

He that by the Plaugh would thries. Himself must either hold or drive.

PLANTING POTATOES

"Big, and the but end, by all means," says one. "Cut potatoes, if you want to economize," says another. "It is of no consequence," says a third. "They will rot any way," says a fourth.

There is a great variety of practice which shows that this very useful vegetable will bear more abuse than almost any other crop grown upon the farm. The writer has tried almost all methods, and has settled down upon whole patatoes, an inch to an inch and a-half in diameter, as, on the whole, the most desirable for seed, taking into account the immediate crop and the future welfare of the tubers. If we look merely at the immediate crop, we can doubtless get more from a given amount of seed, to cut them into single eyes, than to plant them whole. But we have very strong suspicion that this cutting weakens the stomina of the plant, and if followed up with any variety for a long series of years would run it out. We ought to follow such a method, if we can discover it, as well keep the plant in the highest health, and make the crop sure and

We have grown good potatoes from the smallest seed, a half inch or less in diameter, but it was only upon very rich soil and with extra care. The objections to using large potatoes whole, are the extra expense for seed, as it requires from twelve to fif-

ened in any way it is much more likely to gust, than a strong plant would be. The universal prevalence of the rot is probably owing quite as much to the treatment of speed, as to soil and elmate influences.

Indigestion and pyspepsia.—If we were called upon to speed to not enter in the speed than any other is the kine, (while it is the offspring of civilization) we should name Dyspepsia. It is generally attended, or rather productive, of a long train of ills, such as Hearthurn. Flattency, a gnawing pain at the stomach when empty a sense of uncomfortable weight when full, pains in the threat said and pit of the stomach, costiveness, chiliness, languor, unwillingness to take exercise, &c be injered by the hot, wet weather of Anseed, as to soil and elmate influences.

to the American Agriculturist thus: "A very nice yeast is made as follows: Peel finate symptoms of disease. There is a little vital enand boil twelve potatoes; pour off the wa ter, and jam fine. With ready boiling water from the tea-kettle, scald two quarts of sifted flour in a pan, making it about the consistency of thick paste. Add a teaspoonful of ginger, a tablespoonful of salt, and the potatoes before prepared, heating the whole well together. When cool, add four yeast cakes, previously dissolved in warm water, or a teacupful of hop-yeast. The above quantity will do for a "baking" of three loaves, four times, by keeping in a cool place. It has this advantage over the usual prescription for potate yeast, while answering about as well, viz. that it does not need to be made on every baking day.

CORN FOR FAMILY USE -Table corn, which is usually furnished by the garden, should be planted at intervals of about two weeks until 20th of June. The first erop should be Adams' extra early which should be put in by the 20th of April; the second and all subsequent crops, should be of the variety known as Stewell's Evergeen, which we have often referred to in terms of commendation in these columns. Plant the first crop of this about the 5th of May and let it be followed by another crop every fifteen days. We have tried nearly all the recommended varieties of sugar corn, but after ten or twelve years' experience we prefer Stowell's Evergreen, always taking care that the genuine variety is planted. From the time the first pot of boiling corn is obtained up to a pretty sharp frost, we have a daily supply. - Germantown Telegraph.

Those Laboring Under

stekness can at once retieve themselves from the thousand maladies that flesh is held to, if they will only follow the counsels of nature, and take the medicine which best assists her in her operations. That medicine is the Vegetable Life Medicines of Dr. Morrat, known as MOFFAT'S LIFE PILLS

PHŒNIX BITTERS. These Medicines have now been before the public for a period of 30 years, and during that time have mate-tained a high character in almost every part of the globe for the extraordinary curative properties which

Moffat's Life Pills.

Moffat's Life Fills are indebted for their name to their manifest and sensible action in purifying the springs and chansels of life, and enduing them with renewed tone and vigor; and to the undoubted fact that at a very curly part is their history, they had rescued sufferers from the very verge of an unitimely grave, perfectly securing to them that uniform enjoyment of health, without which life itself is but a partial biessing. So great indeed had their efficacy invariably proved, that it was scarcely less than miraculous to those who were unacquanited with the beautiful philosophical principles upon which they were compounded, and upon which they consequently act. Moffat's Life Pills are indebted for their name to their

MOFFAT'S PHŒNIX BITTERS.

MOFFAT'S PHENIX BITTERS.

Moffat's Pheenix Bitters are so called, because they possons the power of restoring the expiring embers of health to a glowing vigor throughout the constitution, as the Pheenix is said to be restored to life from the askes of its own dissolution.

Mercurial Discusses,—There is probably no one article given as a medicine, the injudence use of which has engsed such wide-spread and terrible mischief to the human system as mercury. Its poison sinks deep into the system, penetrating the substance of the bones, and producing a long train of painful diseases. It is well known that many affections of the throat, of the bones, of the nose, and malignant sores, which have occur atributed to syphilis, are so often caused by the injudicious use of mercury, so that the remedy has proved worse than the disease.

