

Corn Field.

[We wish we could give to our readers the name of the author of the annexed beautiful effusion. It blends the inspira-tions of the muse with sacred historical incident most happily and successfully.]

When on the breath of Autumn breeze, From pastures dry and brown, Gots floating like an idle thought The fair white this the down, O, then, what joy to walk at will Upon the golden harvest hid !

What joy in dreamy case to lin Amid a field new shorn. And see all round on sunlit slopes The piled up stacks of corn. And send the fancy wandering o'er All pleasant harvest fields of yore.

I feel the day-I see the field. The quivering of the leaves, And good old Jacob and his house Binding the yellow sheaves : And at this very hour 1 seem To be with Joseph in his drea

I see the fields of flethlehem; And respors many a one. Bending unto their sickle's stroke. And Boaz looking on ; And Ruth, the Monhite, so fair.

Among the gleamers stooping there Again, I see a little child. His mother's sole delight,

His mother's sole deugnt, God's blessed living gift meto The kind, good Shunsamite, Te mothal pangs I see him yield, And the lad bear him from the field.

The sun-bathed quiet of the hills ; The fields of Galilien, That eighteen hundred years ago Were full of corn. I see ;

And the dear Savior take his way Mid ripe cars on the Sabhath day O, golden fields of bending corn, How beautiful they seem ! The resper-fold, the piled up sheaves, To me are like a dream ; The synshine and the very air

Seem of old time, and take me there.

MANURES THEIR INCREASE AND PRESERVATION.

However much may have been said on this subject, it does not seem to have had THE PENNSYLVANIA HOTEL, the desired effect, when we see so many of those who are considered as our best farmers neglecting to take any steps toward promoting this end; who, instead of devising means for increasing its amount, even suffer a large part of that already obtained to be wasted. Now, I believe that most of those who parmit this are entirely ignorant of the great injury they are doing themselves, and there may be a few who, though they have had their attention called to it, yet fail to adopt any means to remedy so great an evil.

I will endeavor to point out a few of the most prominent sources of waste, and the means by which they may be obviated.

the manures, which is that obtained from HAT AND CAP STORE. our stables and cow houses, and which is usually thrown out into the barn yards to remain there without any protection from the weather until, after it has been soaked by rain after rain, it is carried out into the Direct from the Manufacturies, of all kinds, styles, sort, and sizes, latest fashions, which he offers wholesale and fields to restore the waste occasioned by

the removal of preceding crops. Now, if this waste, after soaking through Bloomsburg, October 27, 1860. JOHN K GIRTON. the manure and extracting from it a large amount of its usefulness, was carfully sav-od by being caught in tanks, the loss would not be as much felt; but even this is not done and as here's are generally hilt on two miss west of Milville, and the done, and as bars s are generally built on the side of a hill when possible, the water which falls into their yard runs off almost who

# Ayer's Sarsaparilla

A compaund remedy, in which we have labored to produce the most effectual alterative there is a concentrated extract of Para Sarsaparilla, so combined with other substances of still greater alterative power as a first and the second structure of the second structure of

class of complaints arising from interarty or riss Bioon. This compound will be found a great pro-moter of health, when taken in the spring, to expel the foul humors which fester in the blood at that season of the year. By the time-ly expulsion of them many rankling disorders are nipped in the had. Multitudes can, by the aid of this remedy, snare themselves from If expulsion of them many rankling disorders are nipped in the bad. Multitudes can, by the aid of this remedy, spare themselves from the endurance of foul-eruptions and ulcerous series, through which the system will strive to rid itself of corruptions, if not assisted to do this through the natural channels of the body by an alterative medicine. Cleanse out the vitiated blood whenever you find its impurities bursting through the skin in pimples, cruptions, or sores; cleanse it when you find its is ob-structed and sluggish in the veins; cleanse it whenever it is foul, and your feelings will tell you when. Even where no particular disorder is felt, people enjoy better health, and live longer, for cleansing the blood. Keep the blood healthy, and all is well; but with this pabulam of hie disordered, there can be no lasting health. Sconer or later something must go wrong, and the great machinery of life is disordered or overthrown. Sarsaparilla has, and deserves much, the reputation, of accomplishing these ends. But the world has been cgregionsly deceived by preparations of it, parily because the drug alone has not all the virtue that is claimed for it, but more because many preparations, vertendings to be concentrated extincts of it.

for it, but more because many preparations, pretending to be concentrated extracts of it, contain but little of the virtue of Sarsaparilla,

contain but little of the virtue of Sursaphritia, or any thing elso. During late years the public have been mis-led by large bottles, pretending to give a quart of Extract of Sarsaparilla for one dollar. Most of these have been frauds upon the sick, for they not only contain little, if any, Sarsapa-rilla, but often no curative properties whatev-er. Hence, bitter and painful disappointment has followed the use of the various extracts of Sarsaparilla which flood the market, until the name itself is justify deepised, and has become Sarsaparina which noos the market, which holds name itself is justly deepised, and has become synonymous with imposition and cheat. Still we call this compound Sarsaparilla, and intend to supply such a remedy as shall rescue the name from the load of obloany which rests upon it. And we think we have ground for believing it has virtues which are irresistible by the ordinary run of the discass it is intend-ed to cure. In order to secure their complete cradication from the system, the remedy should be judiciously taken according to directions on bottle.

DR. J. C. AYER & CO.

LOWELL, MASS. Price, \$1 per Bottle ; Six Bottles for \$5. Ayer's Cherry Pectoral,

has won for itself such a ronewn for the cure of every variety of Throat and Lung Complaint, that it is entirely unnecessary for us to recount the evidence of its virtues, wherever it has been em-ployed. As it has long been in constant use throughout this section, we need not do more than assure the people its quality is kept up to the best it ever has been, and that it may be relied on to do for their relief all it has ever been found to do.

 Age To not confound this fearmely with the no called "Chemical Food ?" and particularly avoid all prepar-tions containing from, which is naxeproceed to be the W, which has no create the preparities throughout S0 of the Reliable Preparity through the Molecalo Exilication of Estimate and Period Interview.
 Sold by the mest respectable Preparits throughout Exilication of Estimate and Reliable Preparity through the Molecalo Exilication of Estimates and Reliable Transformers, and Wholesalo Exilication of Estimates and Reliable Transformers, Br. Y. Marcho 2, 1861.

GREAT ARRIVAL

March 9, 1861.

fertile part of the manure is lost. Now, this loss could easily be prevented,

and with slight expense, by the erection of a shed under which the manure could be stowed, or, what would be a bettere still, if a covered pit could be prepared in which it might be deposited, and any expense incured in this way would soon be repaid.

Ammonia is olso constantly escaping from a substance which contains a large amount of nitrogen, which is especially beneficial to for the ammonia than it has for the lime, and it therefore leaves the lime and attaches itself to the ammonia, which is a fixed salt.

Hence the frequent application to the manure, particularly that just carried from the stable, of a little of the plaster would greatly tend to prevent the escape of this gas.

There is yet another point to which I would call aitention, and that is the way by which we can increase our stock of O' THAINS WILL RUN AS FOLLOWS: manure ; and, though they are many, I will only speak of two of the most prominent : The first is by means of the compost heap, and the second by the pig-pen. If you will only give pour pigs the material, the quantity of Manure they will make Leave will be immense. Old straw and hay can
