But if planted with corn they should in no wise interfere with the thorough cultura of the corn. A good plan is to drop seed in every other hill, to secure good seed. The medium sized, round dark orange colored, fine grained varieties are best keepers. The cheese pumkin is preferable for family use or for market.

Like the parsnip, the Ruta Baga is not cultivated by our farmers to the extent it sught to be though much more generally than the former. It is not nearly so diffi cult of cultivation as the parsnip, though it also requires care and high ferming to render vertain large crops. We have heard of twelve hundred bushels being raised upon an acre, and we have viewed crops which yeilded about eight hundred bush-

The seed should be sown not later than the 25th, or at farthest the 28th of July, though some farmers sow it much earlier. About the middle to the 20th of July is perhaps the best period for this Intitude If the soil is mellow and rich, the Ruta Baga will grow anywhere. It is, like the parsnip, a very hardy plant, and can be allowed to remain in the ground until late in November.

Sow the seed in drills twenty eight or thirty inches apart, and when the plants are well up thin out to about eight or ten inches, thee cultivate between the rows and hee or use the hand to remove the FOR SEWING MACHINES. weeds between the plants. Cleanly cultivation is very important in this crop. It will take about one pound of seed per acre.

The ruta baga buried in pits, or stored in barn-cellars, keeps in excellent condition through the winter, and will be found to promote vastly, the health of cattle and the productiveness of the dairy .- Germantown Telegraph.

PUMPKINS ALONE AND AMONG CORN.
—Doubtless thousands of the readers of the Agriculturist regard the corn field as the only place for raising pumpkins. But, however little the harm that pumpkins do the corn—and we believe that in good seasons they produce a quantity of food which much more than countor-balances the evil which they may do—they will yeild a much larger and finer product if planted by themselves. Putting the hills 8 feet apart, two or three good shovelfulls of well rotted manure being dropped on the surface and covered by a little earth, the pumpkins will luxuriate in unobstructed sunshine and upon the fat of the land; and when Autumn strips away the leafy covering under which they are hid, a golden harvest will be disclosed which will do one' sheart good. Ayer's Sarsaparilla

of Para Sarsaparilla, so combined with other substances of still greater alterative power a to afford an effective antidote for the diesas-Sarsaparilla is reputed to cure. It is believed that such a remedy is wanted by those win suffer from Strumous complaints, and that of which will accomplish their cure must proof immonse service to this large circs of of immense service to this large chose of me addicted fellow-citizens. How completely this compound will do it has been proven by experiment on many of the worst cases to be fessel of the following complaints:

SCROPPLA AND SCROPPLOUS COMPLAINTS.

SCROFULA AND SCHOPULOUS COMPLAIND, ERUPTIONS AND ERUPTIVE DISEASES, ULGES, PIMPERS, BLOTCHIS, TOMORS, SALE RIBER, SOALD HEAD, SYPHILES AND SYPHILES AN PROTIONS, MERCURIAL DISEASE, DROPSY, No. RAIGIA OR TIC DOLLOUREUX, DRIGHTY, DYS-PERSIA AND INDIOESTICS, ERYSIPPEAS, ROLL on Sr. Anthony's Fran, and indeed the who class of complaints arising from IMPURITY of

This compound will be found a great promoter of health, when taken in the spring, to sape the foul humors which fester in the blood at that season of the year. By the time, by expulsion of them many rankling disorder are nipped in the bud. Multitudes can, by the aid of this remedy, spare themselves from the endurance of foul cruptions and ulcerose sores, through which the system will strive to give itself of corruntions, if not assisted to do rid itself of corruptions, if not assisted to do this through the natural channels of the body by an alterative medicine. Cleanse out the vitiated blood whenever you find its impurite bursting through the skin in pimples, emption, or sores; cleanse it when you find it is obstructed and sluggish in the veins; cleaned whenever it is foul, and your feelings will to you when. Even where no particular disorder is felt, people enjoy better health, and live longer, for cleansing the blood. Keep the blood healthy, and all is well; but with the pabulum of life disordered, there can be insting health. Sooner or later somethis must go wrong, and the great machinery of life is disordered or overthrown. Sarsaparilla has, and deserves much, the

reputation, of accomplishing these ends. E the world has been egregiously deceived by preparations of it, partly because the dra glone has not all the virtue that is claims for it, but more because many preparations pretending to be concentrated extracts of it contain but little of the virtue of Sarsaparilla

or any thing else.

During late years the public have been misled by large bottles, pretending to give a quan of Extract of Sansaparilla for one dollar. Mest of these have been frauds upon the sick, for they not only contain little, if any, Sarsapa rilla, last often no curative properties whater-er. Hence, bitter and painful disappointment has followed the use of the various extracts of Sarsaparilla which flood the market, until the name itself is justly despised, and has become synonymous with imposition and cheat. Sol-we call this compound Sarsaparilla, and intendto supply such a remedy as shall rescue to name from the load of obloquy which retupon it. And we think we have ground a believing it has virtues which are irresistally by the ordinary run of the diseases it is intend ed to cure. In order to secure their comple eradication from the system, the remedy sho be judiciously taken according to directions a
