Fatal and Melancholy Accident.

Fatal and Metanchely Accident. Yesterday morning about 5 o'clock a par-ty consisting of four men, F. Hiller, S. Gum-pel, N. Roberts and Mr. Kiemin, started from the residence of the latter, about four miles from this place, in a skiff, towards Cox's is-land, with the intention of hunting for wild ducks. When about sixty yards from the of shore, the skiff sprung a leak, and began to fill immediately, after which it capaized. The two former gentlemen clung to the skiff, and floated down the Susquehanna for about two miles, when they were rescued by Mr. Hummel, in state of the utmost exhaus-tion from cold aud exposure. We regret to asy that the two latter gentlemen lost their lives. Mr. Roberts teaves a wife, and Mr. R lemin, a wife and six small -children, to lameat their unimely death.—Harrisburg American. American.

The discovery has been made by L. L. Hill, of Wenkill, N. Y., and it is eaid that he has produced numerous copies of colored engravings true to the tint. Each particular shade is presented with all the softness in mature or art, and marked with great delicacy and brilliancy. The discov-erer had some difficulty with the yellow col-or at first, but all colors have and can now, it is said, be produced. The pictures have much the appearance of enamelling, and are believed to be equally durable, for it is very difficult to efface them by source, and are not acted upon by light. This piccess, he says, involves the use of one substance, entirely new, and is unlike anything ever na-med by chemists. Mr. H. says he has been effered \$20,000 for a half interest in his dis-covery, but declares his intention to continue experimenting until he has perfected if as he can: when, whatever disposition is may be made of it, he has resolved that it shall not be monopolised.
