Country Gentleman, this variety of spring wheat was introduced into this country in the following singurlar manner. A woman who was roasting some Java Coffee found among it a grain of wheat, which she planted; saved the product and planted again, and so on for three years, when she distributed the seed among her friends, who are reported that it is an excellent

THE LABOR AND REST OF THE HORSE.

Teamsters and draymen too generally suppose that it is more economical to haul large loads of freight, with their horses and teams, than medium sized ones. But I think there is nothing gained in time by pilitag freight high, upon a carriage, for its trantsportation. For it requires more time and strength and care to load the topmost portion of a large quantity of freight upon the same carriage and to secure it in place, and to unload such partion, than it would to load and unload it, upon and from another carriage, or to return for it.

With a large load, the team must move slowly, and to quicken its speed would strain, worry, fatigue and injure it. A team that is much used to hauling large loads soon becomes so stiffened as to move at a snall's pace even without a load.

Such horses soon depreciate in value, and their usefulness diminishes fast. and their usefulness diminishes fast. It is more humane and economical to so use the horse as not to abuse him, not to overload or overwork him. He should not be worked too long without rest. In the long days of Summer, he should be stabled early and should not be put to work till after seven o'clock in the morning. For he needs much time for rest, when the days are long, and he will eat more between the hours of six and seven in the morning than earlier. He should not be fed heartily at night, but lightly, and gratned in the morning. It rs better to work him to high twelve at noon, than very early in the morning, before he has rested and eaten sufficiently to strengthen and refresh him. The working horse should be protected,

in the stable, at least, against the annoyance of flies. They may be kept out with temporary doors and window shutters of sieve or gauze cloth. And they may be destroyed with fly poison.

If the horse has an uncurbed head, and a natural tail, or one that has never been pricked, docked or pullied, he can brush away the insects by day that so much an noy him .- Ploughman.

ADIES' EXTRA HOOP SKIRTS, Bloomahurg, Ech. 23, 1861. C. & I. W. HARTMAN. HOOP Skirts in abundance from 44cts and appeared for sale at HARTMANS. Ayer's Sarsaparilla

A compound remedy, in which we have labored to produce the most effectual alterative that can be made. It is a comeentrated extract of Para Sarsaparilla, so combined with other substances of still greater alterative power as to afford an effective antidate for the diseases Sarsaparilla is reputed to cure. It is believed that such a remedy is wanted by those who suffer from Strumous complaints, and that one which will accomplish their cure must prove of immense service to this large class of our afflicted fellow-citizens. How completely this compound will do it has been proven by experiment on many of the worst cases to be found of the following complaints:—

Schopula and Schopulous Complaints, Pimples, Bloyches, Tumors, Salt Rheum, Pimples, Bloyches, Tumors, Salt Rheum,

Schofula and Schofulder Complaints, Redutions and Empirice Diseases, Ulcers, Pimples, Blotches, Tumors, Salt Rreum, Scald Head, Syphiles and Syphilitic Applications, Mercurial Disease, Dropsy, Neuratora on Tic Douldureux, Dreitly, Dyspersia and Indicate the whole class of complaints arising from Impurity of the Blogo.

This compound will be found a great promoter of health, when taken in the spring, to expel the foul humors which fester in the blood at that season of the year. By the timely expulsion of them many ranking disorders are nipped in the bad. Multitudes can, by the aid of this remedy, spare themselves from the endurance of foul cruptions and ulcerous series, through which the system will strive to rid itself of corruptions, if not assisted to do this through the natural channels of the body by an alterative medicine. Cleanse out the vitiated blood whenever you find its impurities bursting through the skin in pimples, cruptions, or sores; cleanse it when you find it is obstructed and sluggish in the veins; cleanse it whenever it is foul, and your feelings will tell you when. Even where no particular disorder structed and sluggish in the veins; cleanse it whenever it is foul, and your feelings will tell you when. Even where no particular disorder is felt, people enjoy better health, and live longer, for cleansing the blood. Keep the blood healthy, and all is well; but with this pabulum of life disordered, there can be no lasting health. Sooner or later something must go wrong, and the great machinery of life is disordered or overthrown.

Sarsaparilla has, and deserves much, the reputation, of accomplishing these ends. But the world has been egregicusly deceived by preparations of it, partly because the drug alone has not all the virtue that is claimed for it, but more because many preparations,

for it, but more because many preparations, pretending to be concentrated extracts of it, contain but little of the virtue of Sarsaparilla,

contain but futte of the virtue of Sarsapariis, or any thing else.

During late years the public have been misled by large bottles, pretending to give a quart of Extract of Sarsaparilla for one dellar. Most of these have been frauds upon the sick, for they not only contain little, if any, Sarsaparilla, but offer near the same statements. they not only contain little, if any, Sarsapa-rilla, but often no curative properties whatev-er. Hence, bitter and painful disappointment has followed the use of the various extracts of Sarsaparilla which flood the market, until the name itself is justly despised, and has become synonymous with imposition and cheat. Still we call this compound Sarsaparilla, and intend to supply such a remedy as shall rescue the name from the load of obloquy which rests upon it. And we think we have ground for believing it has virtues which are irresistible believing it has virtues which are irresistible by the ordinary run of the diseases it is intend-ed to cure. In order to secure their complete cradication from the system, the remedy should be judiciously taken according to directions on