LIFE FILLS AND PHENIX BITTERS.

The Life Filts and Pheenix Bitters have always been

LIFE PILLS AND PHENIX BITTERS.

The Life Pills and Phoenix Bitters have always been signally successful in this class of diseases, and will cradiente all the effects of mercury from the system, somer than the most powerful preparations of sarsaparilla. They aid nature in casting from the system all poisonous matter, and by thus purifying the vital fluids, they restore the system to leadth.

Bitious Complaints.—A well regulated and proportionate quantity of bile upon the stomach is always requirate for the promotion of sound health—it stimulates digestion, and keeps the infestinal canal free from all obstructions. On the interior surface of the liver is a peculiar shadder in which the bile is first preserved, being formed by the liver from the blood. Thence it passes into the stomach and intestines, and require the digestion. Thus we see when there is a deficiency of bile, the body is constantly costive. On the other hand, an over abundance of bile enuses frequent nauses on the stomach, and often promotes very severe attacks of diseases, which sometimes end in death.

LIFE MEDICINES.

LIFE MEDICINES.

The Life Medicines should, if possible, be taken in the early stages of bilious complaints; and if perse-vered in strictly according to directions will possitively ffect a cure. Their extensive use in this complaint in all parts of our continuat, renders comment unnecessa-y-their virtues speak for them. Mediat's Life Fills.—The use of these Fills, for a very all parts of our continent, renders comment unnecessary for seed, as it requires from twelve to fifteen bushels to the acre, and the over stocking of every hill tending to produce a great many small potatoes. The medium size removes these objections, furnishes just about seed enough, stocks the hills sufficiently, and preserves the health of the plant. This practice we have followed for several years, and on the whole it gives the best results.

If we admit the theory to be correct on which the practice is founded, it would not follow that it would in every case preserve the crop from disease. Almost every variety has beed subject to cutting and to disease for many years, and no one can be perfectly sure that he plant a sound heal thy tuber if the size is everything desirable. If the constitution has been wenkened in any way it is much more likely to be interested and produced with the plant and the disease after an another of the sufferest themselves. In the constitution has been wenkened in any way it is much more likely to be interested and produced and present the constitution has been wenkened in any way it is much more likely to be interested and present the constitution has been wenkened in any way it is much more likely to be interested and produced and present the present and present the constitution has been wenkened in any way it is much more likely to be interested and present the present and present the present and the sufferent present the present and the present and the sufferent present and the present and the sufferent present and the sufferent present and the present and present and the present and th

useless.
Indigestion and Dyspepsia.—If we were called upon

A Good Home-Made Yeast.—Mrs. J.

Foote, of Onandaga county, N. Y., writes to the American Agriculturist thus: "A

Life Pills and Phoenix Bitters.

The Life Pills and Phoenix Batters are, perhaps, the best remody for rectoring strength to the body, for, the act as a gentle cartacriic, and, by their tonic qualities rengthen the whole system Modat's Life Pills.—Persons of a plethoric habit, wh are subject to fits, headache, giddhess, dimness of sight, or drowsiness, from too great a flow of blood to tee head, should take these Pilis frequently.

ADVICE TO FEMALES.—Females who value their leafth should never be without the Life Medicines, as they purify the blood, remove obstructions, and give the skin a beautiful, clear, healthy and blooming appearance.

To Elderly Fersons.—Many healthy aged individuals
who know the value of Modat's Life Medicines, make
it a rule to take them two or three times a week, by
which they remove the causes that produce discase
preserve their health, and keep off the infirmities of

age.

Pacts for Mothers and Norses.—It is a fact, established by the annual bliss of mortality, that one half of the children berne are cut off before attaining seven years of gge; and the furtful source of this mortality as found to exist in that foul state of the stomach and loweds which produced the generation of worms. As also safe restorer of infantile health in this critical state the Lafe Medicines have long held a distinguished reputation, and for foulness of the stomach and bowels, and convulsions, although worms may not exist, it is allowed. ulgions, although worms may not exist, it is allowed

be superior to any other.

Modat's Pills and Bitters.—No medicines at present mown have done so much good to mankind as there, within the last few years; and certainly none have en rewarded with more numerous and authentic tes nonials of their invariable and extensive ethency. They require no dicting nor confinement, are perfectly ild and pleasant in their operation, but will power-illy restore health—that greatest of carthity blessings to the most exhausted and displasted conglitutions.

RAW-BONE

uper-Phosphate of Lime. Little need he said to recommend this article—its peculiar merals as a vinorous and lasting manure having
firmly established it in the popular favor. We would
state however, that not only having a continued care to
maintain its standard efficacy, we have sought to render it more immediate in its action, by the addition of a
small quantity of best Perucian Cuano. We do not
claim by this improvement, (which was made during
the past year, and without publicly noting the fact, our
Super-Phosphate is rendered any more lasting in itsleffoct, or in any way benefited, except in ensuring a quicker action on application.

