ANOTHER SCIENTIFIC WONDER GREAT COUGH REMEDY! IP IB IP SII N 8 THE TRUE DIGESTIVE FLUID,

OR GASTRIC DICE. GASTRICO J RCE.

A Great Dyspepsia curser, Prepared from RENNEY, or the fourth Stomach of the Ox, after directions of Baron Liebig, the great Physiological Chemist, by J. S. Houghton, M. D., No. 11, North Eighth Street, Philadelphia, Pa.

This is a truly wonderful remedy for Indigestion, Dyspepsia, Jaudice, Liver Complaint, Constipation, and Debility, Curing after Nature's own method, by Nature's own agent, the Gastric Juice.

EF Half a spoonful of this Flyid, infused in water, will digest or dissolve, Five Pounds of Roist Beef in about two hours, out of the stormach.

in water, will digest or dissolve, Five Pounds of Roest Reef in about two hours, out of the stormach.

DIGESTION.

Digestion is Chiefly performed in the stormach by the aid of a fluid 'which freely exudes from the inner coat of that organ, when in a state of health, called the Gastric Juice. This fluid is the Great solvent of the Food, the Purifying, Preserving, and Stimulating Agent of the stormach and intensatines. Without it there will be no digestion,—no conversion of food into blood, and no nutrition of the body; but rather a foul, torpid, painful, and destructive condition of the whole digestive apparatus. A weak, half dead, or injured stormach produces no good Gastric Juice, and hence the disease, distress and debility which ensue.

PEPSIN AND RENNET.—Pepsin is the chief element, or great Digesting Principle of the Gastric Juice. It is found in great abundance in the solid parts of the human stormach after desth, and sometimes causes the stormach to digest itself, or ent itself up. It is also found in the stormach of a naimals, as the ox, calf, &c. It is the material used by farmers in making cheese, called Remnet, the effect of which has long been the special wonder of the dairy. The curdiling of milk is the first process of digestion. Rennet possesses astonishing power. The stormach of a calf will curdle nearly one thousand times its own weight of milk. Baron Liebig states that, 'One part of Pepsin dissolved in sixty thousand parts of water, will digest ment and other food.' Diseased stormachs produce no good Gastric Juice Rennet or Pepsin. To show that this want may be perfectly supplied, we quote the following

SCIENTIFIC EVIDENCE!

SCIENTIFIC EVIDENCE!

Baron Lebig, in Lis celebrated work on Animal Chemistry, says: "An Artificial Digestive Fluid analogous to the Gastrio Juice, may be readily prepared from the nucous membrane of the stomach of the Calt, in which various articles of food, as meat and eggs, will be softened, changed, and digestured, just in the same manner as they would be in the human stomach."

Dr. Pereira, in his famous treatise on "Food and Diet," published by Fowlers & Wells, New York, page 35. states the same great fact, and describes the method of preparation. There are few higher authorities than Dr. Pereira.

Dr Combe, in his valuable writings on the "Physiology of Digestion," observes that "a distinguished professor of medicine in London, who was severely afflicted with this complaint finding every thing else to fail, had recourse to the Gastric Juice, obtained from the stomach of living animals, which proved completely successful."

Dr. Graham, author of the famous works on "Vegetable Diet," says: "it is a remarkable fact in physiology, that the stomachs of animals, macerated in water, impart to the fluid the property of dissolving various articles of food, and of effecting a kind of artificial digestion of them in no wise different from the natural digestive process."

Dr. Simon's great work, the "Chemistry of Man," (Lea & Blanchard, Phila., 1846, pp. 321-22): "The discovery of PEPSIN forms a new era in the chemical history of gestion. From recent experiments we know that food is dissolved as rapidly in an artificial digestive fluid, prepared from Pepsin, as it is in the natural Gastric Juice itself."

Professor Dunglison of the Jefferson College, Philadelphia, in his great work on Huseria digestive fluid, prepared from Pepsin, as it is in the natural Gastric Juice itself."

sin, as it is in the natural Gastric Juice itself."

Professor Dunglison of the Jefferson College, Philadelphia, in his great work on Human Physiology, devotes more than fifty
pages to an examination of this subject.
His experiments with Dr Beaumont, on the
Gastric Juice, obtained from the living human stomach and from animals are well
known. "In all cases," he says, "digestion
occurred as perfectly in the artificial as the
natural digestions."

