IS THE REST.

IT is made in the best principle, while the foreign watch is mostly made on no principle at all. Toreign watch is mostly made by women and buys. I stand. White their labor is clean, their work is do st any price. Sech watches are made without plus and sold without guarantee. They are tregular construction, and quite as irregular in movement. They are designed only to self, and the buyer is tiparty most thoroughly sold. Those who have see ancres, "tepines" and "Swiss levers" in profess, experies for a few years will appreciate the truth of estatement.

THE PLAN OF THE AMERICAN WATCH. Instead of being made of several handred little pincas, screwed together, the body of the American Watch is formed of some reserva. No jar interferes with the harmony of its working, and no sudden shock can throw its machinery out of gear. In riding or any businesse pursuit, it is all held together as firmly as a single piece of initial. It is just what all machinery should be let a SIMPLE. M. STRONG the ECONOMICAL.

We not not only secure Cheaphram by our system, but Quality. We not pretend that our Watch can be hought for less money than the foreign Make believes, but that for its rest value it is sold for one half the price.

Our Soldier's Watch (named Wm, Ellery) is what its name indicates Solid, Substantial, and always Reliable warranted to stand any amount of Marching

name indicates—Solid, Substantial, and always Reinbie—warranted to stand any amount of Marching Ruding or Fighting.

Our Next ligher Quality of Wateh (named F. B. Bastiett) is similar in size and general appearance but has more jewels, and a more elaborate finish.

OUR LABIES WATCH, recently brought out is put up in a great variety of patterns, many of them of rare heavily and workmanship, is quite small, but warranted to keep time.

The proof of the merits of our Wateh may be found in the fact that we now employ over seven hundred workmen in our factories, and that we are still unable to supply the constantly increasing demand.

Our Three spetce Flate Watch is thorier and lighter than the others we have described, its flue chrono meter biance is dedicately siljusted to correct the variation caused by changes of temperature. These Watches are the fruits of the latest experiments in chronometry and are made by our bast workmen, in a separate department of our factory. For the fluest time keeping qualities they challenge comparison with the best works of the most famious English and Swiss makers. ROUBLINNS & APPLETON.
