

Farmer's Department.

DR. WISHART'S PINE TREE TAR CORDIAL

DISCUSSION ON GRAPES.

At the last meeting of Fruit Growers, in Rochester, New York, some very sensible remarks were made by several gentlemen on the subject of grape-growing and wine-making.

Dr. Sylvester said we had made our vines sickly by our manuring, and maintained that where the ground was rich enough to raise corn, it was rich enough for grapes.

Dr. Underhill used trellises 9 feet high, having increased the height from 6 feet. He claims that the vines become more valuable at they get older—23 years old are more valuable than from 12 to 15, with him.

STARTING EARLY POTATOES

A crop of potatoes ready for the table early in June, may be secured without great trouble. If seed potatoes are brought into a warm room about the first of March the eyes will start rapidly, the nourishment in tubers will sustain them for two or three weeks, by which time they may easily be planted out in some favorable spot.

MANURE OF DIFFERENT CLASSES OF ANIMALS.

Cows in full milk or with calf, secrete from their feed great quantities of valuable substances which fattening cows or oxen will not withdraw from what they eat—hence the manure of the milch cows is not worth nearly so much as that of fattening animals.

A Floral Curiosity may be produced by taking a stick of elder, boring out the pith, filling the cavity with good earth, and sowing in it the seeds of several flowers that bloom at the same time.

THE VITAL PRINCIPLE OF THE VINE TREE.

Claimed by a peculiar process in the distillation of the juice by which its highest medicinal properties are retained. It is the medicine that cures when all others have failed.

A Great Remedy for Consumption.

I am constantly receiving such certificates as the following. READ IT! Have you a Cough? Have you Spite Throat? Have you any of the pulmonary symptoms that attend Consumption?
