This certifies that I have used the Phoenix Pectoral is my family, and I recommend it to the public as the very best remedy for Cough and Colds that I have ever tried. One of my children was taken with a cold, accompanied with a Croupy Cough, so had, indeed, that it could not talk and breaths. Briving heard so much said about the thoenix Pettoral I procured a bottle of it. The first dose relieves the difficulty of breathing, and before the child had taken one-fourth of the hotte it was entirely well. Every family should have it in their house.

J.C. A FEW REASONS WHY THE

Remarkable Cure of Stiff Knee by Alflock's Porous Plasters.—How many persons,
from stopping on a piece of ora ige poet, have been
tamed for life. A case of which might have been of
this kind has just been brought to our notice. A gentleman, from placing the heel of his boot on a piece of
crange peet, was suddenly thrown down, and violent
by sprained his kness. He was six months confined to
the house, though he had the best heelical advige. As
a last resort a very eminent physician was called in
to see if anything more could be done. After examin-

name indicates—Solid, Substantial, and always Reliable—warranted to stand any amennt of Marching Riding or Fighting.

Our Next Higher Quality of Watch (numed F. 8 Restlett) is similar in size and general appearance, but has more jewels, and a more elaborate finish.

O'R LADIES WATCH, recently brought out is put up in a great variety of patterns, many of them of lare beauty and workmanship, is quite small, but warranted to keep time.

The proof of the merits of our Watch may be found in the fact that we now employ over seven hundred workmen in our factories, and that we are still mable to supply the constantly increasing demand.

Our Three parter Plate Watch is thinner and light or than the others we have described. Its flue chrone meter balance is delicately adjusted to correct the variation caused by changes of thinperature. These Watches are the fruits of the latest experiments in thromometry and are made by our best workmen, in a separate department of our factory. For the fluest time keeping qualities they challenge comparison with the ness works of the most famious Englishs and Swiss makers. ROBBINS & APPLETON.

AMERICAN WATCH

THE PLAN OF THE AMERICAN WATCH Instead of being made of several hundred fittle pieces, screwed together, the body of the American Watch is formed of sound riariss. No jar interferes with the harmony of its working, and no sudden shock can throw its machinery out of gear in riding or any business pursuit, it is all held together as firmily as a single piece of metal. It is just what all machinery should be—
