farmer's Column.

FEED THE SOIL. AND IT WILL FEED YOU.

It is a remarkable, not less than a well established fact, that our grain crops, taken as a whole, are rapidly deteriorating -that some of our finest wheat-growing districts have ceased to give any encour- Cloths, Cossimers and Jeans, for Men and agement to the cultivation of that cereal, and that only in a few districts is a fair average crop obtained. That such should be the case is less surprising than melan- | Hosiery, Gloves, Embroidering Braids, & choly. What else have we a right to expeet from our present system of farming ? True, we boast a large surplus of wheat and corn for export, but we owe this surplns. not to a fair average product per Ladies' gaiters, builet suppers, children's gaiters and a large stock to acted from at all prices. Tranks and all club, such that at the prices. Tranks and all club, such as a large stock to acted from at all prices. Tranks and all club, such as a large stock to acted from at all prices. cultivation. Unfortunalely, we have not yet, as an agricultural people, discovered the pernicious errors into which Europeon agriculturists fell years ago, and which threatened to, and did absolutely reduce the cultivation of the soil to downright Dr beggary.

'I he same unwise system prevailed, and still prevailes in the United States, though perpaps, to a smaller extend now than twenty years since. Virginia presented a fair illustration of the skinning system, by Danc Harn. which the land was cropped and cropped for successive years, or just as long as it would yield crops at all remunerative; then, like many faithful old horses, it was turned out, and left to shift for itself.— Data for the second The most cursory glance at our present Liour Gauss, general system of farming, ought to con-vince every thinking farmer, that in the Hats Fothers, Kid Goves, Children's

end it must prove, if not ruinous, at least not remunerative. The farmer who cal. DE-A SAVING OF SO PER CENT. The tivates wheat, corn and oats, sells at that his family and stock do not consume, and an be reduced from the same by: The process is simple, and any one can use the Dys with perfect sucreturns to the land only the stable ma- Cess. Directions in English. French and German, insele of returns to the land only the stable ma-nure produced by his stock, is doing as much as could reasonably be expected of him towards impoverishing his soil, and leaving an unproductive farm for his chil-dren. English farmers tried the plan, but were compelled to abandon it to save themselves from starvation. American farmers, it they persist in it long enough, will have to do as the Englishmen did- THE people of the county of Columbia feed the soil, if they would have it feed has them. By a liberal system of maouringthorough under draining, perfect tilth of IN BLOOMSBURG, THE BEST AND CHEAPEST soil, and a rational system of rotation, we may repair the damages already sustain. ed; but a persistence in our present sys-Note. MATTSON waters ; have learned to know from their was awarded the Prize Modrapidly deteriorating yields per acre, that that competitions in the forces no soil will bear continuous cropping for States for his improvements no sent will bear continuous cropping for any great length of time without a certain steady decrease, and that utter sterility will follow as certainly as that day lob-lows night, if each crop be not succeeded by as great an amount of the elements of fertilization, as we removed from it in the fertilization, as we removed from it in the

form of seed, straw, hay, &o.

If there be a question in the mind of care any one as to the propriety or expediency of a reform in this particular, we refer them to English Agricultural Statistics, which present in unmistakable and irrefutable characters, the wisdom and importance of giving back to the soil, as much, at least, as our crops take from it, and ac. for Colleries, Blast Furnaces, Stationary Engines, Mills cepting as our portion of the profits that which the atmosphere so generously contributes .- Farmer & Gurdener.

DEEP SOIL.

Whatever the advocates of shallow cui-tivation may say to the contrary, there is Bisamsburg Sept. 12, 1603. no questioning the fact that in a larges majority of cases, there is decided advantages in deep tillage. Not every soil, it is true, will admit of deep cultivation, but Post Office, Philadelphia. there are few which might not be cultivated This well known establishment maintains its usual Celebrity, and its well known reputation of being to a greater debth, than is usually done. A few years since, there was every reason to suppose that the Subsoil plow would be larged fatting Departments are furnished with an entry be and at all hourscome into general favor. Hundreds and thousands of farmers bought them, with and delicacies of every clime may be had at a mome 1's the fixed intention of using them regularly. Some did and do still use them, but that no expense will be spared to render this flote a the majority appear to have thrown them aside, for what reason, we fail to under-March 7, 1863-Dni. stand. Look to Europeon countries, where labor is cheap, and where the necessities of the people demand that the land should wherever the Subsoil plow is not used, there the spade and the digging fork, are produce all that it is capable of producing brought into requisition, and with such results, as ought to convince the most skeptical of their immense practical utility .---The thorough stirring of the soil imparts to it a fertility of power, which a shallow soil does not and cannot possess. Let your soils, therefore, be deeply stirred, and INVITES the attention of every reader of this paper, which includes many thousand of his old patrons and acquaintance-To his of his old patrons and acquaintance-To his automula farge and keautiful varity of AMERICAN and IMPORTED WATCHES, CLOCKS and elegant designs of HewELRY, Silver Ware, Sc.