As a DYSPEPSIA CURER, Dr Houghton's
preparation of Pepsin has produced the
most marvellous effects, curing cases of Debility, Emaciation, Nervous Decline, and
dispeptic Consumption, supposed to be on
the very verge of the grave. It is impossble to give the details of cases in the limit
of this advertisement—but authenticate
certificates have been of more than two hundred Remarkable Cures, in Philadelphia, New
York, and Boston alone. These were
nearly all desperate cases, and the cures
were not only rapid and wonderful, but permanent.

It is a great Nervous Antidote, and par-

It is a great Nervous Antidote, and par-

It is a great Nervous Antidote, and particularly useful for tendency to billious disorder, Liver Complaint, Fever and Ague, or badly treated Fever and Ague, and the evil effects of Quinine, Mercury, and other drugs upon the Digestive organs, after a long sickness. Also, for excess in eating, and the too free use of ardent spirits. It almost reconciles Health with Intemperance.

OLD STEMACH COMPLAINTS.—There is no form of Old Stomach Complaints which it does not seem to reach and remove at once. No matter how bad they may be, it gives Instant Relief! A single dose removes all the unpleasant symptoms, and it only needs to be repeated, for a short time, to make these good effects permanent. Purity of Blood and Vigor of Body, follow at once. It is particularly excellent in cases of Nausca Vomiting, Cramps, Soreness of the pit of the Stomach, distress after eating, low, cold state of the Blood, Heavicess, Lowness of Spirits, Despondency, Emanciation, Weakess, tendency to Insanity, Suicide, &c.

Their power over the above diseases is not excelled, if equalled, by any other reparation in the United States, as the cures attest, in many cases after skilful physicians had falled.

These Bitters are worthy the attention of invalids. Pössessing great virtues in the rectification of diseases of the Liver and 12-ser glands, exercising the most searching powers in weakness and affections of the digestive organs, they are, withal, safe, certain and-pleasant.

Read and be Convinced.

The Hon. Charles D. Hineline, Editor of the "Camden Democrat," the best paper in West Jersey, says, July 21:—

"Hoofland's German Bitters."—"We have seen many flattering notices of this medicine, and the source from which they came, induced us to make inquiry respecting its merits. From inquiry we were persuaded to use it, and must say we found it specific in its action upon diseases of the liver and digestive organs, and the powerful influence it exerts upin nervous prostration is really surprising. It calms and stregthens the nerves, bringing them into a state of repose, making sleep refreshing.

The editor said, Dec. 22d—

"Dr. Hoofland's Ettebrated German Bitters for the cure of Liver Complaint, Jamelice, Dyspeysia, Chronic or Nervous Deblity, is deservedly one of the most popular medicines of the day. These Bitters have been used by thousards, and a friend at our elbew says he has hirt.self received an effectual and permanent cure of Liver Complaint from the use of these Bitters, the patient constantly gains strength and vigor—a fact worthy of great consideration. They are pleasant in tas the and smell, and can be used by person vinh the most adelicate stom achieved we are speakking from experience and to the afflicted we advire their use."

Judge M. M. Noah, a gertleman with great scientific and and interary attainments, said in his "New York Weekly Messenger," January 6, 1850.

"It is seldom that we recommend what re termed Patent Medicines to the confi-The section that we recommend what are termed Patent Medicines to the confidence and patronage of our readers; and, therefore, when we recommend Dr. Hoof-land's German Bitters, we wish it to be distinctly understood that we are not speaking of the nostrums of the day, that are noised about for a brief period and then forgotten after they have done their guilty race of mischif, but of a medicine long established, universally prized, and which has met the hearty approval of the Faculty itself."

Evidence upon evidence has been received (like the foregoing) from all sections of the Union, the last three years, and the strongest testimony in its favor, is, that there is more of it used in the practice of the regulor Physicians of Philadelphia than all other nostrums combined, a fact that can easily be established, and fully proving that a scientific preparation will meet with their quiet approval when presented even in this form.

Col. Forney of the Pennsylvanian, says:
Worsdell's Pills.—This excellent family medicine is daily whaning new trimpha over disease, and consequently in the high road to public favor. In the removal of the every day ills that flesh is heir to, we know of no better compound. We heard the other day of a desperate case of scrofalous eruptions of the head and face being entelly cured by them.

Du Solle of the "Times," says:
To The great popularity of Worsdell's Vegetable Pills, is attributed to the just merit which they really possess. They have been quietly gaining the fame they now have, by the force of their own virtues. The means usually employed to give celat to new remedies have not been adopted by the proprietors. They have been content to let their medicine speak for itself. It is now doing it in every section of the country.
They are for sale by most of the Store Keepers throughout the Country, and in quantities at reasonable rates, at the Laboratory No 70, North Eighth Street.