PRICE, \$45 per 2000 lbs .- CASH.

GROUND RAW BONES. This article is ground without any previous preparation, and contains att the organic matter of the bones it is warranted pure.

PRICE \$35 per 2000 lbs .- CASH. 37 The above Manures can be had of regular Deal-ors or of BAUGH & SONS, No 20 South Wharves, Philadelphia. February 15, 1802—3m.

Ayer's Sarsaparilla

A compound remedy, in which we have be bored to produce the most effectual alterative that can be made. It is a concentrated extract of Para Sarsaparilla, so combined with other substances of still greater alterative power as to afford an effective antidote for the diseases. to afford an effective antidote for the diseases Sarsparilla is reputed to cure. It is believed that such a remedy is wanted by those who suffer from Stramous complaints, and that one which will accomplish their cure must prove of immense service to this large class of our afflicted fellow-citizens. How completely this compound will do it has been proven by experiment on many of the worst cases to be found of the following complaints:—

of the following complaints: - SCROFULA AND SCROFULOUS COMPLAINTS, ERUPTIONS AND ERUPTIVE DISEASES, ULGERS, PIMPLES, BLOTCHES, TUMORS, SALT REGUM, SCALD HEAD, SYPHILES AND SYPHILITE AFFECTIONS, MERCURIAL DISEASE, DROPSY, NEU-RALGIA OR TIO DOULOUMBUX, DEBILITY, DTS-Papsia and Indicastion, Envirences, Rosa on Sr. Anthony's Fire, and indeed the whole class of complaints arising from IMPURITY OF

THE BLOOD.

This compound will be found a great promoter of health, when taken in the spring, to expell the foul humans which fester in the blood at that season of the year. By the time-ly expulsion of them many rankling disorders are nipped in the bud. Multitudes can, by the aid of this remedy, spare themselves from the endurance of foul eruptions and ulcerous serss, through which the system will strive to rid itself of corruptions, if not assisted to do this through the natural channels of the body by an alterative medicine. Cleanse out the vitiated blood whonever you find its impurities bursting through the skin in pimples, eruptions, or sores; cleanse it when you find it is ch-structed and sluggish in the veins; cleanse is structed and sluggish in the veins; cleaned it whenever it is foul, and your feelings will tell you when. Even where ne particular disorder is felt, people enjoy better health, and live longer, for cleansing the blood. Keep the blood healthy, and all is well; but with this pabulum of life disordered, there can be no lasting health. Sooner or later something

must go wrong, and the great machinery of life is disordered or overthrown.

Sarsaparilla has, and deserves much, the reputation, of accomplishing those ends. But the world has been egregiously deceived by preparations of it, partly because the drug alone has not all the virtue that is claimed for it, but more because many preparations, pretending to be concentrated extracts of it, contain but little of the virtue of Sarsaparilla.

or any thing else.

During late years the public have been misled by large bottles, pretending to give a quart of Extract of Sarsaparilla for one dollar. Most of these have been frauds upon the sick, for they not only contain little, if any, Sarsaparilla, but often no curative proporties whatev-er. Hence, bitter and painful disappointment has followed the use of the various extracts of Sarsaparilla which flood the market, until the name itself is justly despised, and has become synonymous with imposition and cheat. Sull we call this compound Sarsaparilla, and intend to supply such a remedy as shall rescue the name from the load of obloquy which rests upon it. And we think we have ground for believing it has virtues which are irresistible by the ordinary run of the discusses it is intended to cure. In order to secure their complete cradication from the system, the remedy should be judiciously taken according to directions on

LOWELL, MASS. Price, 81 per Bottle; Six Bottles for \$5. Ayer's Cherry Pectoral,

has won for itself such a renown for the cure of every variety of Throat and Lung Complaint, that it is entirely unnecessary for us to recount the evidence of its virtues, wherever it has been employed. As it has long been in constant use throughout this section, we need not do more than assure the people its quality is kept up to the best it ever has been, and that it may be relied on to do for their relief all it has ever been found to do Ayer's Cathartic Pills,

FOR THE CURE OF Jaundice, Dyspepsia, Indigestion Dysentery, Foul Stomach, Erysipelas, Headachs, iles, Rheumatism, Eruptions and Ekin Disease Liver Complaint, Dropsy, Titter, Tumors and Salt Rheum, Worms, Gout, Neuralgia, as a Dinner Pill, and for Purifying the Blood.

They are sugar-coated, so that the most sensitive can take them pleasantly, and they are the best aportent in the world for all the purposes of a smally physic. Price 25 cents per Bex; Five boxes for \$1.00 Orent numbers of Clergymen, Physicians, States men, and eminent personages, have lent their names to certify the unparalleled usefulness of these remedies, but our space here will not permit the insertion of them.
