## TO ALL INVALIDS. IRON IN THE BLOOD.

7 00
15 00
15 is well knows to the medical profession that IRON is the Vital Principle or Life Element of the blood.-This is derived chiefly from the food we est; but if the food is not preperly liggested, or if from any cases what ever, the necessary quantity of iron is not taken into the circulation, or h-comes reduced, the whole system 3 000 suffers. The had 'dood will rentate the heart, will clog up the lungs, will obstract the liver and will send its discase-producing elements to all parts of the sys-tem, and every one will suffer in whatever organ may be predisposed to discase.

Never let the Bowels be either confined or undaily acted upon. It may seem strange, that Hol-loway's fills should be recommended for Dysentery and Flax, many persons supposing that they would increase the relation. This is a great mistake, for these Fills will correct the liver and stamach, and thus remove all the acrid humors from the system. This medicine will give tone and vigor to the whole organic system, however deranged, while health and strength follow as a matter of course.
