Christopher William Hoofland.

"One of the most renowned physicians one of the greatest benefactors of modern times, was born at Langen Salza, Germany, on the 12th day of angust 1762. After a careful scholastic education, he, like his father and grandfather, (two celebrated Doctors.) voluntarily devoted himself to the study of Medicine, at Jena and Gottigen, and in 1783 obtained the degree of Doctor of Medicine, at the latter University. From 1793 to 1801, he officiated as Professor at the University of Jena. In 1801, he was appointed Private Physician to the King of Prussia, Member of the Academy of Science, and upon the establishment of the near College at Berlin, Professor and Court Physician by the Ministry of the Interior. His characteristic profoundness and deep penetration enabled him to combine the theoretical and praetical; to udite old and new systews; produce in common the practical and useful, and thus draw therefrom the results and necessary applicable means.

therefrom the results and necessary applicable means.

"It was Dr. H. principally, who exposed and destroyed the 'Brown's System,' which, notwithstanding the brilliant exterior, could not conceal its many imperfections, brought to light by Hoofland's noble impartiality, sound truths, and deep penetration. Independent of his practical usefuluess as Physician and Professor of the healing art, he has carned uddying fame for his superior knowledge in Materia Medica, as well as for his manifold works on Medical jurisprudence. Among these may be mentioned his world renowned 'Makrobeolik, or the art of prolons, ing life, 'System of practical healing art," 'Ideas of Pathogenic,' Journal of practical Medicine,' &c. He has besidesall this gained eternal iame and praise from suffering humanity for the 'siscovery and combination of several it: allible medicinals, among which is the far ramed and justly celebrated compound, known as

In view of the above facts it seems singular, that any body could have the hardihood and impudence to abuse the name of this distinguished Doctor, who died thirteen years ago. To pass off a charlata quack preparation as the real and genuine medicine, and to give a semblance of originality by affixing a fue simile of the deceased, is indeed extraordinary! The public will understand what to expect, and what to do under such circurastances."

A number of German papers copied the above and are therefore entitled to our thanks.

These bitters are worthy the attention of invalids. Possessing great virtues in the rectification of disease of the liver and lesser glands, exercising the most searching powers in weakness and affections of the digestive organs, they are withal, safe, certain, and pleasant.
