Thrifty and Careless.

Two girls sat in Mrs. North's nursery one cold January evening to enjoy the comfortable fire. The maid of all works was busy beside the evening lamp repairing an old gingham apron. It was a very unpromising piece of work when she began, but she worked away with a cheerful good will, and soon its appearance was inconvenience; she had three hendred dollars out at interest, a legacy from her grandmother, but she prudently let it remain where it was, content with receiving her interist from it every year, and supplementing it with her earnings. Many had said to her they would not live out, now they could do better. "Why not invest her money learning a trade, which would be far more genteel?" But Susan was s'out and hearty, work agreed with

Effect of Laziness.

A tazy boy makes a lazy man just as sure as a crooked supling makes a crooked tree. Think of that, my little lads. Who ever saw a boy grow up in idleness that did not make a lazy, shiftless vagabond when he was old enough to be a man, though he was not a than in chareter, unless he had a fortune left him to keep up appearance? The great mass of thieves, raupers, and criminals have come to what they are by being brought up to do nothing useful. All those who are good men now, and useful to the community, were industrious when they were boys. If you do not like to work now, a love for industry can soon be accouired by habit. So. my little reader, I want you to look around at once for something to do, in doing which you can benefit somebody. Shun Idleness as you would the evil one.

GOOD ADVICE .- If the body is tired, rest; if the brain is tired, sleep. If the bowels are loose, lie down in a warm bed and remain there, and eat nothing until you are well. If an action of the bowels does not occur at the usual hour, eat not an atom till they do act, at least for thirtysix hours; meanwhile drunk largely of cold water or hot tens, exercise in the open air to the extent of a gentle perspiration, and keep this up till things are righted this one suggestion, if practiced, would save myriads of lives every year, both in the city and the country. The best medicines in the world are warmth abstinence
