of the worst disorders that afflict mankind arise from the corruption that accumulates in the Bood. Or all the dis-coveries that have been made to purge it out, none can equal in effect Helmhold's Compound Extract of Sas-Sapanilla. It cleaness and renovales the Blood, instille the vigor of health into the system, and purges out the humors which make disease. It stimulates the healthy functions of the body, and expels the disorders that grow and rankle in the blood. Such a remedy that could be relied on has long been sought for, and now, for the first time the public have one on which they can depend. Our space here does not admit of cartificates to show its effects, but the trial of a single bottle will show to the sick that it has its virtues surpassing anything they have over taken. Two tablespoorsful of the Extract of Sarsaparilla added to a pint of wathr is equal to the Lisbon Dist Drink, and one bottle is fully equal to a gallon of the Syrup of Sarsaparilla, or the despetion as usually made.

HELMBOLD'S ROSE WASH,

An excellent Lotton for diseases arising from habits of dissipation, used in connection with the Extracts Buchu and Sarsaparilla, in such diseases as recommended. Evidence of the most responsible and reliable character will eccompany the medicines. Also explicit directions for use, with hundreds of thousands living witnesses, and upwards of 50,000 unsolicited certificates and recommendations. tory letters, many of which are from the highest sources. including eminent Physicians, Clergymen, Statesmen, &c. The Proprietor has never resorted to their publication in the newspapers; he does not do this from the fact that his articles rank as Standard Preparations, and do not need to be propped up by certificates. The Science of Medicine, like the Dorle Column, should stand simple, pure, majestic, having Fact for its basis, Induction for its pillar, and Trath alone for its Capital.

My Extract Sarssparille is a Blood Purifier; my Extract Buchu is a Diuretic, and will not as such in all ences. Both are prepared on purely scientific principles—in egono—and are the most scrive measures of either that can be made.
