 Chronic diseases of the Chert, Pleurisy, Brouchits, Catarih, etc., Scrotulas in all its forms, Teiter, Scuff Head, Cutaneous affections of the face and extremities, Chronic enlargements of the Joints, White Swelling, Syphitic Affections, Constitutional disorders, arising from debility, Mercurial and Hereditary predispositions, &c.
 The very change that is taking place in the body, it is manifest that it is brought about by something having a substantive existence. If we suppose the organs of our body originally perfect, they must continue perfect unless changed by the intervention of something that bears an unhealthy relation to it. In all cases of disease, there must be the interposition of some new ingredient, which by playing its part as a couse served with the body. It is absurd to tak. of spontaneous disease taking place in organs previously healthy without the interposition of some morbile agent, as well might we expect a piece of chalk to transfer itself spontaneous disease taking blace in organs previously healthy without the interposition of some theory into Plates of Paris, without the ind of Sulphuric Acid. In all disease there is a prior cause which must be removed, through the agency of the Blood. For this purpose there is no remedy superior to the PLANCE.
