

IMPORTATION OF WOOL-A HINT TO SHEEP RAISERS.

It is a fact worthy of notice that while the increased demand for the sorts of wool needed for broadcloths, cassimers, etc., is being partially met by increased production, as yet little has been done to furnish supplies of the staple required in goods substituted for cotton; that is for the warps of worsteds, delains, etc. The wool needed for this use is that which will make the smallest and strongest thread with the least nap from the smallest amount of stock. This is furnished in the greatest excellency by the Leicester, Cotswold, and kindred breeds, and as comparatively very few of these sheep are raised in this Prints, country, the great bulk of wool needed for manufacturing purposes here, must be imported. Accordingly it is found that the importations during the present year have by far exceeded those of any previous period. The amount received during the past six months has very nearly if not quite equalled the whole quantity imported in 1862, and is greater than that brought in during both 1860 and 1861. But owing to the demand upon the other side of the Atlantic for a similar article the price has advanced to an unprecedented figure, and such wool now commands, and price far beyond its actual relative worth as compared with wool of finer staple. In other words, a larger amount of money can be realized for wool by investments in these breeds of sheep. Now it behooves American farmers to reap a share of the advantages thus offered. Heretofore, the raising of the coarser bodied sheep has advocated on the ground of producing superior weigth and quality of mutton, and the advantage, if any, in this respect, is not less now than formerly, as any one will find who indulges in the luxury of this meat at present prices. The matter is worth thorougly looking into by those who are about stocking their farms with sheep. Some enterprising men will reap a good return from importing improved flocks of these breeds, and we shall be pleased to chronicle their succes. American Agriculturist.

LESSONS OF THE DROUTH.

How often have farmers read of the importance of draining; deep plowing, thorough pulverization of the soil, and other elements of good husbandry! Hus why their corn rolls up its leaves so much worse than that of more careful farmers, and why most of their crops dry so badly in mid-summer. Has not this been the experience of some the present year ?-They complain bitterly of the season, of Providence, of everything except their own management. Now and then they visit other farms where the land is well drained where subsoil plows are owned and used where the manure heap is constantly building and no part of it is suffered to waste, and where all the farm implements are kept bright by use; and here they find the crops almost unaffected by drouth.-Their eyes are opened a little, and they Bloomsburg, Columbia County, Penna. begin to see that there is something in thora hundred or more dollars annually, in the crops saved from drouth, or increased in a hundred or drouth, or increased in a hundred or more dollars annually, in the crops saved from drouth, or increased in a hundred or drouth, or increased in a hundred or drouth, or increased in a hundred or drouth or increased in a hundred or more dollars annually, in the constantly formed with the choicestriquers.

REMAINS OF GIGANTIC ANIMALS .-Russian geologists are making preparations to promote the discovery of concealed remains of mammoth animals in Siberia. It is stated that during the last two centuries at least 20,000 mammoths, and probably GLOVES thrice that number, have been washed out of the ice and soil in which they were imbedded by the action of the spring floods. The tusks only have been preserved for for their commercial value in ivory. An effort is now to be made for the discovery and preservation of one of these carcasses as perfect and entire as possible as it is considered that microscopic investigation of the contents of its stomach might throw a powerful light on a host of geological and physiological problems.

Dr. WM, H. GREGG-Darr Sir: In Febuary, 1801, 1 was affliced with the sugar diabetes and for five months I passed more than two gallous of water in twenty-four hours. I was obliged to get up as often ten or twelve times during the night, and in five months I lost about thy pounds to weight. Durating the month of July, 1801, I procured two bottless of Constitution Water and in two days after using it I experienced relief, and after raking two bottless I was entirely cured, soon after regaining my usual good health. Yours truly.

Gents:—I feeely give you liberty to make use of the following cirrificate of the value of Constitution Water, which I can recommend in the highest manner.

My wife, who was attacked with pain in the shoutders, whole length of the back, and in her limits, with Palpitation of the heart, attended with Palling of the Womb, Dysmenorthoes, and "Irritation of the Bladder," I called a physician, who attended her aheat three months, when he left her worse than he found her. I then imployed one of the hest physicians I could flied, who attended her for about nine months, and which she was under his care she did not suffer quite as much pain; he flually gave her up and said: "Her case was incurable." For, and he, "she was such a combination of complaints, that medicine given for one operates against some other of her difficulties."—About this time she commenced to use Constitutions Wayre, and to our after astonishment, almost the first dose seemed to have the daired effect, and she kept on improving rapidly under its treatment, and new superintends enfirely her domestic affairs. She has not taken any of the Lon victios Wayre for about four weeks and we are happy to say that it has produced a permanent cure.

Wm. B. BRADBURY'S PIANO-FOR TEESTABLISHMENT

No. 427 Broome Street, NEW YORK. The subscriber respectfully invites the attention of his friends and the public generally to his Piano-Fortu Establishment at No. 427 Broome Street, concr of Crosby itreet. Having withdrawn his interest, steek and materia from the late firm of "Lighte & Bradsburry," which firm

Having withdrawn his interest, stock and material from the late firm of "Lighte & Bradsburry," which firm was dissolved on the dist January ult, and having purchased the entire stock of Piano Fortes and Piano-Forte Material owned by his brother. Edward G. Bradbury, in the said firm, he is now preparated to supply the increased demand for his c-tebrated Piano Fortes. Employing the most skilled and experienced workmen, with a large stock of the best and most there oughly seasoned material and an abundance of capital he has taken in base the personal supervision of the the whole business of manufacturing his instuments and its orable to turn out Piano-Fortes of unequalled tone and durableness.

BRADBURY'S NEW SCALE PIANO FORTE. In the arrangement of our new scale, drawn and pre-pared with the atmost care, expressly for our new instruments, we have added every improvement which can in any way tend to the perfection of the Figure Form, and we can confidently assert, that for delicacy of touch volume, purity, brilliancy and sweetness of tons, combined with that strength and solidity of frame necessary to durability, these instruments are unc-santed. "MARCHGIN AND HEATT" is our motto, and we invite the closust criticism of the best unbiased judges in the land.

Every instrument warranted for five years, WM, B. BRADBURY, 427 Brosme St., cer. of Crosby, New York. March 14, 1862.—3m
